REPORT

ON

PUBLIC INSTRUCTION

IN THE

MADRAS PRESIDENCY

FOR

1890-91.

MADRAS:
PRINTED BY THE SUPERINTENDENT, GOVERNMENT PRESS.

1891.

TABLE OF CONTENTS.

PARA.		PAGE
1.	Introduction	1

I.—GENERAL STATISTICS.

2.	Schools and scholars	1
3.	Distribution of schools and scholars by districts	3
4.	Do. do. according to standards and stages of instruction	3
5.	Institutions classified according to the agencies by which they are managed	5
6.	Education in relation to population	5
7.	Do. to male and female population of school-going age	6
8.	Distribution of scholars according to the classes of the community	7
9.	Do. do. to classes of the community and stages of instruction	8
10.	Do. do. to wealth	9
11.	Do. do. to the occupation of parents or guardians	10
12.	Do. do. to languages studied	12
13.	Vaccination	12
14.	Schools and scholars in Municipalities and Local circles	12
15.	Summary of receipts and charges from all sources	13
16.	Provincial receipts and charges	14
17.	Local Fund operations	15
18.	Municipal operations	15
19.	Receipts and charges of institutions under private management	16
20.	Distribution of expenditure on public instruction among the different classes of institutions	16
21.	Relative cost of educating each pupil in Government, Board and Aided institutions	17
22.	School fees	18
23.	Proportion of fee income to total expenditure	21
24.	Grants-in-aid	21
25.	Classification of expenditure on grants-in-aid from Provincial funds	22

II.—CONTROLLING AGENCIES.

26.	Direction	25
27.	Inspectors	25
28.	Inspectresses	25
29.	Assistant Inspectors	25
30.	Sub-Assistant Inspectors	26
31.	Sub-Assistant Inspectresses and Inspectors of Girls' Schools	26
32.	Inspecting Schoolmasters	26
33.	Superintendents of Hill Schools, Agency Tracts	26
34.	Superintendents of schools	27

III.—UNIVERSITY EDUCATION.

35.	Convocation for conferring Degrees	27
36.	Changes in the Bye-laws	27
37.	University Fee Fund	28
38.	University Endowments	28
39.	Affiliated institutions	28
40.	University Examinations	29
41.	Relative success of the different classes of institutions at the Arts examinations	30

(*a*) Arts Colleges.

42.	M.A. Degree Examination	30
43.	B A. do.	31
44.	First Examination in Arts	31
45.	Classes of the community represented at the B.A. and F.A. Examinations	31
46.	Number and strength of Arts Colleges	32
47.	First-grade Colleges	33
48.	Second-grade Colleges	35

Return of Scientific and Literary Societies for the year 1890-91 .. .. .. lxxi—lxxiv

No. 11528.

From

D. DUNCAN, Esq., M.A., D.Sc.,
Acting Director of Public Instruction,
Madras,

To

The Honorable J. F. PRICE,
Chief Secretary to Government,
Fort St. George.

Sir,

I have the honour to submit the report on the state and progress of education in the Presidency during the year 1890-91.

I.—GENERAL STATISTICS.

Schools and scholars.

2. The year was one of substantial advance almost in every direction. Schools and scholars increased from 20,512 and 600,551 to 22,028 and 644,164, or by 7·4 and 7·3 per cent. respectively. The proportion of increase under scholars would have been even greater but for the prevalence of distress in some districts owing to the failure of the North-East monsoon of 1890. How great and sustained the progress has been during the past quinquennium will be seen from the figures in the margin. The advance in scholars of over 41 per cent. during the past five years is far more than the rate of increase in the population of school-going age during the same period. The Inspectorate, Upper and Lower, which was strengthened and reorganized during this period, continued to guide the educational movement with energy and prudence. The number of public institutions furnishing returns to the Department rose from 14,929 with 458,089 scholars on the 31st March 1886 to 18,839 with 583,137 on the 31st March last, or by 26 per cent. under schools and 27 per cent. under scholars. A still greater advance is observed in the number of Government, Board and Aided schools—from 9,782 with 339,301 scholars to 12,256 with 440,541 scholars. The increase of 30 per cent. under scholars compared with that of 25 per cent. under schools is gratifying, as showing a tendency towards greater consolidation of educational efforts. While these figures indicate the growing extent of the operations of the Department, there are, however, still over 6,500 schools receiving no aid from public funds. Most of these schools stand in need of aid, but cannot receive it because they do not come up to the requirements of the grant-in-aid code. One of the most important duties of Inspecting officers is to render every possible assistance to these schools in their efforts to become more efficient. The number of subordinate Inspecting officers must be increased if they are to cope successfully with the task of raising these schools to a higher level of efficiency, both in the matter and method of instruction and in the accommodation and material appliances which experience has shown to be conducive to the growth of a sound mind in a sound body. The indigenous schools lying beyond the pale of Departmental supervision are, as it were, the crude materials out of which are gradually formed, by care and skill, at first public unaided primary schools and, finally, aided schools conforming to the requirements of the code. All this means increased work and responsibility to Inspecting officers. The annual increase in the number of schools to be examined for grant, and in the number of Board schools to be managed, make the Sub-assistants' charges more onerous every year. In certain ranges the strain is so great that no additional work can possibly be thrown on the Sub-assistants in charge without a loss of efficiency.

	Schools.	Scholars.
31st March 1886	16,014	455,837
Do. 1887	16,637	488,942
Do. 1888	17,335	505,658
Do. 1889	18,931	552,152
Do. 1890	20,512	600,551
Do. 1891	22,028	644,164

GENERAL STATISTICS.

The summary given below compares the number and strength of public and private institutions of different grades for the past two years. Scholars are exhibited according to the stages of instruction :—

Classes of institutions.	1889-90.		1890-91.	
	Number of institutions.	Number of pupils on 31st March.	Number of institutions.	Number of pupils on 31st March.
Public Institutions.				
University education—				
Arts colleges	32	3,043	35	3,205
Professional colleges	5	488	5	518
School education, general—				
Secondary schools for boys—				
High English schools for boys	141	6,925	149	8,046
Middle English schools for boys	372	23,854	357	21,553
Middle Vernacular schools for boys	39	232	50	325
Secondary schools for girls—				
High English schools for girls	30	178	29	233
Middle English schools for girls	63	1,426	63	1,351
Middle Vernacular schools for girls	125	687	167	999
Primary schools—				
For boys. Upper Primary	14,642	436,010	3,214	28,143
For boys. Lower Primary			13,943	470,371
For girls. Upper Primary	683	40,809	266	2,957
For girls. Lower Primary			462	41,817
School education, special—				
Training schools for masters	52	1,215	57	1,174
Do. for mistresses	13	289	13	253
Other special schools	29	1,904	29	2,192
Total Public Institutions	16,226	517,055	18,839	583,187
Private Institutions.				
Advanced schools teaching—				
Arabic or Persian	46	2,347	31	2,183
Sanskrit	103	1,687	99	1,877
Elementary schools teaching a vernacular only or mainly	3,969	74,035	2,843	52,109
Do. do. do. the Quran	167	5,404	197	4,464
Other schools not conforming to Departmental standards	1	23	19	394
Total Private Institutions	4,286	83,496	3,189	61,027
Grand Total	20,512	600,551	22,028	644,164

Public institutions are credited with an increase of 2,613 schools and 66,082 scholars, while private schools show a diminution of 1,097 schools and 22,469 scholars. The decrease under the latter head, and to a certain extent the increase under the former, is to be attributed to the carrying out of a more rational definition of the terms "public" and "private" as applied to schools. Such of the so-called private schools as have already adopted, to a greater or less extent, the Departmental course of study, and are in a fair way to qualify for admission to aid under the provisions of the grant-in-aid code, have been classed as public institutions. They are regularly inspected for improvement, and partake more of the nature of public than of private schools, as these terms have been defined by the Government of India.

Among public institutions, Middle English schools for boys alone have fallen, the other classes of institutions having remained stationary or risen in number. As regards attendance, Middle English schools for boys and girls and Training schools for masters and mistresses have sustained a fall.

I am again inclined to attribute a part at least of the decrease in the lower secondary classes of Middle English schools to the institution of the Primary school examination as a qualifying test for inferior appointments. The greater part of the increase in the total strength of public institutions was, as might be expected, confined to Primary schools.

Returns were received from fewer Advanced Private schools than in the previous year. The fall in the number of Elementary Private schools is, as already explained, mostly nominal, being due to incorrect classification. As many as 19 schools, not conforming to Departmental standards, furnished returns. This number will tend to increase, since schools not recognized under the Madras Educational Rules will hereafter appear under this head.

Distribution of schools and scholars by districts.

3. Schools and scholars are distributed below according to districts :—

Districts and Circles.	Area in square miles.	Population as per census return of 1891.	Number of pupils, 1888-89.	1889-90.		1890-91.		Increase.		Decrease.

It is worthy of being noted that Madura, which lost 138 schools with 3,143 pupils in 1889-90, is credited with the largest increase in schools (196) and scholars (5,818). Malabar is the only district in which there was a fall in schools and scholars. This should not, however, be taken to indicate a real retrogression in the educational condition of the district, since the decrease was wholly confined to private schools. Against 651 private schools that furnished returns in 1889-90, only 439 such schools sent in returns for 1890-91. Mr. Marsden attributes this decrease to the temporary closing of a good many private schools in consequence of the outbreak of influenza, which occurred early last year, and also of an outbreak of cholera in South Malabar in March.

Eleven districts—three in the Northern, four in the Central, and four in the Southern Circle—contributed more than 2,000 additional pupils each, Madura, Ganjam, Tinnevelly and Cuddapah showing marked improvement.

Distribution of schools and scholars according to standards and stages of instruction.

4. A more detailed distribution of public and private institutions, according to standards and stages of instruction, will be found in the subjoined table. Boys and girls in mixed schools are not, however, given separately :—

Out of 15 districts provided with colleges, four, viz., South Arcot, Coimbatore, Salem and Tanjore, contained fewer collegiate students than in the previous year. Probably a larger number from these districts resorted to the colleges in

the town of Madras. Bellary, Anantapur and Malabar show a diminution in the number of Upper Secondary pupils. Three private High schools in Malabar with 1,041 pupils in the last list have not furnished returns this year, which accounts for the large decrease noticeable against the district. In 15 districts, the number of pupils in Middle schools for boys—public and private—has fallen. Tanjore and Malabar are the only districts containing fewer pupils in Primary schools than in the year previous. But in the former district, the loss, which consists of 62 pupils, is trifling, while in the latter it is due to returns not having been received from a large number of mosque schools.

5. Institutions, public and private, are classified in the margin according to the agencies by which they are managed. Public institutions of all classes increased in number and in attendance. The establishment of new schools in the Agency tracts of the Northern Circars and of Girls' schools in several districts accounts for the increase in the number of Departmental schools. A large number of combined schools in Malabar and South Canara, ill-supplied as regards staff, accommodation and appliances, were taken over by Local Boards and placed on the salary-results system. The Local Boards in most other districts also opened schools during the year with a view to spread elementary education in backward and outlying villages and among backward classes. The result of this has been an addition of 424 schools to the list of Board institutions. It is specially worthy of being noted that the advance in attendance, viz., 25 per cent. is even more encouraging than that under schools, viz., 19, and indicates greater consolidation. Aided institutions also increased in number and strength by 4·8 and 5·4 per cent. respectively. Considering the number of these schools, the limited number of subordinate Inspecting officers available for grant examination, and the circumstance that not a few of the schools included under this head passed to the list of Government and Board schools during the year, the above advance must be viewed as satisfactory. The unusual increase in the number of Unaided schools has already been explained as being due to a more correct classification of public and private schools, which has to a large extent reduced the number of private and indigenous schools borne on the Departmental returns.

Institutions classified according to the agencies by which they are managed.

Institutions.	31st March 1890.		31st March 1891.	
	Institutions.	Scholars	Institutions.	Scholars.
Under public management.				
Managed by the Department	190	10,443	221	12,152
Managed by Local and Municipal Boards	2,281	86,468	2,705	108,713
Under private management.				
Aided from public funds	8,904	303,294	9,330	319,676
Unaided from public funds	4,851	116,850	6,583	142,596
Private and indigenous	4,286	83,496	3,189	61,027
Total	20,512	660,551	22,028	644,164

The average strength of each Government, Aided and Private school remained the same as in 1890, viz., 55, 34 and 19. In Board schools, it rose from 38 to 40 and in Unaided schools it fell from 24 to 22, the decrease in the latter case being the outcome of the inclusion under this head of a large number of weakly-attended pial schools previously classed as private schools.

	1890.	1891.
Colleges	21	24
Secondary schools	462	513
Primary schools	8,392	8,760
Training schools	15	16
Special schools	14	17
Total	8,904	9,330

Aided institutions of all grades more or less participated in the increase as will be seen from the figures recorded in the margin. About 86 per cent. of the increase appertained to Primary schools. An appreciable increase will also be noticed under Secondary schools.

Education in relation to population.

6. The proportion of pupils to population in each district is worked out in the next table. The approximate figures communicated by the Superintendent of Census regarding population have been adopted as being nearer the mark than the final census figures of 1881.

GENERAL STATISTICS.

Districts.	Population.	Scholars.		Proportion of pupils to population.	
		1889-90.	1890-91.	1889-90. As per Census of 1881.	1890-91. As per Census of 1891.

Godávari	2,080,738	30,262	32,255	1 „ 59	1 „ 65
South Arcot	2,159,813	30,492	32,189	1 „ 59	1 „ 67
Nellore	1,461,881	19,170	21,836	1 „ 64	1 „ 67
Coimbatore	1,999,432	24,154	26,946	1 „ 69	1 „ 74
Kurnool	817,528	9,241	10,275	1 „ 77	1 „ 80
Salem	1,962,566	20,781	23,171	1 „ 77	1 „ 85
Anantapur	707,555	6,619	8,024	1 „ 91	1 „ 88
Cuddapah	1,268,887	11,281	14,329	1 „ 99	1 „ 89
Vizagapatam	2,795,054	22,073	24,142	1 „ 113	1 „ 116
Total ...	35,606,203	600,551	644,164	1 in 51	1 in 55

The decrease from one in 51 to one in 55 in the total is nominal and is solely due to the adoption of the new census figures. Three districts, viz., Ganjam, Anantapur and Cuddapah show a better proportion notwithstanding. Eleven districts maintained their position in the last list. In consequence of the elimination of a number of private schools, Malabar lost its rank in the list, while Ganjam gained three places and Nílgiris and North Arcot two each. In as many as 13 out of 22 districts, less than one in every 50 of the population was at school. Anantapur, Cuddapah and Vizagapatam continued to occupy the last three places in the list in spite of a very marked increase in the number of pupils under instruction. The position of Godávari is not creditable, considering what has for years been done for education in the district.

Education in relation to male and female population of school-going age.

7. The relative progress of education among the male and female population is exhibited in the following table. Fifteen per cent. of the approximate figures of the last census has been taken to represent the population of school-going age in the absence of details of population according to age.

Districts.	Population of school-going age.		Pupils.		Percentages.	
	Males.	Females.	Boys.	Girls.	Boys.	Girls.
Ganjam	138,348	145,724	36,217	1,567	26·2	1·1

Malabar	197,034	200,647	55,892	14,437	28·4	7·2
South Canara	76,593	81,739	16,157	2,531	21·1	3·1
Total ...	2,641,538	2,699,392	556,449	87,715	21·1	3·2

Of the male and female population of school-going age 21·1 and 3·2 per cent., respectively, were under instruction at the close of the year. This shows the enormous extent of the work yet to be accomplished before it can be said that the elementary instruction either of boys or of girls has been adequately provided for in this Presidency. Viewing districts individually, Madras had three out of four boys, Tinnevelly one out of three, and Ganjam, Chingleput, Bellary, Nílgiris, Tanjore and Malabar one in four at school. Nine districts had less than one in five boys attending school. As regards girls, Madras had 28 out of every 100 girls at school, and Nílgiris, Malabar, Tinnevelly and Kistna nine, seven, six and five respectively. In as many as ten districts, not even twenty out of every 1,000 girls of school-going age were receiving any education whatever. Unless the Department is provided with a special assignment of funds for girls' schools in those districts, I do not think that this state of things will show any tangible improvement for years to come. Hindu parents are so extremely indifferent to the education of their daughters that they will not send them to school unless it is brought close to their doors.

Distribution of scholars according to the classes of the community.

8. The Superintendent of Census has not been able to furnish me with the details regarding the population under each great class of the community. Having however, in some of the statements, adopted the approximate totals received from him, I have thought it better to raise the population belonging to each class as per Census of 1881 by the proportion in which the male and female population advanced throughout the Presidency, than to take the figures of the Census of 1881 themselves. This may be assumed to represent the condition of each class much more approximately than if the conclusions were based on the population statistics of ten years ago.

Classes of the community.	1889-90.			1890-91.			Population.	Proportion of pupils to population.	
	Boys.	Girls.	Total.	Boys.	Girls.	Total.		1889-90, as per Census of 1881.	1890-91, as per Census of 1891.
Hindus ...	423,171	49,972	473,143	455,907	56,356	512,263	32,551,076	1 in 57	1 in 64
Native Christians	29,591	14,634	44,225	31,474	16,036	47,510	770,353	1 „ 15	1 „ 16
Muhammadans ...	64,836	10,364	75,200	64,679	11,999	76,678	2,214,367	1 „ 26	1 „ 21
Europeans and Eurasians	3,888	3,172	7,060	3,832	3,179	7,011	37,800	1 „ 5	1 „ 5
Others	721	202	923	557	145	702	32,607	1 „1,319	1 „ 46
Total ...	522,207	78,344	600,551	556,449	87,715	644,164	35,606,203	1 in 51	1 in 55

One in every 55 was attending school. The corresponding figure for the previous year was one in 51. This should not, however, be supposed to indicate a falling back. On the new Census figure it will be seen that the proportion of pupils to population really advanced from 1 in 59 to 1 in 55 or, if a proportionate abatement were made for the increase since 31st March 1890, the advance was from 1 in 58 to 1 in 55 approximately. Under Europeans and Eurasians the figure did not change, as the population is comparatively small, while the large difference under 'Others' must be attributed to a more correct classification of the population. It is noteworthy that, viewed in relation to population, Native Christians were four times and Muhammadans three times as well off as Hindus. The slow progress of Non-Brahman Hindus forming the bulk of the population explains this wide variation.

In the following summary the proportion of pupils to the population of school-going age is worked out on the same lines as in the last table:—

GENERAL STATISTICS.

Classes of the community.	Population of school-going age.		Pupils under instruction.		Percentage.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
Europeans and Eurasians	3,168	2,502	3,832	3,179	121	127
Native Christians	56,313	59,240	31,474	16,036	56	27
Muhammadans	163,543	168,612	64,679	11,999	40	7
Hindus. { Brahmans	95,305	97,255	73,823	13,001	77	13
Hindus. { Non-Brahman Hindus	2,320,491	2,369,610	382,084	43,355	17	2
Others	2,718	2,173	557	145	20	7
Total ...	2,641,538	2,699,392	556,449	87,715	21	3

The percentages relating to Europeans and Eurasians imply that all the children, male and female, of school-going age were at school. Brahmans rank next as regards boys and Native Christians follow them; while, as regards girls, these two classes are in an inverse order. Only one in six Non-Brahman Hindu boys was at school. Of Muhammadan and Non-Brahman Hindu girls only 7 and 2 per cent., respectively, were under instruction as in 1889-90. The disproportion between the percentages of Brahman boys and girls is striking. For every two boys at school the Native Christian community has but one girl. One would expect to find little or no difference, as this section of the community is not so conservative in the matter of educating their girls as the other sections, Europeans and Eurasians excepted.

Distribution of scholars according to classes of the community and stages of instruction.

9. In the following table will be found the distribution of scholars in public and private institutions according to the different stages of instruction, boys and girls of the different sections of the community being distinguished:—

Classes of institutions.	Total of scholars.	Classes of the community.						
		Europeans and Eurasians.	Native Christians.	Muhammadans.	Hindus.			
					Brahmans.	Non-Brahman Hindus.	Paraiyas and kindred classes.	Others.

Taking Arts Colleges, it will be observed that Non-Brahman Hindus formed 20·6 per cent. of the total college attendance, against 21·7 per cent. in the previous year, and that the proportion of Native Christians, as also of Europeans and Eurasians, was slightly less. There was a small increase under Muhammadans, though they contributed 1·4 per cent. only of the total number.

In the upper-secondary stage, Native Christians and Muhammadans, especially the former, were more largely represented than in 1889-90, while the proportion of Europeans and Eurasians remained unchanged. Lower-secondary classes had fewer Muhammadans, but more Native Christians and Europeans. Brahmans, though showing a slight decrease, formed more than one-half of the school attendance. It is matter for regret that Non-Brahman Hindus were not even so well represented as in 1889-90 in the upper or lower-secondary stage of instruction. One Brahman and seven Non-Brahman Hindu girls were reading in the upper-secondary stage, against five Non-Brahman girls in the previous year. In the lower secondary stage the number of girls belonging to these classes rose from 57 and 391 to 79 and 508 respectively, and that of Muhammadan girls from 23 to 37.

Distribution of scholars according to wealth.

The richer, middle, and poorer classes advanced by 7, 8 and 7 per cent. respectively, the corresponding increases in the previous year being 10, 11 and 8 per cent. The variations may be due to differences in classification.

In the primary stage of instruction the three classes stood in the same relation towards each other as in the year previous, and in the collegiate stage nearly in the same proportion. But in the upper and lower secondary stages the proportion of the richer classes was not affected, while that of the middle classes rose from 57 and 45 to 59 and 48 per cent., the percentages under the poorer classes having diminished *pari passu*. Since the institution of the Primary School Examination and the abolition of the Middle School Examination, many belonging to the poorer classes probably, and also very naturally, feel less inducement to educate their boys beyond the upper primary stage. The decrease in the strength of the lower secondary departments in all the districts in the Presidency cannot otherwise be accounted for.

Stage.	Richer classes.	Middle classes.	Poorer classes.
Upper secondary	19	50	31
Lower secondary	3	41	56
Primary	1	20	79

In the margin will be found the percentages of female pupils. As under boys, the relative proportion of the different classes in the primary stage remained unaffected. The richer and middle classes were stronger in the upper and weaker in the lower secondary stage.

Distribution of scholars according to the occupation of parents or guardians.

11. Particulars are given below as to the occupation of parents or guardians of scholars, male and female, in each stage of instruction :—

There was more or less increase under each head, that in the number of artisan pupils being most worthy of note. The official, trader and land-holding classes alone, excluding petty officials, contributed together 85, 80, 70 and 65 per cent. of the total attendance in the colleges, upper-secondary, lower-secondary and primary stages of instructions respectively. The observation made in my last report to the effect that the means of parents generally regulate the number of pupils in the various stages of study applies to the year under report as well.

The same classes contributed 60, 52 and 55 per cent. respectively of girls reading in upper-secondary, lower-secondary and primary classes. This shows that the above classes are not so liberal and enlightened in the matter of educating

GENERAL STATISTICS

their daughters as one might expect them to be, judging from the money and care they bestow on the schooling of their sons. It is, however, undeniable that views more in accordance with the enlightenment of the present day are steadily, if but slowly, making progress.

Distribution of scholars according to languages studied.

12. The table below classifies scholars according to the languages studied by them :—

Languages.	Boys		Girls.	
	1889-90.	1890-91.	1889-90.	1890-91.
English	77,448	78,482	7,113	7,395
Latin	1,169	1,054	81	172
Greek	15	124	...	..
Arabic	31,064	28,193	7,131	7,897
Persian	502	1,006	83	23
Sanskrit	7,412	7,926	32	100
Tamil	245,295	261,336	33,165	36,986
Telugu	144,859	161,516	22,365	25,248
Malayalam	41,562	49,218	10,452	12,085
Canarese	24,102	26,267	2,497	2,360
Hindustani	11,151	14,643	3,182	4,444
Uriya	23,607	27,244	319	385
Tulu	84	120	34	80
Maratha	111	145	...	39

There was a small advance in the number of scholars receiving instruction in and through English. The smallness of the increase I am inclined to attribute to the institution of the Primary School Examination, which seems to have affected the attendance of the lower-secondary classes. In Public Primary schools proper out of 442,879 boys only 29,068, or 6·6 per cent., were learning English. I consider this to be a very inadequate proportion. Among classical languages Latin and Arabic were being studied by fewer boys, the decrease in the number and strength of private Mappila schools accounting for the fall under Arabic. Sanskrit more than recovered the loss it had sustained, and the eight vernacular languages spoken by the school-going population were each studied by a larger number of pupils than in 1889-90. The increase in the number of Uriya boys (3,637) is very encouraging.

The number of girls learning the different languages shows more or less improvement, Persian and Canarese excepted. The increase under Latin and Sanskrit is noteworthy.

Vaccination.

13. In spite of the large addition to the number of pupils under instruction, the proportion of boys unprotected against small-pox fell from 12·4 to 11·1 per cent., and that of girls from 15·5 to 13·9. The improvement under girls is of special interest, inasmuch as the grant-in-aid restrictions have not as yet been extended to them. From the particulars of unprotected scholars noted in the margin, it will be observed that the majority of them were in primary schools. The five collegiate students under this category belonged to the Madras Christian College.

Schools and scholars in Municipalities and Local circles.

14. The year was marked by an increase both in schools and in scholars in Municipalities as well as in Local circles. In Municipalities schools advanced from 2,420 to 2,558, or by 5·7 per cent., and scholars from 134,867 to 140,422, or by 4·1 per cent. It is to be regretted that the improvement in the attendance did not keep pace with that in the number of schools. Schools and scholars in Local circles rose from 18,092 and 465,684 to 19,470 and 503,742 or by 7·6 and 8·2 per cent. respectively. This is encouraging, considering that the facilities which exist in most of the non-Municipal towns and in villages are small when compared with the facilities in Municipal towns. Nearly 12 per cent. of the total number of schools and 22 per cent. of the scholars belonged to Municipalities.

GENERAL STATISTICS.

A comparison of the figures in the margin with the corresponding statistics in the last report will show that in Municipalities the number of the different classes of institutions remained stationary or improved, except under Secondary schools for boys and Special schools; while outside Municipal limits Secondary schools for boys diminished in number. The general decline in the number and strength of Secondary schools for boys, which was, however, confined to the Lower Secondary stage, will be explained in Chapter IV of this report. Primary schools for boys constituted nearly 70 per cent. and 95 per cent. of the total number of institutions in Municipalities and Local circles, respectively, and their average attendance remained the same as in 1889-90, viz., 42, in schools in Municipalities, and 25 in schools elsewhere. An appreciable increase will also be noticed in the number and strength of Secondary schools for girls within Municipalities and in Primary schools for girls outside them. Statistics of population in Municipalities, according to the last census, are not before me to enable me to notice the condition of education in each Municipality in greater detail.

GENERAL STATISTICS.

There was an increased expenditure on Arts colleges from public funds and fees, but, from subscriptions and miscellaneous receipts, only Rs. 1,13,866 were spent against Rs. 1,40,208. This is due partly to the S.P.G. College, Trichinopoly, having again been brought on the aided list. On the whole, 10·12 per cent. of the total outlay related to Arts colleges against 10·95 in the previous year. The large increase in Professional colleges was due chiefly to the military pay of the Principal and Professors of the Medical College having been included in the returns of 1890-91. The surplus fees of the Law class amounting to Rs. 10,264 have not been taken into account here. The greater portion of the additional expenditure on public schools appertained, as might be expected, to schools, general. Fees and public and private funds more or less contributed to the increase, Provincial funds showing the largest proportion. Taking the excess fees of the Law class into account, the expenditure from Provincial funds was Rs. 15,83,126 against Rs. 13,60,201 in the previous year. The inclusion of the military pay of the staff in the Medical College noted above and the larger expenditure on Arts colleges and grants-in-aid chiefly led to this result. Provincial revenues met 29 against 27 per cent., Local funds 13 against 12 per cent., and Municipal funds and fees, 3 and 31 per cent., respectively, of the aggregate outlay.

Thus public funds and fees alone covered more than three-fourths of the entire outlay, and endowments, subscriptions and miscellaneous receipts bore a little less than a fourth of the expenditure on public instruction.

Provincial receipts and charges.

16. In the following statement, receipts and charges appertaining to Provincial funds for the past two years are compared. As remarked in the last report, the figures relating to the Lawrence Asylum, Ootacamund, have been excluded from the table. The expenditure on the Medical College and on educational buildings by the Public Works Department are, on the other hand, included in the summary :—

Charges and receipts.	1889-90.		1890-91.	
Charges.	Rs.	Rs.	Rs.	Rs.
Direction		54,376		53,391

Private contributions	1,848		2,668	
Miscellaneous receipts	9,728		10,505	
		1,79,860		1,69,159
Net expenditure		13,09,128		15,31,272

On Direction, Inspection and Buildings, there was a smaller outlay than during 1889-90. The expenditure on Government Colleges and schools for general education shows an increase of Rs. 29,169, which is due partly to the opening of additional schools in the Agency tracts of the Northern Circars, and of girls' schools in several districts, and partly to the increased cost of colleges. Professional colleges and schools for special education cost nearly Rs. 74,000 more,

but this is mainly due to the inclusion of the military pay of the Principal and Professors, Medical College, as noticed already. Under "Grants-in-aid" there was a very considerable increase, which will be explained further on. The entry against miscellaneous charges includes the value of special apparatus indented for in 1889 for the Presidency College and adjusted in the accounts of the year under report. The aggregate charges were Rs. 17,00,431, made up of Rs. 15,19,860, expenditure by the Department as per Accountant-General's figures, Rs. 1,40,372, cost of Medical College and schools with stipends (Rs. 76,715 + 57,638 + 6,019) and Rs. 40,199, outlay by the Public Works Department on school-houses.

The receipts of the year amounted to Rs. 1,69,159, against Rs. 1,79,860 in 1889-90, the decrease chiefly occurring under sale of books and Local and Municipal contributions. A smaller sum was realized from the sale of books, as a considerable portion of the saleable old stock of books was disposed of in the previous year. Certain arrears of Local and Municipal contributions on account of the Medical College were collected in 1889-90 and the decrease under this head is thus nominal.

The net cost from Provincial funds was Rs. 15,31,272. If the net charge on the Medical College and school Rs. (1,09,131), and the outlay on buildings Rs. (40,199), be deducted, the above figure is reduced to Rs. 13,81,942, the amount as per Accountant-General's statement, taking the Mangalore College endowment receipts into account.

		RS.	
Gross expenditure			15,19,860
	RS.		
Educational receipts	1,35,576		
Mangalore Endowment	2,342		
			1,37,918
			13,81,942

The total expenditure on Government colleges and schools for general education is given in General Table (IV) as Rs. (2,19,640 + 1,83,689 + 31,378 =) 4,34,707. If the non-departmental receipts, Rs. 956 (723 + 182 + 51) and the Lawrence Asylum charges, viz., Rs. 1,16,920 (48,000 + 64,939 + 2,155 + 600 + 1,226), be deducted, the result will be Rs. 3,16,831 shown in the above table. Similarly, if the non-departmental receipts, Rs. 102 (24 + 78) be deducted from the expenditure on Professional colleges and schools for special education, viz., Rs. 3,37,568 (1,39,440 + 1,98,128), the expenditure proper on colleges and schools for special education will be found to be Rs. 3,37,466.

The net Provincial charge is entered in column 34 of General Table (IV) as Rs. 15,93,390. This includes Rs. 48,000, grant to the Lawrence Asylum, and Rs. 3,854 grants to certain orphanages paid direct by Government, Rs. 1,09,131 the net charge of the Medical College and school and Rs. 40,199, the expenditure by the Public Works Department; but it does not allow credit for Rs. 10,264, the surplus fees of the Law class. If the above items be taken into account, it will be found that the net cost proper is the same as that shown above, viz., Rs. 13,81,942.

Local Fund operations.

17. District and Taluk Boards constituted under Act V of 1884 maintained 2,475 schools with 96,358 pupils, against 2,078 schools with 74,918 pupils in the year previous. This increase was brought about by the conversion into salary-results schools of a large number of combined schools in Malabar, and the establishment of new schools in almost all the districts. Of the schools, 102 were Secondary, 2,325 Primary, and 48 Special and not less than 62 schools were intended for girls. The Boards spent Rs. 3,89,555 net on their own schools, Rs. 6,090 on Government institutions, Rs. 2,18,520 on aided schools, Rs. 78,447 on inspection, and Rs. 16,057 on scholarships and miscellaneous charges. The gross expenditure on education aggregated Rs. 9,41,253, excluding buildings and outlay on medical schools.

Municipal operations.

18. The number of schools under Municipal management rose from 203 to 230, of which three were Colleges, 33 Secondary schools, 191 Primary schools, and three Special schools. Their attendance advanced from 11,550 to 12,355. Rs. 62,349 were spent by Municipal Councils on their own schools, Rs. 3,599 and Rs. 5,167 on institutions managed by Govern-

GENERAL STATISTICS.

ment and by Local Boards, Rs. 99,190 on aided schools, Rs. 9,477 on inspection and Rs. 3,800 on scholarships and miscellaneous charges. The gross Municipal outlay on education was Rs. 2,67,014, excluding sums expended on school-houses and medical schools.

Receipts and charges of institutions under private management.

19. A financial summary of public aided institutions under private management is hereto attached. The total expenditure rose by Rs. 1,55,413, of which public funds met Rs. 87,746 and fees Rs. 48,682.

Institutions.	From Provincial funds.	From Local funds.	From Municipal funds.	From fees.	From subscriptions.	From endowments and other sources.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Arts colleges	78,572	...	...	1,14,181	13,772	82,704	2,89,229
Secondary schools, including Primary departments	2,05,217	7,041	34,065	4,66,697	49,042	3,33,542	10,95,604
Primary schools	94,759	2,10,903	63,720	3,22,482	23,057	2,27,234	9,42,155
Training do.	21,813	...	...	...	2,194	26,492	50,499
Other special schools	11,296	79	...	12,367	12,133	33,044	68,919

To the above expenditure should be added Rs. 1,75,131 spent on buildings, Rs. 15,122 furniture and other special grants, Rs. 10,469 on scholarship grants, Rs. 12,959 on scholarships paid from subscriptions and other sources, and Rs. 3,093 miscellaneous grants.

On unaided institutions Rs. 4,32,070 were expended, Rs. 23,271 on Arts colleges, Rs. 1,55,544 on Secondary schools, Rs. 2,50,836 on Primary schools, Rs. 339 on buildings and Rs. 2,080 on scholarships.

Distribution of expenditure on public instruction among the different classes of institutions.

20. The following figures show the distribution of expenditure among the different classes of public institutions. The proportionate cost of Primary classes of Secondary schools is exhibited against Primary schools, and the statistics of the Lawrence Asylum, Ootacamund, are entered separately under Government institutions :—

Classes of institutions.	From Provincial funds.	From Local funds.	From Municipal funds.	From fees.	From subscriptions, endowments and other sources.	Total.

On Government institutions, excluding the Lawrence Asylum, Rs. 6,55,355 were expended, of which the Provincial share was Rs. 5,13,947, against Rs. 4,17,456 in the previous year. Of the increase of Rs. 96,491, not less than Rs. 61,337 represents the additional outlay on the Medical College, already alluded to, and the residue is due partly to the opening of new girls' schools and of additional schools for boys in the Agency tracts, and partly to the larger outlay on existing institutions. The cost to Government on its own colleges and schools, taking the surplus Law class fees into calculation, was 76 against 73 per cent. of the total expenditure. The small number of Government institutions, together with the unavoidably large expenditure on Professional colleges and special schools, and the absence of fees in the Agency schools and in many girls' schools, explain this high proportion of net cost to Government.

Expenditure on Board schools increased by Rs. 1,19,353 in consequence chiefly of the opening of new schools; and this was met by additional contributions from all sources. The Provincial share of the total cost was 17 per cent. against 16 per cent. in 1889-90.

Of the outlay on Aided schools, public funds—Provincial, Local and Municipal—met over 29 per cent., against 28 per cent. in the previous year. The increased proportion of cost borne by Government in Board and Aided institutions is the result of the liberal aid given by the Department to enable managers to effect improvements in the qualifications of the staff and in the supply of the requisite apparatus and appliances.

The expenditure from Provincial funds on Secondary and Primary schools is summarized in the margin. Compared with the figures of the previous year, the outlay on Secondary schools shows an increase of Rs. 35,343 and that on Primary schools of Rs. 52,923. The relatively larger expenditure on Primary education is to be noted. By aiding Secondary schools to a larger extent, the Department has enabled Boards and Managers to extend the sphere of Primary education.

Schools.	Secondary.	Primary.
	Rs.	Rs.
Boys' schools	1,39,558	1,50,360
Girls' do.	45,541	1,36,677
Total ...	1,85,099	2,87,037

Relative cost of educating each pupil in Government, Board and Aided institutions.

21. The cost of educating each pupil in Government, Board and Aided Arts colleges and Secondary and Primary schools for boys, according to average number and average daily attendance, is recorded below, and has been calculated on the same principle as was followed in the last report:—

GENERAL STATISTICS.

Institutions.	Government institutions		Board institutions.		Aided institutions.	
	Cost per pupil on average number on rolls	Cost per pupil on average attendance	Cost per pupil on average number on rolls.	Cost per pupil on average attendance	Cost per pupil on average number on rolls	Cost per pupil on average attendance
	Rs A. P.	Rs. A P.	Rs A P	Rs. A. P.	Rs A P.	Rs. A. P

Primary schools for boys ..	6 0 2	7 9 4	4 7 9	5 5 6	3 5 9	4 0 1

In Government Arts colleges the cost per student advanced during the year chiefly in consequence of a decline in the average attendance and of the enhanced outlay on the upkeep of the colleges. Board and Aided colleges, on the other hand, educated each student at a cost less than in 1889-90, their improved attendance having chiefly led to this result. The marked increase noticeable in the cost per pupil in Government Secondary schools is due to the inclusion of expenditure on Vernacular Middle schools in the Ganjam and Vizagapatam agencies. In 1889-90 the expenditure on the above-mentioned schools was returned against Primary schools, the fifth standard classes having been opened only towards the close of the year. In Board Secondary schools the cost per pupil was somewhat less, and in aided schools of this description it was slightly more, than in the previous year. Government Primary schools for boys were less costly than in 1889-90, and this must be attributed, as explained above, to the transfer to Secondary schools of the charges of the Vernacular Middle schools in the Agency tracts. In Board and Aided Primary schools, the cost per pupil was a little higher. This has probably been brought about by the low attendance of new schools. On the whole, Government institutions were twice as costly as aided ones. This difference will continue, for the former are, as a rule, better officered than the latter, and many of them are situated in outlying places to which private effort has not extended and where no fees, or only nominal fees, can be levied. The difference between the cost of educating each pupil in Board and Aided Secondary and Primary schools for boys is small, but even this would not have occurred, had no distinction been made between the fees charged in Board and in Aided schools. The higher scale in force in Board schools has had the effect of reducing their attendance and thus raising the cost per head.

School fees.

22. The fee-income in public and private schools for the past 10 years was as shown below :—

Years.	Institutions managed by Government.		Institutions managed by Local Fund and Municipal Boards.		Institutions under private management, including private schools.		Total.	
	Attendance on 31st March	School fees.	Attendance on 31st March.	School fees.	Attendance on 31st March.	School fees.	Attendance on 31st March.	School fees.
		Rs.		Rs.		Rs.		Rs.
1881-82	12,533	1,49,042	43,193	45,883	337,957	7,50,580	393,683	9,45,505
1882-83 .	12,319	1,64,200	48,124	56,725	385,881	8,22,687	446,324	10,43,612
1883-84 .	10,675	1,78,775	47,847	85,091	389,264	8,93,762	447,786	11,57,628
1884-85 ...	8,969	1,51,756	48,421	1,31,310	373,461	10,00,074	430,851	12,83,140
1885-86 ..	9,272	1,31,197	49,220	1,60,011	397,345	10,08,834	455,837	13,00,042
1886-87 ...	9,359	1,28,841	52,018	1,76,286	427,565	11,16,987	488,912	14,22,114
1887-88 ...	8,980	1,19,491	56,019	1,96,583	440,659	11,71,373	505,658	14,87,417
1888-89 .	9,548	1,22,046	66,467	2,06,423	476,137	11,97,992	552,152	15,26,461
1889-90 ..	10,443	1,17,236	86,468	2,14,998	503,640	12,65,891	600,551	15,98,125
1890-91 ...	12,152	* 1,23,402	108,601	2,18,544	523,411	12,83,778	644,164	16,25,724

The fee-revenue thus increased by 1·7 per cent., against an increase of 7·3 per cent. in the total attendance, the corresponding percentages for 1889-90 being

* This includes Rs. 10,264, surplus fees of the Law class.

4·7 and 8·8 respectively. Government institutions yielded in fees Rs. 6,166 more than in the previous year. The increase would have been greater but for the unfavourable results of the last Matriculation Examination, which reduced the strength of the F.A. classes of the Kumbakónam and Rajahmundry Colleges, and for the fact that a Junior F.A. class was not formed in the Calicut College, in consequence of the affiliation of the Brennen College, Tellicherry, to the F.A. standard. In Board and other schools, the increase in attendance was 25·6 and 4 per cent., respectively, but the increase in fee receipts was 1·6 and 1·4 per cent. only. The fee-income cannot be expected to keep pace with the advance in attendance, as new schools do not yield a revenue proportionate to their attendance, no fees, or only nominal fees, being levied in them.

The number on the rolls in Government institutions on the 31st March last was nearly the same as at the close of 1881-82, but the fee-revenue was 17 per cent. less, owing to the transfer during the past decade to the management of Local Boards and private bodies of several Second Grade colleges and Secondary schools yielding a pretty large fee-income. The loss in attendance was made good by the establishment during this period of a number of girls' schools and of schools in the Agencies of the Northern Circars. The attendance of Board schools advanced during the decade by 151 per cent. and their fee assets by 376 per cent. The comparatively larger increase in fees should be attributed partly to the transfer of Government institutions to the Boards' control and partly to the gradual introduction of fees in all Board Primary schools.

In Aided and other schools the attendance rose by 54·8 per cent. and the income from fees by 71·3 per cent.

Further particulars regarding the fees realised in the different classes of schools are given below :—

Government institutions yielded Rs. 1,23,402 in the shape of fees against Rs. 1,17,236 in 1889-90. The increase chiefly appertained to Professional Colleges. The fall in the average income of Government Lower Secondary schools for boys is due to the non-levy of fees in the Agency schools of Ganjam.

There was a decrease in the average fee of Board Secondary schools, which is due to a considerable loss in the fee-income consequent on the fall in their attendance, but colleges gained a larger average fee-income along with improved attendance.

Aided colleges secured a larger fee-revenue, but the average was slightly less, which must be attributed to the admission to the list of the American Luthern Mission College, Guntúr, which has been charging a lower scale of fees. The proportion fell in Lower Secondary schools also, owing to a fall in numbers. The total average fee was 2·92 against 2·90 in 1889-90, while the Government and Board institutions show a decrease in this respect.

Excepting Primary schools for girls, unaided and private schools of all grades are credited with a lower average than in the previous year. The laxity in the fee collections and the incompleteness of the returns from many of the schools falling under this category account for this result.

The total average fee in all classes of institutions taken together fell from 2·76 to 2·59. As primary education developes, the figure will naturally diminish.

Proportion of fee-income to total expenditure.

23. The proportion of expenditure borne from fees in the several classes of institutions is noted in the annexed table. Under Secondary schools are included the figures appertaining to the Primary departments thereto attached :—

Classes of institutions.	Government.			Board.			Aided.			Unaided and Private.			Total.		
	Total cost.	Fees.	Percentage of fees to cost.	Total cost.	Fees.	Percentage of fees to cost.	Total cost.	Fees.	Percentage of fees to cost.	Total cost.	Fees.	Percentage of fees to cost.	Total cost.	Fees.	Percentage of fees to cost.

Total ..	7,72,275	1,23,402	16	7,88,321	2,18,544	28	24,46,406	9,15,727	37	5,55,357	3,68,051	66	45,62,359	16,25,724	36

On the whole, Arts colleges were more self-supporting than in the year previous, fees having covered 32 per cent., against 31 per cent., in spite of the enhanced cost of the colleges. The decrease in the proportion of fees in Professional colleges is nominal, being due to the inclusion in the account of the Military pay of the Principal and Professors, Medical College. In Upper and Lower Secondary schools for boys, 60 and 40 per cent., respectively, of the charges were borne from fees against 65 and 44 per cent. in 1889-90. This must be attributed partly to the diminished attendance of Lower Secondary schools and classes which affected the fee-income, and partly to the improved staff provided for those schools involving additional expenditure. In Primary schools for boys also, the proportion fell from 42 to 40. The small fee-income of new schools, compared with the total outlay, explains this decrease.

Taking all institutions together, it will be observed that 36 per cent. of the entire expenditure on colleges and schools was met from fees, against 38 per cent. in the previous year, though there was an addition during 1890-91 of over a quarter of a lakh of rupees to the revenue from fees.

Grants-in-aid.

24. The expenditure on "Grants-in-aid" from Public funds is given in the following summary. The entry against "Provincial funds" includes, as usual, grants paid to Local Boards and Municipal Councils :—

GENERAL STATISTICS.

Sources.	1881-82.	1882-83.	1883-84.	1884-85	1885-86.	1886-87.	1887-88	1888-89.	1889-90	1890-91.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs	Rs.	Rs.
Provincial funds ...	2,60,934	3,31,951	3,47,913	4,10,440	4,73,904	4,47,454	4,89,405	4,17,759	5,02,538	6,40,341
Local funds	2,53,819	3,01,099	2,83,095	2,76,938	2,59,100	1,99,100	1,97,346	2,05,533	2,02,257	2,18,520
Municipal funds	43,768	59,115	74,926	1,01,677	1,04,881	91,217	90,146	95,435	88,751	99,190
Total ..	5,58,521	6,92,165	7,05,934	7,89,055	8,37,885	7,37,771	7,76,897	7,18,727	7,93,546	9,58,051

A larger amount of grants-in-aid was thus paid during the year from Provincial, Local, and Municipal funds together, the increase over 1881-82 and 1889-90 being 71·5 and 20·7 per cent. respectively.

Rs. 6,40,341, or 27·4 per cent. more than in the previous year, were disbursed as grants from Provincial funds. During the past decade this item has increased by 145·4 per cent. Rs. 1,50,802 of the amount were paid to Local and Municipal Boards, against Rs. 1,10,941 in the year preceding.

The aggregate grants from Local and Municipal funds were 8 and 11·8 per cent., respectively, in excess of the grants paid in 1889-90, in spite of the transfer of many combined schools to the management of the Boards. The advance in the grants paid from Local funds during the past four years is noteworthy, especially seeing that a considerable number of results and combined schools passed to the salary-results list.

The total amount of Municipal grants paid in the year under report was 126·6 per cent. larger than in 1881-82. The amount was over one lakh in 1884-85 and 1885-86. The fall since is chiefly due to several Municipal Councils having replaced non-successful results schools by schools of their own.

Classification of expenditure on grants-in-aid from Provincial funds.

25. Details of the outlay from Provincial funds on "Grants-in-aid" are compared below for the past two years:—

Grants.	1889-90.	1890-91.
I.—Grants to schools under private management.	Rs.	Rs.
Salary and rent grants	1,92,060	2,20,072
Furniture, library, apparatus and other special grants ...	10,788	14,166
Scholarship grants	20,072	23,324
Building grants	19,833	54,439
Feeding and clothing grants	10,093	9,641
Grants to eleemosynary schools and miscellaneous grants ...	2,422	2,662
Payments by results	1,36,329	1,65,235
Total ...	3,91,597	4,89,539
II.—Grants to Board Schools.		
Salary and other grants to Local Boards	85,774	1,18,214
Do. to Municipalities	25,167	32,588
Total ...	1,10,941	1,50,802
Grand Total ...	5,02,538	6,40,341

There was an increased expenditure under all the items, excepting "Feeding and clothing grants," under which the decrease was only slight.

Salary and Rent grants.—An increase of over Rs. 28,000 will be noticed under this head. The S.P.G. College, Trichinopoly, the grant for which had been temporarily suspended, complied with the fee rules and received aid during the year. Several institutions improved their teaching staff on the recommendations made by the Department from time to time, and thus claimed increased grants. These circumstances explain the increase.

Furniture and other special grants.—Managers of schools took advantage of the grants under these heads to provide their schools with suitable furniture, apparatus and libraries.

Scholarship grants.—The outlay under this grant was distributed as follows :—

		RS.
Scholarship grants in institutions for general education	...	4,115
Do. in Training schools for masters ...	...	4,287
Do. in Training schools for mistresses ...	...	6,758
Do. in Gymnastic schools	...	1,810
Do. in Technical schools	...	6,354
Total	...	23,324

Building grants.—In its order dated, 12th January 1891, No. 40, the Government was pleased to assign a special grant of Rs. 50,000 for building grants, and this enabled the Department to expend nearly Rs. 46,500 in excess of the actuals of 1889-90.

A list of schools which drew Rs. 1,000 and upwards is given below, grants to Aided and Board schools being distinguished :—

I.—Schools under Private management.

	RS.
American Evangelical Luthern Mission College, Guntúr ...	7,500
American Baptist Mission Training School, Bápatla	1,000
Venkatagiri Rajah's High School, Nellore	1,709
Free Church Mission Girls' Day School, Black Town	3,004
Free Church Mission Boarding School, Cassimode	8,394
St. Joseph's College, Cuddalore	4,333
Stane's Day School, Coimbatore	2,634
Roman Catholic High School, Coimbatore	1,277
Town High School, Kumbakónam	4,200
Hindu College, Tinnevelly	1,494
Anglo-Vernacular Middle School, Pattamadai	1,140
Victoria Female Normal School, Tuticorin	2,070
St. Ann's Girls' School, Mangalore	2,500
Ganapathi Temple Street School, Mangalore	1,000

II.—Schools managed by Local Boards and Municipal Councils.

	RS.
Municipal High School, Anantapur	4,000
Board Middle School, Pollâchi	1,600
Brennen College, Tellicherry	1,000

Boarding grants.—Rs. 9,641 were expended on feeding and clothing grants to European schools, against Rs. 10,093 in the preceding year, the budget allotment being Rs. 10,000.

GENERAL STATISTICS.

The following is a list of schools which obtained boarding grants :—

	RS.
Civil Male Orphan Asylum, Madras	900
St. Patrick's Orphanage, Adyar	2,847
Civil Female Orphan Asylum, Madras	435
St. Mary's Orphanage, Madras	2,508
Madras Industrial School	1,013
European Convent Girls' School, Coimbatore	517
St. Joseph's Institution, Wellington	506
Nazareth Convent Girls' School, Ootacamund	324
Vestry School, Trichinopoly	591
Total ...	9,641

Grants to eleemosynary schools and miscellaneous grants.—This item is made up of Rs. 270, salary-grants to Advanced Sanskrit schools ; Rs. 620, salary-grants to the Eurasian schools at Whitefield and Sausmond ; Rs. 256, furniture grants to the above schools ; and the balance, grants to eleemosynary schools.

Payments by results.—Rs. 28,906, in excess of the actuals of 1889-90, were expended under this head. This is chiefly due to the payment of arrears of the preceding year. Full information will appear in the last chapter regarding the working of the results system. The maximum rate of grants was sanctioned to all classes of schools.

The following shows the distribution of the grant of Rs. 1,18,214 paid to Local Boards :—

	RS.
Salary grants, general, including net cost of the Chittoor High school.	25,512
Salary and scholarship grants to Training and Technical schools ...	36,529
Grants for furniture and other special objects	2,508
Building grants	5,510
Results grants	48,155
Total ...	1,18,214

Board schools have developed largely during the past few years in number as also in standard. The increase of Rs. 32,158 in the grants is due to this circumstance, and also to the fact that, as repeatedly pointed out, Boards apply for and draw Provincial grants very irregularly and in arrears. In the shape of results grants alone Local Boards received Rs. 48,155, of which Rs. 6,448 were the arrears of 1889-90.

The distribution of grants to Municipal funds is furnished below :—

	RS.
Salary grants to ordinary schools	13,527
Do. to technical schools	115
Net cost of colleges and schools	8,051
Scholarship grants	1,748
Furniture grants	282
Lump grants	500
Results grants	3,018
Building grants	5,347
Total ...	32,588

II.—CONTROLLING AGENCIES.

Direction.

26. From the 1st to the 15th April, when Mr. Grigg was on privilege leave, and from the 9th July to the 26th October, when he was employed as Acting British Resident in Travancore and Cochin, I had charge of the office of Director. Heavy work at head-quarters prevented us from making any lengthened tours of inspection.

Inspectors.

27. The Western Circle remained in charge of Mr. Marsden throughout the year. Changes occurred in each of the other circles. From the 2nd July to the 9th August, M.R.Ry. C. Nagoji Rao Pantulu was on privilege leave, when Mr. E. P. Metcalfe had charge of the office of Inspector, Northern Circle. Dr. Bradshaw proceeded on leave on the 6th May and Mr. Stuart had charge of the Central Circle till the 9th August, when Mr. Bickle relieved him. Mr. Logan returned from furlough and took charge of the Southern Circle from Mr. Bickle on the 31st July. The work done by the permanent and acting officers is summarized in the following table:—

Circles.	Inspecting officers.	Number of institutions examined.							Number of pupils examined.	Number of days spent in		Number of days spent on circuit.	Number of miles travelled.
		Arts colleges.	High schools.	Middle schools.	Primary schools.	Girls' schools.	Special schools.	Total.		Examining schools.	Other work.		
Northern ...	M.R.Ry. C. Nagoji Rao Pantulu ... / E. P. Metcalfe, Esq.	6	18	14	171	7	11	227	9,631	99	238	160	2,427
Central ...	J. Bradshaw, Esq. ... ... / G. H. Stuart, Esq. ... ... / G. Bickle, Esq.	..	15	8	4	5	18	50	3,425	70	259	149	7,765
Southern ...	G. Bickle, Esq. ... ... / T. T. Logan, Esq.	8	23	2	8	...	21	62	7,281	92	252	211	6,865
Western ...	E. Marsden, Esq.	5	10	28	117	..	5	165	5,420	91	152	176	4,222

The officers in charge of the Southern Circle spent, on the whole, the largest number of days on circuit, but the Inspector of Schools, Northern Circle, examined the largest number of schools and spent the largest number of days in examining schools.

Inspectresses.

28. The Secretary of State was pleased to accord his sanction in September to the proposal submitted by me to revise the scale of pay of the two Inspectresses of Girls' Schools. Mrs. Brander, the Senior Inspectress, proceeded on furlough for one year on the 15th July and Miss Govindurajulu, the Sub-Assistant Inspectress of Girls' Schools, Second Range, acted for her. Miss Carr examined a larger number of schools and pupils than Mrs. Brander and Miss Govindurajulu taken together and was on circuit for 215 days, a longer period than any Inspector.

Assistant Inspectors.

29. On the death of M.R.Ry. P. Vedantachariyar, M.R.Ry. P. Venkataramayya, a Sub-Assistant Inspector of considerable experience and Acting Assistant Inspector in the Fifth Division, was permanently promoted to the Assistant Inspectorate. M.R.Ry. P. Vijiaranga Mudaliyar, Assistant Inspector, Fourth Division, retired on pension after a long and valuable service of 39 years. Sub-Assistant D. S. Kistnaswami Aiyar, B.A., was appointed in his place. Several acting appointments were made during the absence on leave, or other duty, of some of the Assistant Inspectors.

From the particulars given in the margin, it will be observed that, as in the previous year, the Assistant Inspector, Third Division, examined the largest number of schools, and the Assistant Inspector, Fourth Division, the largest number of pupils. The Assistant Inspectors, Second and Eighth Divisions, were on circuit for 172 and 161 days, respectively, while the other Assistants, excepting the Assistant Inspector of Schools, Fourth Division, who has the city of Madras within his jurisdiction, spent more than 200 days away from head-quarters.

Divisions.	Schools.	Pupils.	Days on circuit.
First Division	180	6,647	266
Second do.	128	6,557	172
Third do.	284	8,656	250
Fourth do.	218	10,163	174
Fifth do.	181	7,179	214
Sixth do.	223	6,590	259
Seventh do.	150	6,626	264
Eighth do.	114	6,552	161
Ninth do.	146	6,741	206

CONTROLLING AGENCIES.

Sub-Assistant Inspectors.

30. A Muhammadan Sub-Assistant was employed in each circle, and 51 Sub-Assistants were in charge of boys' schools other than Muhammadan schools. M.R.Ry. Varamuniswamayya, of Nandyál, left the Department in January, and M.R.Ry. C. Ramalinga Aiyar, of the Chingleput Range, was removed from the list of Sub-Assistants in December on account of certain irregularities in his work. M.R.Ry. P. O. Pothan, of Calicut, against whom criminal proceedings were instituted, continued under suspension till the close of the year. Special Sub-Assistants were temporarily entertained in the Kumbakónam and Calicut Ranges towards the close of the year to complete the inspection work. In Appendix A the usual particulars regarding the work done by this agency are given. Excluding the Muhammadan Sub-Assistants, it will be observed that the Sub-Assistants examined on an average a larger number of schools (249) and pupils (6,160) than in the previous year, travelled a longer distance (2,250 miles), and spent a greater number of days (209) on circuit. The heavy work in connection with the Primary examination, the rapidly increasing number of schools and pupils to be examined for grant or for improvement, and the work connected with Board Schools, which are virtually administered by the Sub-Assistants, point to the necessity of strengthening the Sub-Assistant Inspectorate, if efficient control over Primary education is to be maintained. In Bengal, the average duration of the tours of Deputy Inspectors during 1889-90 was only 164 days, while the minimum number of days to be spent on tour is fixed at 150. When compared with these figures, those relating to Madras seem to bear out the inference that the Sub-Assistants in this Presidency are, as a class, overworked.

Sub-Assistant Inspectresses and Inspectors of Girls' Schools.

31. Five Sub-Assistants were in charge of girls' schools as in 1889-90, but on account of the extensive area of the first range, the girls' schools in the Ceded Districts were examined by the Sub-Assistant Inspectors of boys' schools, the Government having negatived the Director's proposal to employ an additional Sub-Assistant and thus reduce the first and second ranges to a workable size. The only change that need be recorded was the appointment of Miss Harris, Headmistress, Government Girls' school, Vellore, to act for Miss Govindurajulu. A fair amount of work was done by the permanent and the acting officers as will be seen from the statistics embodied in Appendix A.

Inspecting Schoolmasters.

Districts.	1889-90	1890-91
Ganjam	8	10
Vizagapatam	9	9
Godávari	13	13
Kistna	14	15
Kurnool	4	4
Nellore	6	7
Madras	3	3

Cuddapah	6	7
North Arcot	8	9
South Arcot	9	9
Coimbatore	11	11
Nílgiris	1	1
Salem	9	12
Tanjore	14	15
Trichinopoly	8	8
Madura	13	14
Tinnevelly	11	13
Malabar	22	22
South Canara	6	6
Total ...	192	207

32. There was a net addition of 15 to the number of Inspecting Schoolmasters as will be seen from the distribution given in the margin, 11 out of 22 districts showing an increased staff. One hundred and sixty-seven were paid from Local and 39 from Municipal Funds, while the Muhammadan Inspecting Schoolmaster of Madras was borne on the Provincial establishment. Proposals to reorganize this class of officers and a revised code to regulate their work were submitted to Government towards the close of the year. The recommendations, if approved, will have the effect of raising their qualifications, and, by holding out better prospects of promotion, will urge them to greater zeal and activity. Their work during the year, as gauged by the number of days spent on circuit, the distance travelled, and the number of new schools opened, was very fair.

Superintendents of Hill Schools, Agency Tracts.

33. To the four Superintendents of Hill Schools in the Agency Tracts of the Northern Circars, two additions were proposed, a Superintendent for the Parlákimedi Agency and an Assistant Superintendent for the Godávari Agency. These new appointments were not sanctioned before the close of the year. The salary of one of the Superintendents in the Vizagapatam Agency was raised with a view to secure the services

of a competent officer. The four Superintendents employed during 1890-91 did fair work on the whole, having been on tour for not less than 215 days. The Ganjam and the Vizagapatam Superintendents opened not less than 55 schools, which is very satisfactory. The special code framed for the guidance of these officers appears to work with success.

Superintendents of Schools.

34. In consequence of Municipalities gradually employing full-time Inspecting Schoolmasters, the number of Superintendents of schools has fallen from eight to four. A few Municipalities, which maintain a considerable number of schools of their own, have been advised to employ supervisors for the efficient management of their schools, and aid was promised on their behalf.

III.—UNIVERSITY EDUCATION.

Convocation for conferring degrees.

35. The Convocation for conferring degrees was held on the 19th March when 301 candidates were admitted to degrees—244 in Arts, 40 in Law, 12 in Medicine, two in Engineering, and three in Teaching. Two women were admitted to the degree of Bachelor of Arts, two to that of Licentiate in Medicine and Surgery, and one to that of Bachelor of Medicine and Master in Surgery. A comparison with the figures of the previous year shows an increase in the number of degrees conferred under each of the faculties save that of Engineering. The following tabular statement, exhibiting the number of degrees conferred during the past five years, is chiefly noteworthy as showing the steady increase (with the exception of the year 1889) in the number of young men availing themselves of a liberal education. In the professional faculties no such steady growth is perceptible. The greater uniformity in the results of the B.L. degree examination during recent years is a very satisfactory feature, which is doubtless due, in some measure, to the better arrangements for tuition which have, for some time, been in force in the Presidency College :—

Changes in the By-laws.

36. The year 1890-91 was one of decidedly greater activity than its predecessor. There have been seven meetings of the Senate, 14 of the Syndicate, two of the Faculty of Medicine, and three of the Faculty of Engineering. The rules of affiliation were recast so as to empower the Syndicate to refuse to affiliate unless satisfied that the institution has sufficient accommodation and proper sanitary arrangements, an adequate supply of furniture and appliances, an efficient staff, and a satisfactory financial basis. Hitherto, First-grade Arts Colleges have been affiliated irrespective of the particular branches of the B.A. degree examination in which they were prepared to furnish instruction. In future they will be affiliated only in respect of the branches they show themselves competent to teach. None of the colleges has as yet been affiliated in all the sub-divisions of all the branches, most of them being content to afford instruction in two or three branches only. The new rules, if judiciously worked, will tend to raise the standard of efficiency in First-grade Arts Colleges.

The committee appointed to consider the expediency of changing the dates of the Matriculation, F.A. and B.A. examinations had not submitted its report when

UNIVERSITY EDUCATION.

the year closed. Important changes in the by-laws regulating the Matriculation and F.A. examinations were under the consideration of the Senate, but had not been finally adopted at the end of the year. They will be referred to more appropriately in the report for 1891-92. The Senate had also under consideration the rules sanctioned by Government regarding the recognition of public institutions, it being in the opinion of many highly expedient that the University should accept as recognized for the purpose of the Matriculation examination such schools only as have been recognized by this Department as Upper Secondary schools under the Madras Educational Rules.

It was stated in last report that the Faculty of Medicine was engaged at the close of the year 1889-90 in revising the regulations for the examinations in Medicine. During the year under report the recommendations of the Faculty have received the approval of the Senate and the sanction of the Governor in Council. In reviewing the report of the Medical College for 1889-90, reference was made to the desirability of raising the standard of general attainments possessed by those seeking admission to the L.M.S. classes of the college. Government referred the question to the University, but the Faculty of Medicine had not sent in any report before the end of the year.

The by-laws relating to the examination in Engineering, after having been thoroughly revised by the Faculty and approved by the Senate, have also been sanctioned. The word "Civil" has been omitted from the designation of the examination and of the corresponding degree. In place of one examination, two will be held in future—a First examination and a Degree examination. To the former will be admitted students who, after passing the First Examination in Arts, have completed a course of study for eighteen months in an authorized College of Engineering, and to the latter will be admitted those who have completed a further period of study for one year in an authorized College of Engineering, after passing the First Examination in Engineering. The Degree examination will have two branches, a Civil and a Mechanical, and a candidate may proceed to his degree in either branch or in both branches. But before he obtains his degree, a candidate who has passed the examination must spend not less than one year on engineering works, if he has taken up the Civil branch, and in an engineering workshop, if he has taken up the Mechanical branch. The revised by-laws will come into operation in 1894 as regards the First examination, and in 1895 as regards the Degree examination.

Owing to the increase in the work of the University, the Syndicate towards the close of the official year laid before the Senate certain proposals with regard to the office of Registrar, the chief of which is that the holder of the office should in future be required to devote his whole time to the work of the University. The revised by-laws had not, however, received the sanction of Government by the close of the year.

University Fee Fund.

37. The University Fee Fund continued in a flourishing condition. Fees and other receipts amounted to Rs. 1,89,896 against Rs. 1,85,850 in the previous year, while the charges fell from Rs. 1,56,071 to Rs. 1,54,603, leaving a balance of Rs. 35,293 in favour of the fund. On the 31st March last, the University had a cash balance of Rs. 39,554 besides Rs. 1,85,000 invested in Government securities.

University Endowments.

38. An addition of Rs. 1,230 was made to the endowments of the University by the Balfour Memorial Committee, for the purpose of founding an annual gold medal in memory of the late Surgeon-General Balfour. The medal is to be awarded to the female candidate who, in passing the Second L.M.S. examination, obtains the highest number of marks in midwifery and the diseases of women and children.

Affiliated institutions.

39. Two institutions were affiliated to the University during the year up to the F.A. standard, viz., the Brennen High school, managed by the Tellicherry Municipality, and the Wardlaw Institution, Bellary, belonging to the London Mission. On the other hand, the S.P.G. College, Vepery, was closed in December last. There was no change in the number of colleges affiliated up to the B.A. standard.

University examinations.

40. There was an improvement in the aggregate number examined and passed at the various University examinations. The increase of nearly 20 per cent. in the number passed as against one per cent. under examinees is satisfactory, and the proportion of passed to examinees, 29 per cent., compares favourably with that of the previous two years, though it is still below the figure reached in 1886-87, viz., 36·7 per cent.

The distribution of candidates, according to the classes of institutions, will be found in the following summary. The figures relating to the Matriculation examination have been omitted, as they will appear separately in the next chapter.

As in 1890, 10 candidates presented themselves for the M.A. degree examination, but six passed against three. As eight scholarships are now awarded annually to selected graduates to enable them to continue their studies for the degree of Master of Arts, a larger number will probably proceed to this degree in future. There was an appreciable advance in the number of candidates entered for the Language Branch as well as for the Optional Branches of the B.A. degree examination, and also in the proportion that passed. In the Language Branch, the percentage passed rose from 57·2 to 65·5. It is encouraging to note, as per margin, that there has been a steady improvement in the Language examination since 1887-88. This must partly be attributed to the larger employment of Europeans on the staff of colleges. The percentage under Optional Branches, though an improvement on the figures of 1889-90, is still below the percentages reached during the previous three years. For the F.A. examination, a few more candidates than in the year preceding appeared, and 32·5 per cent. of the examinees were successful against 17·8 per cent.

For the M.L. degree, two candidates appeared and one of them passed. At the B.L. degree examination, 30 per cent. of the candidates were successful against

UNIVERSITY EDUCATION.

29 per cent. in 1889-90. The Presidency College contributed 123 of the examinees and 37 of those who passed, the Trivandrum College contributing five to the former and two to the latter.

The results of the Medical examinations, taken as a whole, were even less favourable than those of the previous year. Only one passed the Second M.B. and C.M. examination and 10 the First L.M.S. examination, out of five and 67 candidates respectively. The failure in the L.M.S. examination is partly the result of the low general attainments of the students at the time of admission—a defect which will be remedied when the First Arts examination takes the place of the Matriculation examination as the general education test.

The results of the examination for the degree of B.C.E. were an almost utter failure. Of 10 candidates who appeared, only one passed.

Out of 19 who entered for the L.T. degree examination, only seven passed, the failures being chiefly in the practical side of the examination.

Relative success of the different classes of institutions at the Arts examinations.

41. For the Language Branch of the B.A. degree examination, the Madras Government Colleges presented 23 per cent. of the total number of candidates against 32 per cent. in 1889-90, and passed 23 per cent. against 36 per cent. All the three colleges shared in the decrease. The Government Colleges in Native States presented and passed 12 per cent. against 13 per cent. On the other hand, Aided Colleges contributed 47 per cent. of the examinees and 54 per cent. of the passed, the corresponding figures for the previous year being 42 and 43 per cent. respectively. This increase is accounted for partly by the transfer during the year of the S.P.G. College, Trichinopoly, and the A.E.L.M. College, Guntúr, from the unaided to the aided list. It is noteworthy that, while 17 per cent. of the examinees were the so-called private students, consisting mostly of candidates that failed in the previous years, only nine per cent. of the passed belonged to this category. The results of the Optional Branches, however, present a striking contrast. No less than 33 per cent. of the examinees and 28 per cent. of those who passed were composed of private students. I doubt whether any important inference can be drawn from this unexpected difference, which appears to me to point to a laxness in the definition of the term "private student" by the University authorities. Colleges under both public and private management presented and passed a smaller proportion of students than in 1890. The average percentage in the Language Branch was 66; while Madras Government Colleges passed 66 per cent., Aided Colleges passed 76 per cent. of those sent up by them. In the examination in the Optional Branches, however, Government institutions passed 66 per cent. of their students and Aided Colleges 49·7 per cent., while the average was 52 per cent.

For the First Examination in Arts, fewer candidates were sent up by Government and Unaided Colleges, but there was a marked increase in the number of private students. In the percentage of passed students, however, Madras Government Colleges and Government Colleges in Native States passed over 38 per cent. of the students they sent up, the average for the Presidency being 32 per cent. Aided Colleges passed between 35 and 36 per cent. of their students, and only 20 per cent. of the private students found their way into the pass list.

(a) ARTS COLLEGES.

M.A. degree examination.

42. Ten candidates appeared for the M.A. degree examination, and six against three in the previous year were successful, two in Mathematics and Natural Philosophy, two in History, one in English and one in Sanskrit. The number of graduates seeking to go beyond the B.A standard has hitherto been very small, affording a marked contrast to the state of things in Bengal. Until quite recently there have existed various hindrances in the way of young men prosecuting their studies to a higher standard. On the one hand, the 25 years' rule made such of them as desired to enter Govern-

ment service take steps to obtain an appointment as early as possible after gaining the B.A. degree. On the other hand, the expense of continuing to study for two or three years more was too great for any but a favoured few, and even they found that none of the colleges had the means of carrying on study to the M.A. standard. The relaxation lately made in the working of the 25 years' rule has removed the first of those hindrances. The other obstacles have been lessened by the award of scholarships, and by the better equipment of laboratories of Physics, Chemistry, and Biology in some of the First-grade Colleges. None of the colleges have as yet been able to make special arrangements of a satisfactory character for higher instruction in Language, Mathematics, Philosophy, or History.

43. The results of the last B.A. degree examination are summarized in the margin. Compared with those of the two previous years, they present several encouraging features. There was a very marked advance from 60 per cent. in 1888-89 and 59 per cent. in 1889-90 to nearly 74 per cent. in the proportion of those who passed in English. Little importance need be attached to the fall in the percentage of successful candidates in the second language, as the utmost difficulty is experienced in securing anything approaching to uniformity from year to year among so many languages. As regards the Optional Branches, with the exception of two of the sub-divisions of Natural Science, the largest proportion of successful candidates (64 per cent.) was in History. The results in Mental and Moral Science are fairly uniform from year to year. In Mathematics, Physics, and Chemistry, the results approximated to one another more closely than in the previous years, but the percentages were low. Physics, Mental and Moral Science, and History continued to attract a larger number of students than Mathematics.

B.A. degree examination.

Subjects.	Percentage passed in 1888-89.	1889-90.			1890-91

Branch V— History	53	85	40	47	104	67	64·4

44. In the margin will be found the number and percentage of passed candidates at the First Examination in Arts for the past two years. Improvement will be observed in all subjects except History. The proportion of successful candidates in English increased in this as in the B.A. examination. Nearly two-thirds of the candidates passed in Mathematics. The changes recently introduced into the regulations for the Matriculation and F.A. examinations will, I feel sure, lead to the raising of the level of attainments among undergraduates of the F.A. standard, and, as a consequence, to a higher class of work being made possible in First-grade colleges.

First Examination in Arts.

Classes of the community represented at the B.A. and F.A. examinations.

45. The different sections of the population were represented as below at the B.A. and the F.A. examinations :—

UNIVERSITY EDUCATION.

Classes of community	B A. examination, Language Branch				B A examination, Optional Branch				F A examination.			
	Number examined.	Number passed	Percentage of passed to examined.	Total percentage passed from each class	Number examined	Number passed	Percentage of passed to examined.	Total percentage passed from each class	Number examined	Number passed.	Percentage of passed to examined	Total percentage passed from each class
Brahmans	388	248	63 9	69 1	358	183	51 1	71 2	1,408	480	34 1	71 9
Other Hindus	96	58	60 4	16 1	85	49	57 6	19 1	427	112	26 2	16 8
Muhammadans ...	8	5	62 5	1 4	3	2	66 6	8	28	7	25 0	1 0
Native Christians . .	52	45	86 5	12 5	48	20	41·6	7 8	145	53	36 5	7 9
East Indians ...	1	1	100	3	1			...	27	13	48 1	1 9
Europeans	3	2	66 6	6	2	2	100	·8	15	3	20 0	·5
Others	..		...	..	1	1	100	4	2		...	..
Total ...	548	359	65 5		498	257	51 6		2,052	668	32 5	.

Comparing this with the table in the last report, it will be observed that, at the Language Branch of the B.A. degree examination, every class of the community passed a larger number of candidates, Muhammadans and Native Christians showing a satisfactory advance. At the examination in the Optional Branches, East Indians were unrepresented in the pass list, and fewer non-Brahman Hindus passed, but the other sections showed an increase. Only 20 Native Christians passed out of 48 registered, though, in the Language examination, 86·5 per cent. of Native Christian examinees were successful, against 63·9 under Brahmans, and 65·5 the average for the Presidency.

At the F.A. examination, East Indians took the lead, 48·1 per cent. of the examinees having passed. Native Christians and Brahmans were next in order, as in the previous year. Seven out of 28 Muhammadans passed. This low proportion is to be regretted, although it is a slight improvement on the figures of previous years. In 1888-89 six passed out of 33 examined, the corresponding figures for 1889-90 being five and 31.

Number and strength of Arts Colleges

46. Two Second-grade colleges sprung into existence during the year, viz., the Brennen College, Tellicherry, and the Wardlaw Institution, Bellary. The Pithápuram Rajah's College, Cocanada, the College department of which had been temporarily closed, was resuscitated. The S.P.G. College, Vepery, was reduced to the rank of a Middle School. Returns have, for the first time, been obtained from the Pasumalai College, Madura, which is an unaided institution. Thus 35 Arts Colleges are borne on the Departmental returns against 32 in 1889-90. Detailed statistics of colleges are given in appendix B and subsidiary form No. I.

The number of First-grade colleges remained the same as in the previous year, viz., 11; but the number of students reading for the Degree Examination in Arts rose from 713 to 841; 11 of the latter were preparing for the M.A. examination. The increase is accounted for by the comparatively better results of the F.A. examination of December 1890. The number of F.A. students in the First-grade colleges, however, fell from 1,428 to 1,395, the decrease being shared by seven out of 11 colleges. The restrictions observed by some of the First-grade colleges in the matter of new admissions, and the opening of additional Second-grade colleges, are probably the chief causes of the fall.

In the Second-grade colleges, 969 students were reading for the F.A. examination against 902 in the previous year. This increase must be reckoned very small, considering that not less than 29 of the additional students belonged to the Pasumalai College, which furnished no returns in previous years. In nine of the colleges there was a fall in numbers.

Taking all the Arts Colleges together and omitting the figures of the Pasumalai College, it will be observed that while the number of B.A. students rose by 20 per cent. during the last four years, that of F.A. students increased by two per cent. only. The figures for the past five years as recorded in the margin point to the conclusion that the demand for collegiate education has very nearly reached its maximum limit in the present circumstances and needs of Southern India. It remains to be seen whether the youthful intelligence of the Presidency will be turned in larger measure towards commerce and industry, and, in general, towards the development of the material resources of the country. I do not think that the raising of the college fees at the beginning of 1887 has had much to do in keeping youths in growing numbers from continuing their education beyond the Matriculation course. Nor can any influence in this direction be ascribed to the Upper Secondary Examination.

1886-87	2,290
1887-88	2,295
1888-89	2,322
1889-90	2,330
1890-91	2,335

Of the B.A. students 262, or 32 per cent., were reading in the three Government Colleges, 25, or 3 per cent., in the only unaided college, the Maharajah's College, Vizianagrum, and the rest in the seven aided colleges. The Madras Christian College had 309 students—a larger number than is to be found in the three Government Colleges taken together.

It will be seen from the distribution of the college students according to the great classes of the community that Muhammadans and Brahmans contributed, respectively, eight and 165 students more, and Europeans and Eurasians and Native Christians two and nine less than in 1889-90. As in the previous year, 23 per cent. of the students belonged to the poorer classes, that is, were the children of parents having an annual income of less than 200 Rupees. A perusal of the figures in subsidiary table 1 will show how unequally these are spread over the different classes of institutions; Government, Board, Aided, and Unaided Colleges having respectively contained 122, 51, 524, and 64 poor students. As the Madras Christian College and the Presidency College will in future award no new free-scholarships, the proportion of such students may yet further decrease. But, as has been remarked in former reports, much reliance cannot be placed on the classification according to wealth, and inferences of a very general nature only should be drawn from it. Viewed according to the occupation of parents or guardians, the increase in the number of students will be seen to have come mostly from the official and the landholding classes.

First-grade colleges.

UNIVERSITY EDUCATION

The expenditure on Government colleges aggregated Rs. 2,06,626 and that on aided colleges Rs. 2,06,445; but a portion of the outlay on aided colleges is merely nominal, certain professors and teachers belonging to the Roman Catholic Church not receiving fixed salaries, though for Departmental purposes they are assumed to receive them. The net cost to Government on its colleges was Rs. 1,66,898, while the aided colleges received by way of grants Rs. 57,444. The average cost of educating each student varied widely in Government and other colleges. This is to be expected, seeing that it depends on the cost of the staff employed and the average number on the rolls—two very fluctuating items. Taking all the first-grade colleges together, it is observed that each student cost over Rs. 200 a year, while the fee paid by him amounted to Rs. 57, which is 28 per cent. of the cost.

Including seven M.A. scholars, the Presidency College was 335 strong against 310 on the 31st March 1890. A Latin teacher was temporarily appointed, and 13 students have already selected Latin for their second language. An extra junior assistant had also to be temporarily employed for the instruction of the F.A. classes. The success obtained by the college at the B.A. degree examination was creditable, except in Mathematics. At the F.A. examination, 41·3 per cent. passed. Though small, this is above the average for the Presidency. Proposals were made for the affiliation of the college in the three remaining sub-divisions of the Natural Science branch, viz., Botany, Animal Physiology and Geology. When these proposals are sanctioned, the college will be in a position to afford instruction in all the Optional subjects of the B.A. curriculum. The calendar, the preparation of which had been so long delayed, was almost ready for issue when the year closed. The fee revenue covered a sixth of the outlay.

There was a slight decline in the attendance of the Kumbakónam College. Nearly 90 per cent. of the students belonged to the Tanjore District. The results of the University examinations were fair. The average cost per student was Rs. 186-10-5, that is, below the average for the Presidency. Nearly a third of the expenditure was met from fees.

The Rajahmundry College sustained again a marked loss in numbers—falling from 120 to 97. At the F.A. examination, 36·1 per cent. passed, and at the Language branch of the B.A. examination 50 per cent. passed. All the students that appeared for the Optional branches of the Degree examination met with success. The cost of educating each student was as high as Rs. 405-13-11, and fees covered only 13 per cent. of the charges.

A slight increase took place in the strength of the Madras Christian College. At the Language branch of the B.A. degree examination, over three-fourths of the candidates passed. The results of the B.A. Optional branch and the F.A. examinations were better than in the year preceding, though less than 50 per cent. of the examinees were successful. It is very satisfactory to note that the Retiring Fund constituted for the benefit of the European Professors has been placed on a financially firm basis. The average cost of educating each student was Rs. 114-11-10 only, and over 50 per cent. of the expenditure was borne from fees.

The Pachaiyappa's College did well at the University examinations. The strength of the junior section of the college decreased. The cost of educating each student was Rs. 200-0-1, and 26 per cent. of the total expenditure was met from fees.

The attendance of the St. Peter's College, Tanjore, showed a further decrease, and the F.A. results were again unfavourable. But at the B.A. degree examination 57 and 83 per cent., respectively, of the candidates for the Language and Optional branches were successful.

St. Joseph's College, Trichinopoly, increased in attendance in both the B.A. and the F.A. classes; but except in the Language branch, the results of the University examinations were not so satisfactory as might be expected.

The S.P.G. College, Trichinopoly, has been making progress, and has again been brought on the aided list. The results of the University examinations were, however, poor on the whole. The strength of the college rose from 161 to 193.

The Caldwell College, Tuticorin, contained only 14 students in the B.A. and 23 in the F.A. classes, and the average cost of educating each student was consequently as high as Rs. 311-4-3. The fee income just met a fifth of the charges. The results of the B.A. examination were very good, and those of the F.A. very fair.

A slight increase took place in the strength of the St. Aloysius' College, Mangalore. Seven and two candidates, respectively, were presented for the Language and Optional branches of the B.A. degree examination, and all of them passed. At the F.A. examination, 10 students passed out of 17 sent up. These results are very creditable to the staff. The cost per student, viz., Rs. 464-2-6, was, however, much higher than in any other institution.

The unaided college at Vizianagrum, maintained by the Maharajah's munificence, passed all the students sent up for the B.A. examination, and 35·5 per cent. of those sent up for the F.A. examination. About 26 per cent. of the expenditure was met from fees.

Second-grade colleges.

48. The following particulars relate to the second-grade colleges borne on the Departmental returns:—

Colleges.	Average number on the rolls.	Average daily attendance.	Expenditure in 1890-91. From Provincial Funds.	From Municipal Funds.	Fees.	Endowments and other sources.	Total.	Cost per pupil.	Percentage passed at the F.A. examination.

Total ...	964	842	33,222	1,658	50,961	32,722	1,18,563	122 15 10	...

Five of the colleges passed not less than one-half, and five passed between one-third and one-half of their students at the F.A. examination. The average cost of educating each student was Rs. 122-15-10, and in about one-half of the colleges, the cost was below the average. At the Doveton College it was as high as Rs. 618-2-0, owing to the small number on the rolls. The total expenditure of these colleges aggregated Rs. 1,18,563, of which fees covered nearly 43 per cent., and public funds 29 per cent.

UNIVERSITY EDUCATION.

(*b*) COLLEGES OR DEPARTMENTS OF COLLEGES FOR PROFESSIONAL TRAINING.

Law.

Law department, Presidency College.

49. The Law department of the Presidency College improved slightly in attendance, there being 294 students as against 282 in the year previous. The temporary staff referred to in the last report continued to be employed throughout the year. At the B.L. degree examination, 27 out of 66 passed, with one in the first class. The fee-revenue left a surplus of Rs. 10,264 in favour of Government after meeting all charges. The Secretary of State's sanction for the constitution of the Law College was received in the month of March, but the new Principal had not arrived when the official year closed.

Medicine.

Medical College.

50. Surgeon-Major J. H. Ritchie was appointed Principal on Brigade-Surgeon A. Porter's promotion to the rank of Deputy Surgeon-General. At the close of the official year under report, the College department was 162 strong against 136 on the 31st March 1890. Fourteen were reading for the M.B. and C.M. degree examination, 130 for the L.M.S. degree examination, and 18 were casual students, composed mostly of those, who, having failed in previous years, took extra courses in the subjects in which they were deficient. At the University examinations held in July 1890, two students appeared for and passed the Preliminary Scientific examination, and one the First M.B. and C.M. examination, while for the Second M.B. and C.M. examination, three appeared and one passed. Six students passed out of 13 that presented themselves for the Second L.M.S. examination. For the First L.M.S. examination, 38 went up, of whom only three passed. The Faculty of Medicine decided during the year to raise the qualification for admission to the L.M.S. examination from the Matriculation to the F.A. standard. The disastrous results of the First L.M.S. examination show how urgently needed this step was. Seven against five were female students; one of whom, Ayachee Ammal, passed the Second L.M.S. examination. She is the first native woman who has obtained this distinction. Two former female students, who had proceeded to England to prosecute their studies, obtained British diplomas. Including the military pay of the Principal and Professors, the total expenditure amounted to Rs. 76,715, of which fees and miscellaneous receipts covered Rs. 18,994.

Engineering.

College of Engineering.

51. Twelve students were on the rolls of the college on the 31st March last against 13 on the corresponding day in 1890, but the attendance was more representative of the various classes of the community than in the year previous. For the B.C.E. degree examination three students forming the senior division appeared, of whom only one passed. All of them, however, passed the final examination for Assistant Engineers conducted by the Board of Examiners. The results in Science, Mathematics and Engineering were not so good as they should have been. The revised syllabuses, sanctioned in December 1889, and the changes in the University by-laws appertaining to the examinations in Engineering, will, it is hoped, lead to improvement. The temporary workshop was carried on with success. Two Mechanical Engineers were undergoing practical training at the Perambore Workshops. Three Civil Engineers were employed on important public works under construction, and the reports received bear good testimony to their work and application. The total charges aggregated Rs. 15,202, of which fees and other receipts covered Rs. 2,207. The net cost of educating each student was high, namely, Rs. 1,083.

Teaching.

Teachers' College.

52. A European Vice-Principal was sanctioned for the Teachers' College by the Secretary of State and Mr. Denham, the gentleman appointed entered upon his duties in the month of October. The college was further reorganized in accordance with the scheme approved of

by Government. A fresh code of rules printed *in extenso* in the appendix to this report, was drawn up to regulate the work of the institution, and a Board of Examiners was appointed to conduct the written and the practical tests prescribed in the rules. The number of graduates under training rose from 17 to 21. Fifteen appeared for the L.T. degree examination, of whom 13 passed the theoretical examination, but of the 13, only seven passed the practical test. The results secured at the Science and Art examinations in Agriculture, Book-keeping, Commercial Correspondence and Mensuration were very good. The additions to the building have partly been completed. In August, two sheds were built in the college compound to serve as a Student Home, and 18 students are accommodated in them. The experiment has so far proved successful. The Teachers' Association, started in connection with the college, is also in a flourishing condition. The total expenditure during the year amounted to Rs. 8,754, and the net cost to Government of educating each student was Rs. 485 approximately.

Agriculture.

College of Agriculture.

53. In July 1890, Government passed final orders on the exhaustive report of the committee appointed towards the close of 1888 to report on the working of the Agricultural Department and the College of Agriculture. The retention of the college was decided on, but the school department was ordered to be closed. The sanction of the Secretary of State was received for the reorganization of the staff, but the question of employing a Veterinary Vice-Principal is still under consideration with reference to the committee's report above alluded to. The committee appointed under paragraph 13 of G.O., dated 4th July 1890, No. 515, Revenue, to consider the course of study, &c., for the College of Agriculture and the proposed Farm-schools began its sittings early in December, but had not submitted its report when the official year closed. The Director of Agriculture and Mr. Grigg were also engaged at the end of the year in maturing their views respecting the constitution, &c., of the Farm-schools.

The number on the rolls of the College department fell from 33 to 29, and only 13 districts were represented, Tanjore, Trichinopoly and Malabar contributing three students each. Brahmans constituted the majority of the students, but there were also one European and two Muhammadans. The results at the examinations held under the Science and Art Notification ranged from very fair to good, except in Mathematics, Mensuration and Surveying and Levelling. In Building Materials and Construction, there was a complete failure. The total expenditure aggregated Rs. 20,733, and the cost to Government of educating each student was Rs. 604.

IV.—SECONDARY EDUCATION.

(a) *Upper Secondary and Matriculation Examinations.*

The Upper Secondary Examination.

54. The Upper Secondary Examination, instituted under G.O., No. 351, Educational, dated 20th June 1889, was held for the first time in May 1890, the examination being conducted by a Board appointed for a term of three years. For the compulsory subjects 139 candidates registered their names, but only three passed in all the subjects. The high standard set up by the Board and the poor attainments of the candidates, many of whom had presumably tried their hands and failed at the Matriculation Examination, afford sufficient explanation of this failure. Time is needed to enable schools to come up to the requirements of the new examination. The course in schools teaching for the Matriculation Examination having now been extended to three years and the standard of that examination having been raised, less difficulty than heretofore will be experienced in opening classes to prepare for the Upper Secondary Examination. For several years, however, the number of candidates will be very few. Of the 16 candidates registered for single subjects, one passed in English, three in a Vernacular language and three in Translation.

SECONDARY EDUCATION.

Of the examinees, 62 were Brahmans and 63 non-Brahman Hindus. The high percentage of the latter is striking. Native Christians contributed two examinees and Muhammadans seven.

The Matriculation Examination.

55. For the Matriculation examination 7,002 candidates appeared, of whom 1,648 or 23·5 per cent. passed against 7,104 examined and 1,611 passed in the previous year. The trifling decline in the number of examinees may be connected with the large decline from 1,835 to 1,676 in the number of private students, which it is not easy to account for. In any case the fall in the total number can hardly be attributed to the Upper Secondary Examination, seeing that only from about half a dozen high schools did pupil candidates appear for the latter examination in May last.

From the summary given below, it will be observed that Government and Aided schools and schools in Native States presented and passed a larger number than in 1889-90, while Board and other schools are credited with a smaller number under both heads :—

General results.		Government schools.	Board schools.	Schools in Native States.	Aided schools.	Other schools.	Private students	Total.
Examined	1889-90 ...	138	392	921	2,222	1,596	1,835	7,104
	1890-91 ...	168	353	1,052	2,474	1,279	1,676	7,002
Passed—								
First class	1889-90 ...	7	19	25	81	31	3	166
	1890-91 ...	6	6	32	61	18	2	125
Second class	1889-90 ...	38	98	281	552	330	146	1,445
	1890-91 ...	40	96	313	632	305	137	1,523
Total ...	1889-90 ..	45	117	306	633	361	149	1,611
	1890-91 ..	46	102	345	693	323	139	1,648
Percentage passed ...	1889-90 ...	33	30	33	28	23	8	22 7
	1890-91 ..	27	29	33	28	25	8	23 5

Schools in Native States were the most successful, the percentage being 33, while Board schools passed 29, Aided schools 28 and Government schools 27 per cent. The small success of Government schools is due to the fact that only one out of 11 passed from the Madrasa-i-Azam, four out of 24 from the Calicut College, and five out of 19 from the Teachers' College.

In the margin will be found the percentage of success in the different branches of study during the past three years. As in 1888, no less than 47 per cent. passed in English against 32 per cent. in 1889. In Optional languages, there has been little change. I wish I could say that the high percentage of successful candidates was a sign that these languages were carefully studied. In Mathematics, a smaller proportion was successful. Only a little over a third of the candidates passed in general knowledge, which shows that the teaching of the subjects included under this head, viz., History, Geography, Physics and Chemistry is far from satisfactory. The proposals, which were before the Senate at the end of the year, involved the separation of Physics and Chemistry from History and Geography. This will tend to secure the better treatment of Physics and Chemistry, which hitherto have been taught in many schools by rote as a bit of book-work, and without the help of apparatus and experiments. This change and the requirements of the new Educational Rules will, I trust, bring about a decided improvement.

Subjects.	1888-89.	1889-90.	1890-91.
English	47	32	47
Optional language ...	74	78	77
Mathematics	54	64	59
General knowledge ...	48	50	37

The statistics in the margin show the classes of the community to which the candidates belonged. European candidates had the largest percentage of success, viz., 48, and East Indians ranked next with 35 per cent. The proportion of Native Christians who passed remained unchanged. Muhammadans and Brahmans enjoyed a larger percentage of success, though the figures are still below the limit reached in 1888-89. Of the successful candidates taken as a whole, Brahmans constituted 63 per cent., non-Brahman Hindus 21 per cent., Native Christians 9 per cent., and Muhammadans 2 per cent. These percentages are not in the order in which the several classes stand to the total population.

Classes.	1889-90.			1890-91.		
	Examined.	Passed.	Percentage.	Examined.	Passed.	Percentage.
Brahmans ...	4,166	994	24	4,207	1,044	25
Other Hindus ...	2,054	367	18	1,876	339	18
Muhammadans	178	28	16	178	33	19
Native Christians ...	509	145	28	519	144	28
Eurasians ...	116	48	41	133	47	35
Europeans ...	70	27	38	75	36	48
Others ...	11	2	18	14	5	33
Total ...	7,104	1,611	22·7	7,002	1,648	23·5

It may also be noted that 177 candidates passed in Latin, seven in Uriya, 17 in French, and 10 in Marathi, showing an improvement over the figures of the previous year.

It is also noteworthy that as many as 63 female candidates appeared for this examination and 37 passed, the corresponding figures of the previous year being 36 examined and 16 passed.

(b) *Public Upper Secondary or High Schools for Boys.*

Number and strength of Public Upper Secondary schools for boys.

56. At the close of the year there were 149 Public Upper Secondary schools for boys against 141 in 1889-90, and the strength of the Upper Secondary departments rose from 6,925 to 8,046. The increase in the percentage of attendance, 16, as compared with that in the number of schools, six, is very marked. Two Middle School Examinations were held during the year, and more students than usual were thus promoted from the Lower to the Upper Secondary departments. Moreover, on the promulgation of the Educational Rules, Heads of Schools were allowed to make class promotions without reference to the Director. These are the chief circumstances to which are due the large accession to the strength of the Upper Secondary departments and the fall in that of the Lower Secondary departments. Taking Upper and Lower Secondary departments together, the aggregate attendance was 19,432 against 19,068 in 1889-90 and 20,133 in 1888-89. The Primary departments attached to Upper Secondary schools were even more poorly attended than in the previous year.

Schools and scholars in each circle are given below :—

Circles.	1889-90.						1890-91.					
	Number of schools.	Strength on 31st March 1890.					Number of schools.	Strength on 31st March 1891.				
		Upper secondary.	Lower secondary.	Upper primary.	Lower primary.	Total.		Upper secondary.	Lower secondary.	Upper primary.	Lower primary.	Total.
Northern Circle ...	25	922	2,149	277	326	3,674	27	1,276	1,940	349	339	3,904
Central do. ...	46	2,120	4,734	1,004	1,775	9,633	46	2,391	3,913	953	1,550	8,810
Southern do. ...	53	2,910	3,338	516	773	8,137	58	3,241	4,230	476	686	8,633
Western do. ...	17	973	1,322	256	350	2,901	18	1,135	1,303	239	366	3,043
Total ..	141	6,925	12,143	2,053	3,224	24,345	149	8,046	11,386	2,017	2,941	24,390

The number of schools remained the same in the Central Circle, but rose in the others, while, as regards attendance in Upper Secondary classes, every circle shows

SECONDARY EDUCATION.

an advance. The average strength of Upper Secondary departments improved more or less in each circle, the Western Circle showing the highest and the Northern Circle the lowest average, as in 1889-90. The Western Circle has made the largest proportionate advance.

Distribution of Upper Secondary schools according to agency

57. The following summary shows the distribution of Upper Secondary schools according to the agency by which they were managed :—

Circles.	1889-90.				1890-91.			
	Government schools	Board schools.	Aided schools	Unaided schools	Government schools	Board schools.	Aided schools.	Unaided schools.
Northern Circle	...	6	14	5		5	14	8
Central do. . ,	2	7	27	10	2	6	30	8
Southern do.	..	10	20	23	...	13	21	24
Western do.	2	4	7	4	2	4	8	4
Total ...	4	27	68	42	4	28	73	44

As in 1889-90, only four Upper Secondary schools or departments were under the direct management of the Department, viz., the Madrasa-i-Azam, the Practising Branch of the Teachers' College, and the School departments of the Calicut and Mangalore Colleges. The number of Board schools rose again to 28, the lowering of the status of the Municipal High schools at Bimlipatam and Wálajápet and the Local Fund High School at Lálgudi being more than compensated for by the opening of Upper Secondary departments in the Municipal schools at Tirupatúr and Dindigul and in the Local Fund schools at Hosur and Krishnagiri. Of aided institutions, there were five more than in the previous year, and the number of unaided schools also rose from 42 to 44. The variations in the aided and unaided lists will be noticed in the next paragraph.

Upper Secondary schools according to districts.

58. In Appendix C. are shown detailed statistics of Upper Secondary schools. The annexed summary shows the number of such schools in each district and the total number that passed the Matriculation Examination from each district. The candidates that passed have been grouped according to the examination centres at which they appeared.

Districts.	1889-90.							1890-91.

Little or no improvement is perceptible either in the distribution of Upper Secondary schools among the districts, or in the direction of greater equality in the number of pupils who pass the Matriculation examination and thus qualify for entering upon a University course or for taking up appointments, public or private. In some districts, the number of young men prosecuting their education to this stage is utterly inadequate for carrying on the provincial and local administration, to say nothing of the work falling to be done by private enterprise. This is not as it should be. For, though the infusion of new blood into the administration of a district has its advantages, it can hardly be considered a satisfactory state of things if, year after year, it has to look to other districts for most of the educated men needed to carry on its work.

High Schools, Northern Circle.

59. *Ganjam.*—The three High schools in the Ganjam district had a stronger Upper Secondary department than on the 31st March 1890, having passed a larger number of students at the Middle School examinations. The results of the Matriculation examination show, however, that they were not in an efficient state. An improvement in the professional qualifications of the teachers is much needed.

SECONDARY EDUCATION.

Vizagapatam.—There were eight High schools in the Vizagapatam district at the close of the year, the Lord Ripon High school, Vizianagrum, making up for the loss of the Municipal High school, Bimlipatam, which was reduced to the Middle school standard on account of the small attendance. All the departments are credited with increased numbers. At the Matriculation examination, however, fewer pupils passed than in 1889.

Godávari.—On the death of the Rajah of Pithápuram, the Samasthanam school, which had been in a declining condition for some time, collapsed for want of support, and the Mahratta school, started in Rajahmundry as a speculation, died a natural death. Four new schools sprung into existence. The number of High schools in the Godávari district was thus raised from seven to nine, and the strength of the High departments from 223 to 390. At the Matriculation examination 66 candidates from the district were successful, 47 of them being pupils from the High Schools borne on the Departmental returns. The result is not in keeping with the number of High schools and the cost of their maintenance.

Kistna.—With the exception of the High School department of the American Mission College, Guntúr, the High schools in Kistna shared more or less in the general advance in the strength of High school classes. Thirty-six pupils from these High schools passed the Matriculation examination against 38 in the year previous. The Lower Secondary departments were weaker owing to the Middle department having been done away with in the American Mission college.

Kurnool.—The Upper Secondary departments of both the High schools in the Kurnool district had a larger attendance, but the number is still miserably low, being only 37 for the whole district. Only three pupils passed the Matriculation examination from these schools.

60. *Nellore.*—The Upper Secondary department of each of the three schools in the Nellore district was more numerously attended than in the preceding year. The results of the Matriculation examination were, on the whole, also an improvement. At the Middle School examination, however, fewer pupils passed; Nellore being, in this respect, unlike most other districts.

High Schools, Central Circle.

Madras.—In spite of the lowering of the standard of the S.P.G. High school, Vepery, and the Native High school, Mailapur, which reduced the number of High schools in Madras from 16 to 14, High school classes contained 1,235 pupils, or 137 more than on the 31st March 1890. The Lower departments, however, show diminished strength. Both at the Matriculation and at the Middle School examinations a larger number of pupils passed.

Chingleput.—The addition of the Hindu High school, Madurántakam, raised the number of schools in the Chingleput district from nine to 10, and the attendance in Upper Secondary departments from 250 to 296. Only 36 out of 151 pupils succeeded at the Matriculation examination against 55 out of 157 in 1889-90. The Mission schools did generally better than those under native management. The Middle School examination results were favourable.

Bellary.—The three High schools in the Bellary district did not make satisfactory progress during the year. Only a sixth of the pupils passed the Matriculation and Middle School examinations. Both Upper and Lower Secondary departments, especially the latter, fell in attendance.

Anantapur.—The Upper and Lower Secondary classes in the only High school in the Anantapur district had a smaller attendance than in the previous year. More pupils than in the previous year were presented at the Middle school and the Matriculation examinations, but fewer passed.

Cuddapah.—The Town and the Congress High schools, Madanapalle, were amalgamated, while an Upper Secondary department was opened in the American Mission school, Madanapalle. There were thus three High schools in the Cuddapah district. All the departments show a slight improvement in strength, but at the public examinations the results were far from favourable.

North Arcot.—For want of sufficient attendance, the Upper Secondary department of the Municipal school, Wálajápet, was closed. A High school was started

at Chittoor, and an Upper Secondary department was opened in the American Mission school, Punganúr. The number of High schools in North Arcot was thus raised from six to seven, the figure of 1888-89. The Upper Secondary, Upper Primary and Lower Primary departments increased in strength. The Middle school results were better, but those of the Matriculation examination were worse, than in the previous year.

South Arcot.—Although the Upper Secondary classes were somewhat stronger, the results at the Matriculation examination showed no improvement on those of 1889-90. There were five High schools in the South Arcot district as in the previous year.

High Schools, Southern Circle.

61. *Coimbatore.*—There were two additions to the list of High schools in the Coimbatore district, namely, the Town High school, Erode, and the Karatholuvu school, Amarávati. On the abolition of the Native High school, Satyamangalam, an Upper Secondary department was again formed in the London Mission school at that place. The number of High schools was, therefore, 10. The Upper Secondary departments increased by 42 pupils, but the Lower departments were weaker. At the public examinations, a larger number of pupils were successful, though the percentages passed were not so good as those of 1889.

Nílgiris.—The Breeks Memorial school, Ootacamund, contained 24 pupils in the Upper and Lower Secondary classes taken together, against 40 on the 31st March 1890. At the Matriculation examination, only one out of four passed, but at the Middle School examination 22 out of 29 passed.

Salem.—In the Salem district new Upper Secondary classes were formed in three schools—in the Municipal school, Tirupatúr, and in the Local Fund schools at Hosúr and Krishnagiri. On the other hand, the Native High school, Salem, disappeared from the list. There were thus seven High schools in the district. The attendance advanced under each stage of instruction, and the Matriculation results, so far as the schools were concerned, were also slightly better.

Tanjore.—Three High schools were closed during the year—one at Poraiyar, one at Shiyáli and one at Kumbakónam. An Unaided High school sprung up at Tiruvádi. The number of High schools in the Tanjore district was thus reduced from 19 to 17. The Upper and Lower Secondary classes contained, however, more pupils than in 1889-90. Nearly a third of the pupil-candidates passed the Matriculation, and 41 per cent. the Middle School examinations.

Trichinopoly.—In consequence of the re-opening of an Upper Secondary department in Nataraja Aiyar's school, Trichinopoly, the opening by the S.P.G. Mission of a separate school to prepare candidates for the Upper Secondary examination, and the reduction to the Middle School standard of the Board school, Lálgudi, the number of High schools in the Trichinopoly district changed from five to six. There was a considerable increase in the strength of both Upper and Lower Secondary departments. Nearly 40 per cent. of the pupils that appeared for the Matriculation and the Middle School examinations were successful, which bears witness to the generally efficient condition of the schools in the district.

Madura.—The place of the Hindu High school, Periyakulam, which was reduced in standard, was taken by the American Mission school, Pasumalai, which furnished returns for the first time; and that of the Hindu High school, Dindigul, which was closed, was taken by the Municipal High school in the same town. At the close of the year, the number of High schools in the Madura district remained, therefore, the same as in the previous year, namely, seven. There was a trifling improvement in the strength of Upper Secondary departments, but the Middle departments showed a marked decline. The results of the Matriculation examination were very poor.

Tinnevelly.—High school classes were opened in Gopalasamudram and Megnánapuram schools, which raised the number of High schools in the Tinnevelly district from eight to 10. The attendance in Upper Secondary classes also rose from 423 to 538. There was also an increase in the number passed at the Matriculation examination, but the percentage was lower, less than a fourth of the

SECONDARY EDUCATION

pupils having passed. Over 60 per cent., however, passed at the Middle School examination.

High Schools, Western Circle

62. *Malabar.*—During the year the Basel German Mission Christian School, Nittur, near Tellicherry, developed into a High school, thus raising the number of High schools in the district of Malabar to 14. All the departments, Upper Primary excepted, are credited with a larger attendance. The results of the Matriculation and the Middle School examinations were absolutely and relatively more favourable than those of 1889.

South Canara.—In three out of the four High schools in the district of South Canara, the Upper Secondary departments contained a larger number of pupils. The proportion of pupils that passed the Middle School examination, approximating to 70 per cent. is very satisfactory.

(c) *The Middle School Examination.*

The scheme of the Middle School Examination

63. In its order, No. 351, dated 20th June 1887, Government directed the revision of the Middle School Examination scheme, in view of that Examination ceasing to be a test for admission to the public service. As then constituted, the Middle School examination had two sides—a general side and a technical and industrial side. The general side was intended to test pupils who had completed the Lower Secondary course of general instruction and were about to enter on the Upper Secondary course, and grants for the Seventh standard under Chapter III of the Grant-in-Aid Code were also passed on the results of that examination. The technical and industrial side provided for elementary examinations in a large number of technical, commercial and industrial subjects. These examinations served several purposes. They tested candidates for inferior appointments in Science, Art, Industrial or Commercial schools or classes; they gauged the progress of students preparing for the higher technical examinations; and they determined the amount of results grants payable under Chapter IX of the Grant-in-Aid Code. This portion of the Middle School Examination scheme was accordingly incorporated with the scheme of the Higher Examinations in Science, Art, Industries and Commerce, which, in its amended form, received the sanction of Government in December last. The place of the Middle School examination on its general side was taken by the Lower Secondary examination, the scheme of which was sanctioned in January 1891. This examination will, in future, be conducted by Boards like the Primary School examination, and will be in the main a *vivâ voce* examination. In an appendix to this report will be found the scheme printed in full for general information.

The Middle School Examination, 1890.

64. Two Middle School examinations were held during the year—one in May and one in December. For the two examinations taken together, 15,034 candidates appeared, 5,769 in May and 9,265 in December, and 7,295 passed on the whole—a larger proportion than for several previous years.

The number examined and passed from the different classes of institutions is given in the margin. Schools in Native States secured a larger amount of success than schools in British territories, owing perhaps to their having presented selected students. It is noteworthy that the largest percentage passed was under "private students." This was probably due to a larger number than usual of well-prepared persons having determined to embrace the last opportunity afforded them of qualifying for the public service by securing a pass in the first class. Of the 1,064 who passed in the first class, as many as 655, or 62 per cent. were private candidates. In 1888 and 1889, the number passed in the first class from among private candidates was, respectively, 116 and 150 out of 567 and 517.

Schools.	Examined	Passed	Percentage
Madras Government and Board schools .	1,874	807	43
Other Government schools	1,874	941	50
Aided and Private schools	6,489	2,786	43
Private students ...	4,797	2,761	58
Total ...	15,034	7,295	48

Candidates.	Examined.		Passed.	
	Males.	Females.	Males.	Females.
Pupil candidates.	9,742	495	4,265	269
Private do.	4,746	51	2,741	20
Total ..	14,488	546	7,006	289

The figures relating to male and female candidates are summarized in the margin. An advance will be noticed in the number of girls examined ; but the number and the percentage of those who passed fell, especially under pupil candidates. This decline cannot be explained.

The classes of the community, to which the candidates belonged, are given below :—

Classes.	Examined.		Passed.		Percentage.	
	Males.	Females.	Males.	Females.	Males.	Females.
Europeans and Eurasians	480	300	227	155	47	52
Native Christians	1,086	225	569	121	52	54
Muhammadans	758	...	323	...	43	..
Brahmans	7,224	3	3,812	3	53	100
Other Hindus	4,931	15	2,070	9	42	60
Others	9	3	5	1	55	33
Total ...	14,488	546	7,006	289	48	53

The percentage passed was highest under Brahmans, who are closely followed by Native Christians. Muhammadans did better than non-Brahman Hindus. Three Brahman girls presented themselves for the examination and all met with success. One Parsi girl passed the December examination. No Muhammadan girl appeared for the examination either in May or in December.

The percentages passed in the Optional languages were high as usual, and do not present any striking variations.

An analysis of the results of the examinations in the Optional subjects, general and technical, is given below :—

Optional subjects.	Examined.		Passed.		Percentage.	
	Males.	Females.	Males.	Females.	Males.	Females.
Mathematics	14,674	9	10,992	4	74	44

English only	7	5	7	1	100	20
Persian only	3	..	3	...	100	.
Canarese only	1	.	...	...		

There was an appreciable improvement in the percentage passed in Mathematics, which may be taken to indicate that more attention was paid to the subject in schools. A larger number of technical and industrial subjects was brought up by candidates, and partly in consequence of the examination having been held twice, the number presented under many of the Optional branches was in excess of the figure of the preceding year.

(d) *Public Lower Secondary or Middle Schools for Boys.*

Number and strength of Public Lower Secondary or Middle schools for boys.

65. The following summary exhibits the number and strength of Public Lower Secondary or Middle schools for boys in each Circle during the past two years :—

Circles.	1889-90.			1890-91.		
	Number of schools.	Middle department.	Primary department.	Number of schools.	Middle department.	Primary department.
English.						
Northern Circle	65	1,847	1,556	64	1,556	1,846
Central do.	89	2,833	5,338	93	2,809	5,623
Southern do.	175	5,394	4,908	159	4,406	4,031
Western do.	43	1,637	1,909	41	1,396	1,930
Total ...	372	11,711	13,771	357	10,167	13,430
Vernacular.						
Northern Circle	21	87	850	26	111	894
Central do.	2	10	66	8	66	531
Southern do.	.	...	...	6	99	209
Western do.	16	135	1,103	10	49	493
Total ...	39	232	2,019	50	325	2,127
Grand Total ...	411	11,943	15,790	407	10,492	15,557

English schools continued to diminish in number, falling from 372 to 357. The Northern, Southern and Western Circles shared in the decrease, the Southern showing the largest diminution. The decline in attendance from 11,711 to 10,167 in the Middle departments is far more serious, and extended to all the Circles. The average strength of Middle departments was 28 against 31 in the previous year. Taking the Lower Secondary departments of High schools into account, it will be found that the total number of pupils in Lower Secondary departments of all boys' schools was 21,553 against 23,854 in 1889-90, and every district suffered more or

less in this respect. Whether the abolition of the Middle School examination as a passport for admission to the public service and the institution of the Primary School examination as a public service-test have had any thing to do, and, if so, how much, in bringing about this lowering of the attendance in Lower Secondary schools and departments, it is too early to say. The Middle School Examination having been held twice during the year, a larger number of students than usual passed out of the Lower Secondary stage of instruction. Vernacular Middle schools increased both in number and in attendance.

Distribution of Middle schools according to agency.

66. Arranged according to the agencies by which they were managed, Middle schools are classified as follows :—

	1889-90.		1890-91.	
English.	Schools.	Pupils in Middle departments.	Schools.	Pupils in Middle departments.
Managed by the Department	4	114	3	125
Do. by Municipal or Local Boards.	84	2,592	82	2,310
Aided from public funds	203	5,748	220	5,607
Unaided	81	3,257	52	2,125
Total .	372	11,711	357	10,167
Vernacular.				
Managed by the Department	19	71	23	75
Do. by Municipal or Local Boards.		. .	12	67
Aided from public funds	20	161	12	155
Unaided	...	...	3	28
Total ...	39	232	50	325

English Schools.—The lowering of the standard of the Jeypore school accounts for the reduction from four to three in the number of English schools managed by the Department; but it will be noticed that the strength of the Lower Secondary classes has risen.

Under Board schools there was a fall of two schools and 282 pupils. Three High schools were reduced to the status of Middle schools, and four Middle schools were transferred to the list of High schools. Also seven new schools entered the list, while eight of the schools in the last list have disappeared.

Aided schools, though showing an increase of 17 in number, suffered in strength to such an extent as to reduce the average attendance of Middle departments from 28 to 25. The Southern and Central Circles were chiefly affected, while the Western Circle is credited with an increase both in schools and in scholars.

About 73 per cent. of the total fall in the attendance of Middle schools and departments appertained to Unaided schools. The average strength, however, remained the same as in 1889-90.

Vernacular Schools.—To the list of Government Vernacular Middle schools there were four additions—three in Ganjam and one in Vizagapatam. Fifth standard classes were opened in three of the Salary-results schools in the Ganjam Agency, as also in the Kotapad school in the Vizagapatam Agency. The attendance did not, however, improve proportionately. Twelve Board Vernacular Middle schools were at work at the close of the year—four in Tanjore, six in Malabar and two in South Canara—against none in 1889-90. Aided and Unaided Vernacular schools contained together 183 pupils, or 22 more than on the 31st March 1890, though the number of such schools fell from 20 to 15.

English Middle Schools according to districts.

67. In the subjoined table English Middle schools in each District and Circle are shown, together with the number that passed the Middle School examinations held in May and December 1890.

Districts.	1889-90.						1890-91.					
	Number of schools.	Strength of Lower Secondary departments.	Strength of Upper Primary departments.	Strength of Lower Primary departments.	Total on the 31st March 1890.	Number that passed the Middle School examination, 1889.	Number of schools.	Strength of Lower Secondary departments.	Strength of Upper Primary departments.	Strength of Lower Primary departments.	Total on the 31st March 1891.	Number that passed the Middle School examination, 1890.

In 18 districts the attendance in Middle school classes has fallen, and even in the remaining four districts, the Middle departments attached to High schools lost more pupils than Middle schools proper gained. The Upper and Lower Primary departments also contained fewer pupils than on the 31st March 1890; nearly the whole of the decrease was confined to the Southern Circle, the districts of Salem, Tanjore and Trichinopoly experiencing it the most.

In every District and Circle, as might have been expected, a larger number of candidates, pupils and others passed at the Middle School examination, but in the Northern Circle, the percentage of increase was comparatively very high.

Detailed statistics of Middle schools, English and Vernacular, are given in an Appendix.

Middle Schools, Northern Circle.

68. *Ganjam.*—There were eight English schools in Ganjam—six Board and two Aided—as in the previous year, but the attendance in their Middle classes slightly fell. The Middle School examination results were very good, 353 passing against 157. Three more Government salary-results schools passed to the list of Vernacular Middle schools on a Fifth standard class being opened in them.

Vizagapatam.—The Government Middle English school at Jeypore became a Primary school on the abolition of the Middle department for want of attendance. The Board Middle school at Sálúr was reduced in standard, and the number of Board schools in the Vizagapatam district thus fell from seven to six. The transfer to the High school list of the Ripon school, Vizianagrum, was the chief cause of the fall from 317 to 173 in the strength of the Middle school classes.

The number of candidates that passed the Middle School examination rose from 91 to 237. A fifth standard class was opened in the Government Vernacular school at Kotapad.

Godávari.—Including the Practising branch of the Rajahmundry Normal school, there were five additions to the list of Board schools in the Godávari district. The large decrease from 26 to 18 in the number of Aided and Unaided schools is due partly to three schools having found their way into the High school list, and partly to the reduction of schools in consequence of diminished attendance. The number that passed the Middle School examination was 673 against 188 in the previous year.

Kistna.—The net increase of one Vernacular and three English schools in the Kistna district was followed by a corresponding increase in the attendance of Middle departments. At the Middle School examination, 347 passed against 102 in the previous year, 77 against nine being in the first class.

Kurnool.—It is to be regretted that, in spite of an additional school, the number of pupils in Middle school classes in the Kurnool district fell from 34 to 32. Ninety-nine candidates passed the Middle School examination against 37.

Middle Schools, Central Circle.

69. *Nellore.*—The raising of the standard of the Practising department of the Board Normal school, Nellore, increased the total number of English schools in that district from seven to eight, but Middle school classes contained fewer pupils—175 against 222. At the Middle School examination, 256 candidates were successful.

Madras.—Madras shows improvement in the number and strength of Middle schools, Aided and Unaided. No less than 784 candidates passed the Middle School test against 470 in 1889.

Chingleput.—In the Chingleput district, Aided and Unaided English schools rose from 12 to 14 and one to two, respectively, and four Vernacular Middle schools came into existence. Notwithstanding this, the Middle school classes were weaker. At the Middle School examination, 188 candidates passed against 80 in 1889.

Bellary.—There was no change in the number of Middle schools in the Bellary district, but Aided schools suffered in attendance to some extent. At the Middle School examination the number passed rose from 105 to 192.

Anantapur.—The two Middle schools in the Anantapur district contained together 53 pupils against 61 in the previous year. At the Middle School examinations 77 candidates passed against 23 in 1889.

Cuddapah.—In consequence of the lowering of the standard of two of the Aided schools in the Cuddapah district, the strength of the Middle school classes fell from 112 to 91. The Middle School examination results were good, 128 having passed.

North Arcot.—Owing to the reduction of the Municipal High school, Wálajápet, to the Lower Secondary, and of the Kávéripák and Punganúr Local Fund Middle schools to the Primary standard, the number of Board schools in North Arcot fell from 11 to 10; but the strength of the Middle departments remained unaffected. Aided and Unaided schools suffered both in number and in attendance. The only Vernacular school in the last list has disappeared. The results of the Middle School examination were fair, 232 having passed.

South Arcot.—One Unaided English school was added to the list of Middle schools in South Arcot. The Middle departments of English schools were, nevertheless, somewhat weaker than on the 31st March 1890. At the Middle School examination this district was not so successful as other districts, having passed only 179 candidates against 149 in 1889.

Middle Schools, Southern Circle.

70. *Coimbatore.*—There was a further decline in the Coimbatore district in the number of pupils in the Lower Secondary stage of instruction, although there was an addition of one to the list of English schools, which rose to 15. At the Middle School examination, 207 passed.

SECONDARY EDUCATION.

Nílgiris.—The number of pupils in Secondary departments of Middle schools in the Nílgiri district remained practically the same as in the year previous, notwithstanding that one school was added to the list. At the Middle School examination, 75 candidates passed on the whole against 14 in 1889.

Salem.—The raising of the standard of the Municipal school, Tirupatúr, and the Local Fund schools, Hosúr and Krishnagiri, and the lowering of the standard of the Suramangalam and Omalúr Local Fund schools reduced the number of Board Middle schools in the Salem district from 12 to seven. Aided schools also decreased by one school. In consequence partly of these changes, the number of pupils in Middle departments fell from 359 to 149. The Middle School examination results were fair, 161 having passed.

Tanjore.—Middle English schools fell from 43 to 39 in the Tanjore district. The number of Aided schools increased by four and that of Unaided schools diminished by eight. The attendance, both in Secondary and in Primary departments, fell considerably, the former from 1,634 to 1,390, and the latter from 829 to 552. Four of the Board Primary schools have developed into Vernacular Middle schools. At the Middle School examination 423 passed against 375. This district has not kept pace with most other districts.

Trichinopoly.—Board, Aided and Unaided schools in the Trichinopoly district all fell in number and in attendance. Kattuputhur and Udayárpálaiyam Middle schools were lowered to the Primary standard, and the Local Fund High school, Lálgudi, to the Lower Secondary standard. The number of schools fell from 24 to 14 and the attendance in Lower Secondary classes from 898 to 425. The results of the Middle School examination were not good, only 204 pupils passing against 176 in 1889.

Madura.—In the Madura district there was one school less than in 1889-90, and the attendance also fell. Only 293 pupils passed the Middle School examination.

Tinnevelly.—Three English and two Vernacular schools were added to the list of Middle schools in the Tinnevelly district. The attendance remained almost the same as in the previous year. At the Middle School examination the number of successful candidates rose from 289 to 443.

71. *Malabar.*—The amalgamation of the Municipal Middle school, Pálghat, with the Victoria Jubilee College reduced the number of Board Middle English schools in the Malabar district from 12 to 11. Six Board Middle Vernacular schools appear in the list for the first time. Aided Vernacular and Unaided English schools fell, respectively, from sixteen to two and from six to two. The total attendance of Middle departments of English and Vernacular schools fell from 1,122 to 885 and 135 to 85 respectively. At the Middle School examination, however, 458 candidates passed against 273 in 1889.

Middle Schools, Western Circle.

South Canara.—To the five Board English schools in South Canara, a sixth was added, viz., the Practising Branch of the Local Fund Normal school, Mangalore; but the strength of the Middle school classes slightly declined. Two Board Primary schools developed into Middle Vernacular schools. Aided schools improved in number and in attendance. The total attendance in Lower Secondary English classes throughout the district remained practically the same, being 511 as against 515 in the previous year. The Middle School examination results were good, 263 against 137 having been successful.

(e) *Standard Examinations.*

72. A larger number of boys' schools presented pupils for the Fifth, Sixth and Seventh standard examinations, as indicated in the margin. The number of schools that passed pupils was 213, 127 and 74 respectively. It is not satisfactory that as many as 12 schools failed to pass any of the pupils they presented for the Fifth standard examination.

Fifth, Sixth and Seventh standard examinations for Results grants.

	1889-90.	1890-91.
Fifth standard	204	225
Sixth do.	119	132
Seventh do.	74	75

The number of male pupils presented and passed for the above standards is compared in the margin with the figures of the previous year. For the Fifth and Sixth standards a larger number of boys were presented, though the increase under the former standard was not in keeping with the addition to the number of schools, and for the Seventh standard fewer pupils were sent up. But it is very satisfactory to observe that there was an appreciable improvement both in the number and in the proportion passed under each standard. The percentages of increase in passed pupils under the Fifth, Sixth and Seventh standards were, respectively, 13, 17 and 34.

Standard.	Presented.		Passed.	
	1889-90.	1890-91.	1889-90.	1890-91.
Fifth	1,551	1,667	1,063	1,201
Sixth	1,060	1,147	688	807
Seventh ...	901	887	286	383
Total ...	3,512	3,701	2,037	2,391

Pupils examined and passed were distributed as follows among the different classes of institutions presenting pupils :—

Class of schools.	Presented.			Passed.		
	Fifth standard.	Sixth standard.	Seventh standard.	Fifth standard.	Sixth standard.	Seventh standard.
Results system	1,310	951	783	959	697	324
Salary-results system	307	162	93	206	82	56
Combined system	50	34	11	36	28	3
Total ...	1,667	1,147	887	1,201	807	383

The bulk of the pupils presented and passed were from schools aided on the results system. These schools passed 72 and 73 per cent. of their pupils in the Fifth and Sixth standards, while the salary-results schools succeeded in passing only 67 and 51 per cent. In the Seventh standard, however, the salary-results schools passed 60 per cent. of their pupils, and results schools 41 per cent. It is not easy to account for these wide variations in the proportion passed. The combined schools presented comparatively a very small number of pupils, which must be attributed to the small number of schools maintained on that system. These schools are gradually being replaced by, or converted into, salary-results schools.

V.—PRIMARY EDUCATION.

(a) *Primary School Examination.*

The scheme of the Primary School Examination.

73. Under the original notification instituting the Primary School examination, pupil candidates were required to pay a fee of one rupee for admission. With a view to economize the time of the Assistant Inspectors, and to popularize the examination, Mr. Grigg ruled that all pupils of the fourth standard should appear for this examination, provided that the schools they attended were within 20 miles of the centre at which the examination was held. The examination being thus made practically compulsory on all male pupils of that standard, it was considered that the payment of a fee would be felt to be a hardship by managers of schools presenting pupils for examination for grant under the Fourth standard. Mr. Grigg accordingly recommended that pupil candidates be admitted without payment of fee, and the Primary school notification was amended by Government so as to allow of this being done.

The Primary School Examination.

74. The following summary compares the number of candidates examined and passed with the figures of 1889-90 under each district :—

Districts.	Examined.						Passed.					
	Pupils.		Teachers.		Others.		Pupils.		Teachers.		Others.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
Ganjam	86	238	22	40	58	62	8	183	9	37	22	62

Salem	330	581	10	26	17	79	213	410	9	22	13	65
Tanjore	905	1,579	50	69	50	113	644	1,241	33	56	34	87
Trichinopoly ...	420	613	13	30	20	102	250	550	8	26	15	91
Madura	477	595	11	105	9	89	264	495	7	97	5	76
Tinnevelly	184	782	22	106	58	166	116	693	15	94	36	146
Malabar	380	1,317	78	158	75	127	253	602	60	99	49	96
South Canara ...	745	904	68	88	20	110	559	544	53	75	11	75
Total ...	5,346	13,694	507	1,252	627	1,680	3,542	9,826	370	1,031	434	1,403

The number of pupil candidates rose from 5,346 to 13,694, or by 156 per cent., while teacher and other candidates advanced by 147 and 168 per cent. respectively. The above increase is very encouraging; and the figures relating to the numbers that passed are even more encouraging: pupil, teacher and other candidates showing, respectively, an increase of 177, 179 and 223 per cent. over the figures of 1889-90. Of the candidates examined, 7,482 passed for complete certificates, 1,343 in compulsory subjects only, 2,101 in compulsory subjects and in one optional subject only, and 1,334 in optional subjects only. The percentage of candidates that gained complete certificates to the total number that passed is very fair.

Although the examination is optional with female pupils, it will be noticed that 509 girl-pupils presented themselves for the examination, of whom 348 passed.

It is also noteworthy that while 72 per cent. of the pupil candidates met with success, 82 and 83 per cent., respectively, of teacher and other candidates passed the examination. Compared with the proportion passed by inspecting officers under the fourth standard during 1889-90, viz., 64 per cent., the success of pupil-candidates at the Primary School examination is greater. It is impossible to say how much of this greater success is due to better preparation and how much to greater leniency shown by the examining boards than by the inspecting officers.

In the margin are given the particulars regarding the number examined and passed from the different classes of the community. As regards the proportion of passed to examined, Native Christians ranked first with 82 per cent., Brahmans came next with 78 per cent., and Muhammadans and Non-Brahman Hindus passed 70 per cent. Of Brahman and Muhammadan girls 48 and 38 appeared, of whom 33 and 34, respectively, passed.

Classes.	Examined.	Passed.
Europeans and Eurasians ...	148	91
Native Christians	1,485	1,224
Muhammadans	978	681
Brahmans	6,017	4,682
Non-Braman Hindus	7,998	5,582
Total ...	16,626	12,260

Languages.	Males.	Females.
Tamil	70	71
Telugu	72	67
Malayalam	50	40
Canarese	64	47
Hindustani	64	89
Uriya	60	50

The percentages passed in the Vernacular languages are noted in the margin. In Tamil and Telugu the percentages are higher than in other languages. But no important inference can be drawn from these figures, the number of female candidates being small and the standard of examination varying according to the constitution of the examination boards.

(b) *Public Primary Schools for Boys.*

Number and strength of Public Primary schools for boys.

75. Public Primary schools for boys of all classes have advanced both in number and in strength as will be seen from the annexed summary. There was an increase of 17 per cent. under schools and of 15 per cent. under scholars against 6·1 and 6·6 per cent., respectively, in the previous year. By far the greater portion of the above increase appertained to unaided schools, as will be explained later on :—

Schools according to agency.	Standard of schools.	31st March 1890.		31st March 1891	
		Schools.	Scholars.	Schools.	Scholars.
Under Public Management.					
Government schools	Upper Primary ...	27	1,072	36	1,414
	Lower do.	50	1,089	56	1,224
Board schools	Upper do. ..	1,022	43,513	1,369	61,316
	Lower do. ...	1,028	30,109	1,081	33,572
Under Private Management.					
Aided schools	Upper Primary ...	1,198	66,334	1,588	70,379
	Lower do.	6,449	172,926	6,692	181,428
Unaided schools	Upper do. ...	186	6,108	221	7,508
	Lower do. .	4,382	93,792	6,114	121,158
Total	Upper do	2,733	117,027	3,214	140,617
	Lower do. ..	11,909	297,916	13,943	337,382
	Grand Total ...	14,642	414,943	17,157	477,999

Upper Primary schools rose from 2,733 to 3,214, or by 18 per cent., and the attendance therein from 117,027 to 140,617, or by 20 per cent. This advance is probably due in the main to the institution of the Primary School examination. The proportion (19 per cent.) of such schools to the total number of Primary schools is also satisfactory, considering that the upper primary course represents a fifth part of the whole Primary school course so far as duration is concerned, and that new schools take some years before they open fourth standard classes. *En passant* I would remark that in the latest report to hand on Public Instruction in Bengal (that for 1889-90), I find that in that Presidency only seven per cent. of the Primary schools were of the upper primary grade. It is also noteworthy that under Government, Board and Aided schools the increase in the number of Upper Primary schools was comparatively greater than the increase in the number of Lower Primary schools.

Government Upper and Lower Primary schools rose from 27 and 50 to 36 and 56, respectively, the result chiefly of the opening of new schools.

Board Primary schools of upper and lower grades show a larger average attendance—45 and 31, respectively, against 43 and 29 in 1889-90. Of the 400 additional schools, 180 were the so-called Combined schools in Malabar, which were constituted as Salary-results schools on the recommendation of this Department.

The Aided list received an accession of 333 schools. If account be taken of such schools as were converted into Board schools, the gross addition would have to be set at a higher figure than 600 schools. It will be observed that the average strength of Aided Upper and Lower Primary schools has continued the same, viz., 44 and 27 during the past two years, in spite of the fluctuations in the number of schools. These figures are not so favourable as are those of Board schools.

Unaided Upper and Lower Primary schools rose from 186 and 4,382 to 221 and 6,114 respectively. The increase in the number of Lower Primary schools amounted

PRIMARY EDUCATION.

to over 38 per cent., notwithstanding the transfer of over 600 schools to the list of Board and Aided schools. This large increase is chiefly the result of a great many so-called Private schools having been correctly returned as Public schools during the year, owing to their having adopted more or less the curriculum provided for Aided schools, with the intention of eventually applying for aid. These schools are constantly visited by inspecting schoolmasters, and they partake more of the character of public than of private schools. Their passing into the aided list is a mere question of time and money.

Proportion of boys in Primary schools and classes to male population of school-going age.

76. The proportion of boys in Public Primary schools and classes to the male population of school-going age in each district is worked out in the following table, calculating the number of boys of school-going age at 15 per cent. of the male population as per Census of 1891 :—

Districts.	Boys of school-going age.	Number of boys on the 31st March in Primary schools	Number of boys on the 31st March in Primary classes of Secondary schools.	Total.	Percentage of column 3 to column 2	Percentage of column 5 to column 2
1	2	3	4	5	6	7
Madras	33,603	11,480	4,836	16,316	34	49
Tinnevelly	140,156	35,482	1,382	36,864	25	26
Nílgirí	8,420	1,306	781	2,087	16	25
Ganjam	138,348	32,152	1,025	33,177	23	24

Compared with the statistics of 1889-90, it will be noticed that in seven districts—Madras, Kistna, South Canara, Godávari, Nellore, Anantapur and Vizagapatam—the percentage has remained undisturbed; in six districts—Nílgiris, Ganjam, Trichinopoly, North Arcot, Cuddapah and Salem—it has improved; and in the remaining nine districts it has fallen. There was no actual decrease, however, in the number of boys under instruction in these districts. In fact, in

every one of these districts, the attendance has risen more or less. It is the adoption of the new Census figures that has led to the apparent decrease in the percentages above referred to. The total percentage, however, remained the same as in the previous year, viz., 18. If the Census figures followed last year were adopted, the total percentage would be 20.

Including boys reading in private Primary schools, the total number of male pupils under instruction will be found to be 515,736. The map attached exhibits the classification of districts based on the percentage of such pupils to the male population of school-going age.

77. The 92 schools managed by the Department are situated in the four districts noted in the margin. Those in Ganjam, Vizagapatam and Godávari are in the Agency Tracts, to which the Local Fund Act does not apply. The schools in the City of Madras are intended for Muhammadans. There was no improvement, however, in the average strength of these schools. It must be borne in mind that the Agency Tracts are mostly very backward, not in the matter of education only, but in other respects. In the malarious parts it would be difficult to keep up a large and regular attendance even if the people were eager for the instruction of their children. But, when to the difficulties which nature has put in the way of the spread of education there is added the indifference of the people, the task of those to whom is committed the charge of schools in these outlying parts of the Presidency will appear neither easy nor hopeful. A graduated scale of salaries has been introduced with a view to induce the teachers to exert themselves; and, in addition, results remuneration is paid at maximum rates. Endeavours are also made to secure the co-operation of village chiefs and parents. But with all this it will be long before these schools become as efficient and strong as schools in the plains.

Government Primary schools.

Districts.	Upper Primary.	Lower Primary.
Ganjam	6	8

Madras	7	6
Total ...	36	56

Government Primary schools in the Ganjam Agency.

78. Against five Government Upper Primary and as many Lower Primary schools in 1889-90, there were six Upper Primary and eight Lower Primary schools in the Ganjam Agency at the close of the official year, and the attendance rose from 359 to 464. Three of the ten schools in the last list developed into Middle schools by the opening of fifth standard classes, and seven new schools were established during the year. This accounts for the slight decrease from 36 to 33 in the average strength of the schools. All the schools were in a prosperous condition. An additional temporary Superintendent has been sanctioned for the supervision of schools in the Parlákimedi Agency, as one Superintendent for all the agencies in the district was considered insufficient.

Government Primary schools in the Vizagapatam Agency.

79. A fifth standard class was opened in the Kotapad school. Ten new schools were started, and the Jeypore Middle school was reduced to a Primary school. The result was that the number of Government schools in the Vizagapatam Agency rose from 32 to 42 and their strength from 846 to 1,082. Eleven of the schools were of the Upper Primary grade, but there were only 49 pupils in all in the Upper Primary classes. Arrangements were made during the year for the better supervision of the schools. Most of them have been provided with improved school-houses. The results of inspection were generally good. The proportion of trained teachers has also risen, and liberal stipends are now given to induce unpassed and uncertificated masters to undergo a course of normal training. All the schools in this agency have been placed on the Salary-results system.

Government Primary schools in the Godávari Agency.

80. The schools in the Godávari Agency declined both in number and in strength. Of Upper Primary schools there were 12 against 10 in the previous year, but the attendance in such schools fell from 332 to 318. Lower Primary schools fell from 16 with 244 pupils to 11 with 171 pupils. The condition of the schools was not

PRIMARY EDUCATION.

satisfactory. Proposals for their improvement by the employment of a second Superintendent, and for the establishment of new schools, were under consideration towards the close of the year.

Government Primary schools in the City of Madras.

81. Under the scheme sanctioned in G.O., No. 172, dated 25th February 1890, four new Muhammadan schools were opened during the year in the City of Madras. There were seven Upper Primary and six Lower Primary schools against five Upper Primary and four Lower Primary schools on the 31st March 1890, and there was also a marked advance from 380 to 603 in the attendance. These schools made on the whole fair progress. Further improvement in their condition may be hoped for under the inducements offered by the new scheme.

Primary schools for boys managed by District Boards.

82. From the subjoined statistics of Local Fund schools, it will be seen that Local Boards constituted under Act V of 1884 managed 377 schools more than during 1889-90, and that the attendance also increased from 65,848 to 86,125.

Two districts—Godávari and Nílgiris—presented no change in the number of schools, and in one district, namely, Coimbatore, the number was two less than in the previous year. All the other districts shared more or less in the increase. The large addition of 185 schools in Malabar is due to the conversion of the so-called Combined schools, mostly under the Tellicherry Taluk Board, into Salary-results schools. The Nellore, South Canara, Madura and Cuddapah Boards contributed altogether 81 schools.

The figures regarding Upper Primary schools are even more encouraging than the general advance noted above. While the net increase consisted in 377 schools, the Upper Primary list is credited with 316 more schools than in 1889-90, and the strength of the Upper Primary classes rose from 5,439 to 7,326. These figures indicate that Board schools are being developed with a view to present pupils for the Primary School examination. The Board schools in Godávari, Kistna, Tanjore and Malabar contained not less than 42 per cent. of the pupils in the Upper Primary stage of instruction in Board schools throughout the Presidency.

Eleven municipalities—Berhampore, Anantapur, Kurnool, Madras, Chidambaram, Coonoor, Mánnargudi, Madura, Periyakulam, Tuticorin and Palamcottah—had no schools of their own, and their educational operations were confined to the aiding of schools under private management. The total number of schools managed by the other municipalities was 181 against 158 in 1889-90. A very satisfactory feature is that the whole of the increase was under Upper Primary schools, which rose from 57 to 88, and that the attendance of Upper Primary classes more than doubled itself during the past two years.

Aided and Unaided Primary Schools.

84. Aided and Unaided Primary schools, districtwar particulars of which are summarized below, have also advanced. The increase in the number and strength of Upper Primary schools compared unfavourably with that under Local Fund and Municipal schools. The average strength of the Upper Primary classes of Aided Upper Primary schools was eight against eleven in the case of Municipal schools and six in Local Fund schools. When the Educational Rules have been in force for some time, a substantial advance may be hoped for :—

(c) *Standard Examinations.*

Number of schools that presented and passed pupils on one or more standards.

85. In the following statement the number of schools that presented and passed pupils in one or more standards for the past two years is compared :—

Classes of schools.	Number of schools that presented pupils.		Number of schools that passed pupils.	
	1889-90.	1890-91.	1889-90.	1890-91.
Boys' Schools.				
Results schools	8,805	9,316	8,738	9,253
Salary-results schools	1,705	2,155	1,675	2,120
Combined schools	409	182	409	182
	10,919	11,653	10,822	11,555
Girls' schools	680	731	674	727
Total ...	11,599	12,384	11,496	12,282

Improvement will be noticed in the number of results and salary-results schools for boys and of girls' schools which were examined for results grants. The decrease under combined schools and part of the increase under scholars in results schools are due to the conversion of a large number of the former class of schools in Malabar into schools on the latter system. The proportion of schools that passed pupils rose from 99·11 to 99·18. A larger percentage of results than of salary-results schools succeeded in passing pupils, while all the combined schools and, with but four exceptions, all the girls' schools passed a greater or less proportion of the pupils they presented. That salary-results schools acquitted themselves poorly is not, however, satisfactory. It is probably due, in part, to the fact that only the smaller and less efficient schools have been put on the salary-results system, as well as to the circumstance that results schools have, as a rule, the benefit of more direct, constant and intelligent supervision.

PRIMARY EDUCATION.

86. The figures recorded in the margin, giving the number of schools that presented and passed pupils for each of the Primary standards, are very interesting as showing the relative advance in the different stages of Primary instruction. Except in the number of girls' schools that presented pupils for the Fourth standard, improvement will be noticed all round in the number of schools that presented and passed pupils. For the Infant standard fewer boys' schools presented pupils than for the First standard, probably because the former is of a very elementary character, and managers and parents are alike unwilling to detain children for a full year in it. The earnings in the Infant standard are also small. Out of every 105 schools preparing pupils for the First standard, 95 provided instruction for the Second and 68 for the Third standard. The fall from the Third to the Fourth standard is very marked, the fourth standard class being maintained in only 28 per cent. of the schools teaching for the Third standard. One of the most important of the causes that contributed to this is the absence in most of the rural schools of a staff coming up to the requisition of Chapter III, Article 11, clause 3, of the Grant-in-Aid Code. The operation of the Madras Educational Rules and of the Primary examination will do something to lead teachers to see that it is their interest to join the training schools. As regards girls' schools, the progress from the Infant to the Fourth standard is better graduated. These schools are generally provided with a more efficient staff than boys' schools, and the restriction imposed in the article of the Code mentioned above does not apply to them.

Number of schools that presented and passed pupils for each Primary Standard.

Standards.	The number of schools that presented pupils.				The number of schools that passed pupils.			
	1889-90.		1890-91.		1889-90.		1890-91.

Madura	3,869	4,851	3,380	1,675	568	3,492	3,792	2,452	1,181	465
Tinnevelly	4,924	5,484	3,841	2,239	701	4,442	3,639	2,507	1,542	558
Malabar	3,541	6,012	4,304	2,576	480	2,821	4,112	3,050	1,750	229
South Canara	816	2,019	1,928	1,452	854	744	1,481	1,405	1,027	515
Total ...	46,449	68,870	53,014	34,348	11,221	38,256	48,472	37,707	23,655	7,359
Total, 1889-90 ...	41,989	64,024	47,331	30,704	10,532	33,237	46,350	33,184	20,658	6,696

Under each of the standards there was an increase in the number of pupils examined and passed. It ranged from 6·5 to 12·0 per cent. under examined, and from 4·6 to 15·1 per cent. under passed, as shown in the margin. The comparatively larger advance in the percentage passed under the Infant, Second, Third and Fourth standards is noteworthy. The small increase in the number presented and passed for the First standard I am unable to explain satisfactorily. Probably, as already said, young children are passed on to the First standard without being kept for a full year in the Infant standard class, and many children probably do not enter the Infant class at all, but begin with the First standard subjects.

Standards.	Increase under	
	Examined.	Passed.
Infant	10·6	15·1
First	7·6	4·6
Second	12·0	13·6
Third	11·9	14·5
Fourth	6·5	9·9

Taking all the Primary standards together, it will be found that 72·8 per cent. of the total number of pupils examined under the Infant and first four standards were passed for grant against 72 per cent. in 1889-90. Under the Infant, Second, Third and Fourth standards, 82·4, 71·1, 68·9 and 65·6 per cent. succeeded in passing, against 79·1, 70·1, 67·3 and 63·6, respectively, in the previous year, while the percentage of passed to examined under the First standard fell from 72·4 to 70·4.

Number of pupils passed in different subjects in the Primary standards.

88. The annexed table gives particulars of the number of pupils, boys and girls, that passed in the different subjects in the Primary standards:—

Subjects.	Infant.		First standard.		Second standard.		Third standard.		Fourth standard.	
	1889-90.	1890-91.	1889-90	1890-91.	1889-90.	1890-91	1889-90.	1890-91.	1889-90.	1890-91.
Compulsory subjects.										
Reading	41,807	47,943	53,639	57,970	40,838	46,146	25,599	28,637	9,066	10,588
Writing	41,291	47,075	57,552	60,721	40,837	46,196	26,801	29,915	9,581	11,038
Arithmetic	21,583	27,834	55,456	60,782	40,772	45,867	25,218	28,142	7,992	9,069
Total passed for Compulsory subjects ...	33,237	37,172	46,350	47,486	33,184	36,832	20,658	22,937	6,696	7,352

Drill and Gymnastics ...	260	322	1,094	2,256	706	800	492	501	384	256

A general advance will be noticed in the number that passed under most of the subjects—Compulsory and Optional. The proportion that passed in Arithmetic in the Infant standard has risen, though there is still much room for improvement. In the Second, Third and Fourth standards also the results in Arithmetic were inferior to those obtained in Reading and Writing, which must be attributed to the inefficiency of the majority of elementary teachers to handle the subject properly. A larger number of pupils were passed for Object lessons, except under the Third standard, and for Drill and Gymnastics, except under the Fourth standard. The decrease in the number that passed in Drawing and Modelling and in Singing is to be regretted.

In Agriculture, Hygiene and Needle-work, there was a satisfactory increase in the number passed.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

VI.—SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

(a) *The Examinations in Science, Art, Industries and Commerce.*

The scheme of the Higher Examinations in Science, Art, Industries and Commerce.

89. The scheme of the Higher Examinations in Science, Art, Industries and Commerce, elaborated in 1885 and sanctioned in 1886, while it embraced a great variety of subjects, did not distribute them into groups according to the time of the year when the examinations could be most conveniently conducted, nor did it fix the order in which the subjects should be taken up or the number of subjects which could be brought up by a candidate at one and the same examination. Further, it did not provide fully for the constitution of local committees to conduct the oral and practical tests at mofussil stations. It became necessary, therefore, on the institution of the Upper Secondary examination to revise the scheme of the Higher examinations. Moreover, Government having abolished the Middle School examination, which included elementary tests in a large number of technical, industrial and commercial subjects, steps had to be taken to retain the examinations in those special subjects in a form adapted to the altered condition of things. Mr. Grigg had, for various reasons, allowed the examination in these special subjects to be connected with the examination in the literary subjects of the Middle School scheme. But the abolition of the Middle School examination, and the substitution for it of an optional Lower Secondary examination, was considered by him to be a convenient opportunity for effecting a separation between the two classes of subjects, and for connecting the elementary Science, Art and Industrial examinations with the Higher examinations of the technical scheme of 1885. It was also deemed expedient to entrust the higher and lower tests in technical subjects to the same boards of examiners at one and the same time, and to provide for an efficient oral and practical examination in the several subjects. For these and other reasons, the opportunity afforded by the abolition of the Middle School examination was taken advantage of to recast the whole scheme of Government examinations in Science, Art, Industries and Commerce. The notification, as finally approved of, is printed in the appendix to this report.

The Higher Examinations in Science, Art, Industries and Commerce.

90. For the convenience of institutions, the Higher examinations were held three times during the year—in May, September and October. Eleven institutions presented candidates for these examinations. The numbers examined and passed in the several subjects are summarized below :—

Subjects.	Examined.	Passed.
Agriculture { Preliminary	37	31
Agriculture { Advanced	15	11
Physiology { First stage	29	21

The following extracts are from the Commissioner's report :—

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

"It deserves to be noted that two candidates, Miss L. C. Kelly and Mr. F. A. D'Cruz, appeared for the first time for the Preliminary Examination in Music, and that both passed, Miss Kelly being placed in the first class. These are the only persons, perhaps in the whole of India, who, being bred and educated in the country, have given evidence of their proficiency in this subject by passing a public examination in it of a high standard. That there is considerable musical talent in the country, which only needs to be cultivated and brought out, cannot well be doubted, and, now that the example has been set, it is hoped that many will come forward to have their attainments tested in a public examination.

"Taking all these examinations together, there were 265 individual candidates and 782 subject candidates, of whom 464 were successful. The corresponding figures for the year previous were 269, 911 and 486. It must be remembered, however, that, while in 1890 only three examinations were held, in 1889 the examinations were held four times for as many sets of candidates, and many of those who failed at the first of the four examinations appeared again at the last and so helped to swell the total number for the year."

(b) *Special or Technical Schools and Classes.*

Number and strength of schools and classes for special [or technical education.

91. Schools and classes for special education for the past two years are particularized hereunder :—

Classes of institutions.	Number.		Strength.	
	1890.	1891.	1890.	1891.
Training schools for Masters	52	57	1,215	1,174
Do. for Mistresses	13	13	289	253
Schools of Art	1	1	364	424
Schools of Medicine	3	3	209	261
Schools of Engineering	1	1	113	156
Schools of Agriculture	1	1	40	34
Schools of Commerce	1	2	162	117
Schools of Industry	19	19	739	992
Ordnance Artificers' School	1	...	94	...
Reformatory School, Chingleput ...	1	1	109	140
Schools of Music	1	1	74	68
	94	99	3,408	3,619
Special Classes ..	14	15	1,019	1,000
Total ...	108	114	4,427	4,619

There was on the whole an increase of five schools. It is to be regretted that the Ordnance Artificers' school, which had been for years doing very good work in the general and special instruction of artificers, was closed in December last. Training and Commercial schools fell greatly in attendance. A slight fall also took place in the strength of special classes.

(i) *Training Schools for Masters.*

Number and strength of training schools for Masters.

92. Including Sessional schools, the number of Training schools for Masters rose from 52 to 57. Of Training schools proper, there were four less than in the previous year, in consequence of the amalgamation of the Board Normal school, Guntúr, with the Board Normal school, Masulipatam, and of the abolition of the Normal schools noted in the margin. The place of the Board Normal school, Chingleput, was taken by the Hindu Normal school opened in Madras as a branch of the Teachers' College. There was a net increase of nine Sessional schools, two in the last list having been closed and 11 new schools having been opened. Only such of the Sessional schools, however, as were at work at the close of the year are borne on the returns, which show the figures as they stood on the 31st March last. The total attendance fell from 1,215 to 1,174. Of the students, 156 against 68 belonged to Sessional schools. The Training schools proper thus contained 1,018 Normal students on the rolls against 1,147 on the 31st March 1890. This large decrease is due partly to the closure of the schools above referred to and partly to admissions to certain schools not having taken place till

1. Board Normal school, Edapalli (Nílgiris).
2. St. Joseph's Normal school, Trichinopoly.
3. Board Mappila Normal school, Tellicherry.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

after the close of the year. This decrease, however brought about, is greatly to be regretted, in view of the large proportion of uncertificated teachers in our schools.

Proposals for taking under Departmental management the Board Normal schools, with the exception of those of Madura and Tinnevelly, were under the consideration of Government at the close of the year. For the reasons given in last report, this is a change calculated to ensure the better working of these schools.

Circles.	Schools.		Students.	
	1890.	1891.	1890.	1891.
Northern Circle	12	11	246	262
Central do.	19	18	424	309
Southern do.	15	20	398	431
Western do.	6	8	147	172
Total ...	52	57	1,215	1,174

Appendix E gives the usual particulars of Training schools for Masters. In the margin will be found the number of schools and students in each circle. There was one school less in the Northern and in the Central circle, while the two other circles had each a larger number of schools. The decrease in attendance was confined entirely to the Central circle.

Classes of the community represented by the students.

Classes.	1890.	1891.
Europeans and Eurasians	2	...
Native Christians	182	217
Muhammadans	107	142
Brahmans	490	469
Non-Brahman Hindus	427	344
Others	1	2
Total	1,215	1,174

93. In spite of the decrease in the total number of students, Native Christians and Muhammadans contributed 35 students each more than in 1889-90. This is satisfactory. Non-Brahman Hindus declined most, and the number of Brahman students fell by 27, though they still form the largest proportion. It is a matter for regret that no European or Eurasian students were under training.

Qualifications of the staff.

94. A general improvement is noticeable in the qualifications of the staff employed in Training schools, as the following figures will show;—

Qualifications of Teachers.	In Government schools.	In Board schools.	In Aided schools.	In Unaided schools.	Total.
Educated in Europe	2	...	1	1	4
Hold L T diploma or normal certificate	8	66	14	2	90
Hold ordinary certificate	.	5	1	...	6
Have passed a public examination, but hold no teachers' certificate	2	15	4	...	21
Have not passed a public examination	2	.			2
Total ...	14	86	20	3	123

The European staff received two additions in consequence of the appointment of a Vice-Principal to the Teachers' College and of the Unaided school at Nittur being under a European teacher. The number of certificated teachers rose from 89 to 96. Only two of the teachers are returned as having passed no examination against seven such in the previous year. Comparing with the corresponding figures in last report, the figures in the margin showing the grades of normal and ordinary certificates and the public examinations passed by those who do not possess teachers' certificates, it will be seen that the number of trained teachers of collegiate and secondary grades advanced from 60 to 71; and that of non-certificated teachers who have passed a public examination from nine to 13. When Board Normal schools have been

Grade.	Normal.	Ordinary.	General education
Collegiate	8	...	1
Secondary { Higher ...	21	1	5
Secondary { Lower ...	42	3	7
Primary { Higher ...	11	...	4
Primary { Lower	8	2	4
Total ...	90	6	21

taken over by Government, it is expected that the staff will, before long, show marked signs of improvement, seeing that the improved status of the teachers, consequent on the provincializing of these schools, will induce a better class of men to take service in them. SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING

95. Four of the Training schools in the Presidency, viz., the Junior department of the Teachers' College, the Board Normal school, Rajahmundry, the Board Hindu Normal school, Calicut, and the S.P.G. Normal school, Tuticorin, were engaged in training teachers of the secondary grades. The rest of the schools confined themselves to the training of Primary grade teachers. The Junior department of the Teachers' College presented 41 students of the Secondary grade for the School Management Examination of June and December 1890, of whom 33 passed. For the Special Primary examination of December last 804 students appeared from the elementary Normal classes, of whom 421 or 52 per cent. passed; the figures of the previous year were 734 examined and 414 passed. The proportion passed was thus less than in 1889-90. The number of Primary certificates issued, viz., 44 higher and 293 lower, was on the whole larger than the number awarded in the year previous, though it was much below what it ought to have been, considering the expenditure incurred on these schools. The various shortcomings detailed in my last report anent the work of the training schools apply equally to the year under report. But I look forward to these schools occupying a much more important place in our educational system in the immediate future. The operation, on the one hand, of the Educational Rules which, among other things, require that each school seeking recognition as a public institution shall have on its staff a suitable proportion of certificated teachers, and, on the other hand, the stringent orders which Government has been passing on Local and Municipal Reports with a view to raise the professional qualifications of teachers—these two causes, combined with the contemplated change in the management of most of the Board Normal schools, cannot fail to make training schools more frequented and training more appreciated.

Work done by training schools for Masters

The number of trained teachers that obtained employment during the year was 651, or almost the same as in 1889-90. The small remuneration in the shape of results grants which many teachers of Primary schools in out-of-the-way places have been wont to receive, has led to the unpopularity of the profession of schoolmaster. Grants being now for the most part given at maximum rates, it is hoped that teaching as a profession will rise in public estimation.

96. *Ganjam.*—There were 57 students under training in the three schools in the Ganjam district against 66 on the 31st March 1890, all the schools showing a decrease. Fewer candidates passed the Special Primary examination and fewer trained teachers obtained employment. The unsatisfactory state of the Local Fund Normal school, Berhampore, chiefly led to the above results.

Training schools for Masters, Northern Circle.

Vizagapatam.—As in Ganjam, the number of students under training in the Vizagapatam district fell, as also the number of trained teachers that obtained employment during the year. Two more students appeared for, and three more passed, the Special Primary examination. The Government Normal class at Gunupúr fared the worst.

Godávari.—The Board Normal school, Rajahmundry, was reorganized during the year as a Secondary training school, which raised its strength from 29 to 61. It has an efficient staff, and very fair results were obtained at the public examinations.

Kistna.—In consequence of the amalgamation of the Board Normal school, Guntúr, with that at Masulipatam, the status of the latter was raised and its attendance rose from 36 to 51. Both the Aided training schools in the Kistna district were in a promising condition.

Kurnool.—The only training school in the Kurnool district, that at Nandyál, which is maintained by the District Board, was in a fair condition. At the Special Primary examination 13 students passed out of 26 entrants, and 12 trained students were found eligible for teachers' certificates.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Training schools for Masters, Central Circle.

97. *Nellore.*—Fresh admissions were not made before 31st March last to either of the two training schools in the Nellore district. The success at the Special Primary examination was greater than in 1889, and 56 trained teachers found employment during the year.

Madras.—The Hindu Normal school, opened towards the close of the year in Triplicane as a branch of the Teachers' College to train teachers for the Madras and Chingleput districts, had 61 students on the rolls on the 31st March last, and bids fair to be successful. There was an increase from 29 to 43 in the strength of the Muhammadan Normal school, due to a larger number of Local Boards having accepted the invitation of the Department to select and send Muhammadan teachers for training. Thirteen out of 15 students passed the Special Primary examination, 15 received Primary teachers' certificates, and 17 trained students received appointments as teachers. These results are very creditable to the staff. The Principal of the Teachers' College and his assistants have been exercising careful supervision over the school, which now forms an integral part of that College.

Chingleput.—On the opening of the Hindu Branch Normal school in Madras, the Board Normal school, Chingleput, was closed, the Board students being now trained in the new school.

Bellary.—One of the two Sessional schools in the Bellary district was closed, and the Board Normal school, Bellary, was attended by 16 students only. The results were hardly commensurate with the cost.

Anantapur.—The Board Normal school in the Anantapur district passed 12 out of 20 students at the Special Primary examination, and nine students received certificates.

Cuddapah.—Twenty-one students of the Board Normal school, Ráyachóti, passed the Special Primary examination out of 22 entrants, and as many as 18 secured certificates. These results are extremely good. The school contained only 12 students on the rolls at the close of the year.

North Arcot.—The year was far from being a favourable one for the training and Sessional schools in North Arcot: the attendance was scanty and the number that passed the Special Primary examination was very small, while only 29 trained students took to teaching. The distress prevailing in the district seems to have partly contributed to these poor results.

South Arcot.—South Arcot presented an equally disappointing spectacle; the number of students under training in the four training schools fell from 65 to 32; and for the Special Primary examination 51 students appeared from these schools, of whom only 25 passed. This is not at all commensurate with the outlay.

Training schools for Masters, Southern Circle

98. *Coimbatore.*—The Sessional school at Kodumudi was closed, and the training schools, Coimbatore and Erode, were also poorly attended. Fewer students from the former school passed the Special Primary examination, and fewer received certificates and obtained employment than in 1889-90. The Erode school results were comparatively better.

Nilgiri.—The Board Normal school for Badagas at Edapalli, which had been in a languishing condition, was closed in December 1890, in consideration of the heavy cost and small result. The training school which the Basel Mission has been keeping at Kaity is intended for Native Christians only. Its attendance was also poor.

Salem.—Considering its standard, which is of the Primary Higher grade, the Board Normal school, Salem, was not so strong as it should have been, nor were the results of the Special Primary examination creditable to the staff.

Tanjore.—Both the training schools in the Tanjore district improved in numbers. From the Board Normal school, Tanjore, only 18 students passed the Special Primary examination out of 42 sent up. It is, however, noted that 43 students trained in the school found employment during the year.

Trichinopoly.—The Board Normal school, transferred from Perambalúr to Trichinopoly, had 40 students under training. The success at the Special Primary

examination was small, but all the students who were in the school on the 31st March 1890 received employment as teachers. It is to be regretted that the Normal department attached to the St. Joseph's College had to be closed owing to a sufficient number of Native Christians not joining the class. SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Madura.—A Sessional school was at work in the Ramnad range on the 31st March last. The reorganization of the Board Normal school, Madura, with a technical and industrial side, was one of the most important events of the year, and the number of students under training rose from 43 to 54. At the Special Primary examination the results were, however, even poorer than those of 1889. Though showing an increased strength, the American Mission school, Pasumalai, passed only five students out of 20 at the Special Primary examination and only five students received certificates.

Tinnevelly.—Seven Sessional schools were opened with 72 students on the rolls. This probably affected the strength of the Board Normal School, Tinnevelly, which fell from 52 to 36. Less than 50 per cent. of the candidates for the Special Primary examination were successful. The Church Mission Society's Training school, Palamcottah, is also credited with a smaller attendance and fewer passed students than in the previous year.

Training schools for Masters, Western Circle.

99. *Malabar.*—Both the Hindu Normal schools maintained by the Board suffered in numbers, while the Mappila Normal school, Calicut, was 41 strong against 26 on the 31st March 1890. The German Mission Normal school, Nittur, was also better attended. The Mappila Normal school, Tellicherry, was closed during the year, and in its place three Preparatory or Sessional schools were opened with an attendance of 37 students. At the Special Primary examination the Mappila and Hindu Normal schools, Calicut, passed 10 and 23 out of 11 and 33 entrants, respectively, but the Nadapuram Normal school was a total failure.

South Canara.—The Board Normal school, Mangalore, contained 29 students against 23 at the close of the past official year. It is to be regretted, however, that only six students passed the Special Primary examination out of 20 that appeared. In this as in most other Board schools the teaching staff stands in need of strengthening, a matter which will be attended to on its transfer to Departmental management in January next.

(ii) *Training Schools for Mistresses.*

Number and strength of training schools for Mistresses.

100. Appendix F gives particulars of the training schools for Mistresses. The number of institutions remained the same as in the previous year, but that of students continued to decrease, falling from 289 to 253. Eight out of 13 schools shared in the decrease. This is chiefly to be attributed to a stricter carrying out of the provisions of the Grant-in-Aid Code, which require that only such as bind themselves to serve as teachers for a term of years immediately on completion of the course shall be admitted for training.

Three institutions, with 77 students, were maintained by the Department, one, with 11 students, by the District Board of Malabar, and the remaining nine, with 165 students, were aided schools. In 1889-90 the aided schools had 202 students under training, so that the whole of the decrease in attendance appertained to these institutions.

Classes of the community represented by the students.

101. From a comparison of the figures showing the classes of the population to which the students belonged, it will be observed that Native Christians show the greatest falling off in numbers. It has just been said that the whole of the fall in the number of students was connected with the aided schools. These schools are under Mission management and are mainly intended for the training of Native Christian teachers. Muhammadans increased by one, but the other

Classes.	1890.	1891.
Europeans and Eurasians	25	21
Native Christians	216	186
Muhammadans	12	13
Brahmans .. .	6	5
Non-Brahman Hindus	30	28
Total	289	253

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

sections were poorly represented. Nearly one-half of the students were of the middle classes, whereas in training schools for Masters only 23 per cent. of the students belonged to that class.

Another noteworthy feature is that only 79 students were reading English against 145 on the 31st March 1890. This is a consequence of the fact already alluded to that the decline in attendance took place in training schools supported by missionary bodies for the training of Native Christian teachers, among whom there is a greater desire to know English than exists among Hindus and Muhammadans.

Qualifications of the staff.

102. The qualifications of the teaching staff employed in training schools for Mistresses as compiled from the returns furnished to this office are indicated below :—

Qualifications of Teachers.	In Government schools.	In Board schools.	In Aided schools.	Total.
Educated in Europe	1	...	...	1
Hold L. T. diploma or normal certificate	7	2	17	26
Hold ordinary certificate	...	...	2	2
Have passed a public examination, but hold no teachers' certificate ...	3	...	2	5
Have not passed a public examination	...	...	1	1
Total ...	11	2	22	35

The total number of teachers was 35 against 42 in the previous year. The decrease was probably due to a re-arrangement of the staff in the normal and practising branches. The grades of Normal and Ordinary certificates and the standard of general education of uncertificated teachers are noted in the margin. The proportion of certificated teachers is almost the same as in training schools for Masters.

Grades.	Normal.	Ordinary.	General education.
Collegiate	...	1	...
Secondary { Higher ...	4	...	2
Secondary { Lower ...	17	1	3
Primary { Higher ...	2	...	...
Primary { Lower ...	3	...	...
Total ...	26	2	5

Work done by training schools for Mistresses.

103. A larger number of trained students—96 against 77—were employed as teachers during the year. But, gauged by the results of the public examinations, the training schools for Mistresses did not as a whole acquit themselves so well as in 1889. For the School Management examination 12 more candidates appeared, but only 65 were successful against 98. There was a decrease both in the number examined and in the number passed for the Higher Examination for Women and the Special Primary examination. The Middle School results were comparatively better, though the proportion passed compared unfavourably with that of the year preceding.

Training schools for Mistresses, Northern Circle.

104. The Sharkey Memorial Boarding Girls' Normal school was not re-opened during the year. There was thus not a single training school for Mistresses in the whole of the Northern Circle.

Training schools for Mistresses, Central Circle.

105. In the Central Circle there were five training schools as in the previous year. The Presidency Training School for Mistresses and the Free Church Mission Christian Female Normal school had fewer students than in 1890, but the remaining three schools in the circle more or less improved in numbers. At the several public examinations, the Special Primary excepted, the Presidency Training School did fairly well, and 24 against 20 trained mistresses found employment as teachers. Proposals were under consideration towards the close of the year to increase the staff, so as to enable the institution to prepare candidates for the Upper Secondary Examination. Mysore and Travancore sent one student each, while not less than 20 students were drawn from nine mofussil districts. The Hobart Muhammadan Normal class was 13 strong against 12, and the six candidates presented for the Special Primary examination were all successful. This result is very creditable to the Head Mistress. It also shows that the supervision exercised by the late Miss

Schools for Special or Technical Training.

Pratt, who had general charge of the school, was not confined to a merely nominal control. Excepting at the Higher Examination for Women, the Christian Female Normal school did well at the public examinations, though the attendance had fallen. The Free Church Mission Boarding Girls' School received an accession to its strength and passed all the five students it presented at the School Management examination. The Roman Catholic school, Cuddalore, passed only two out of 14 candidates at that examination, which does not speak well for the attention paid to the training of the students.

Training schools for Mistresses, Southern Circle.

106. There were six training schools in the Southern Circle. The standard of the Government Female Normal school, Coimbatore, was raised to the Primary Higher grade. At the Middle School examination, it passed six students out of seven sent up, but, at the Special Primary examination, not one of the 13 who were examined met with success. The attendance was better than in the previous year. The S.P.G. Female Normal school, Trichinopoly, and the American Mission Female Normal school, Madura, were poorly attended and had a very small share of success at the School Management examination. The former institution did not pass any of its five students at the Special Primary examination. An appreciable advance is noticeable in the strength of the Sarah Tucker Training school, Palamcottah ; no candidate, however, appeared from it for the School Management examination. The Victoria Female Normal school, Tuticorin, had five students only on the rolls against 26 on the 31st March 1890. The St. John's Female Normal school, Nazareth, passed one-half of its students at the School Management examination, but the normal department was weaker at the close of the year than at the beginning.

Training schools for Mistresses, Western Circle.

107. Both the training schools for Mistresses in the Western Circle were weaker than at the close of 1889-90. The Moyan Female Normal school, Tellicherry, passed only three out of 12 students at the School Management examination and one out of three at the Special Primary examination. These results are not creditable to the Head Mistress. The institution stands in need of more careful supervision, and it is under contemplation to take it under Departmental management. The St. Ann's Normal class, Mangalore, was very successful at the Higher Examination for Women and the Middle School examination. Though the school was open to all classes, no native teacher had joined it.

(iii) *Schools of Art.*

School of Arts, Madras.

108. The year witnessed a further advance in the attendance at the School of Arts, which rose from 364 to 424. The increase extended to almost all the classes, more especially the Middle School class, and was participated in by all sections of the population, Muhammadans excepted. It is also encouraging to observe that three Native Christian women attended for a course of instruction in Drawing, and that nearly a third of the pupils in the school were of the artisan class. The results of the examination of the general education classes were very poor, but those of the Higher Examinations in Science and Art and of the Middle School Examination were on the whole fair. Eight students completed the first and four the second stage of the Preliminary Higher Examination against seven and four, respectively, in the previous year. The progress of the Industrial sections was even more satisfactory. A separate branch for goldsmith's work was formed during the year, and all the Industrial branches had a larger number of apprentices and students on the rolls. The valuable coloured designs of oriental carpets in the South Kensington Museum, which were photographed under the direction of Mr. Purdon Clarke, arrived towards the close of the year, and a carpet maistry from Warangal was about to join the institution. The carpet-weaving branch thus bids fair to become a success. Four students obtained employment as Drawing Masters. Fees and school manufactures fetched Rs. 1,010 and Rs. 8,213 against Rs. 826 and Rs. 9,894, respectively, in 1889-90. Excluding buildings and including liabilities, the charges aggregated Rs. 38,156 against Rs. 39,527, and the net outlay amounted to Rs. 26,626 against Rs. 26,605. The cost of educating each student in the Drawing and Industrial departments was Rs. 32 and Rs. 138 respectively.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

109. All the students of the Junior F.A. class of the Rajahmundry College attended the drawing class, which was supplied with a set of excellent drawing models from the School of Arts. In addition to his work in the college, the Drawing Master taught pupils in the High school and in the Government and Innespettah Girls' schools. The fees collected in the college and High school amounted to Rs. 222, which covered more than a third of the outlay on the class.

Drawing Class, Rajahmundry College.

110. There was an increase of nearly 50 per cent. in the number of artisans attending the Drawing class at the Kumbakónam College. Six students passed the Higher examination and 17 the Middle School examination against two and 14, respectively, in 1889-90. One of the successful students was appointed Drawing Master of the Board Normal school, Tanjore. The fee income amounted to nearly Rs. 90. Government has sanctioned the continuance of the class pending the elaboration of proposals for the establishment of a Technical Institute at Kumbakónam.

Art Class, Kumbakónam College.

(iv) *Schools of Medicine.*

111. The school departments of the Medical College consist of three branches designated the Apothecary department, the Hospital Assistant department and the Chemist and Druggist department. Including 30 female students there were 46 students on the 31st March in the Apothecary department, who were being prepared for the college diploma of Apothecary. The results secured by the female students at the final examination were good, while those of the primary examination were very fair. The Chemist and Druggist department contained four, and the Hospital Assistant department 178 pupils. The increase in the latter department was due to a large number of Military and Private Medical pupils having joined the institution during the year. The results of the final examination of the Hospital Assistant grade were an improvement on those of the previous year.

School departments of the Medical College.

112. There were only 10 pupils under instruction in the Board Medical School, Nellore, against 16 on the 31st March 1890. This decrease was due to fresh admissions not having been made before the close of the year. The Superintendent reports favourably of the conduct and diligence of the pupils. The idea of affording a medical education to Native women has had to be abandoned for want of suitable applicants.

Board Medical School, Nellore

113. The Prince of Wales' Medical School, Tanjore, regained partly the loss in numbers it had sustained in the previous year.

Prince of Wales' Medical School, Tanjore.

I would note here that in the three medical schools borne on the Departmental returns, 33 Brahman pupils were reading against 31 in 1889-90.

(v) *Schools of Engineering.*

114. The school department of the College of Engineering was 156 strong against 113 at the close of the previous year. All the classes participated in the increase, notably the Draughtsman and Engineer Subordinate classes. Hindus formed the bulk of the additional students. There were two Muhammadans, 13 Native Christians and 14 Europeans and Eurasians, against nine, 11 and 13, respectively, on the 31st March 1890. One-half of the pupils were sons of officials and nearly 30 per cent. came from the landholders class, while artisans were represented by six pupils. At the final examination held by the Board of Examiners five out of seven students of the Engineer Subordinate class, six out of eight of the Draughtsman class, and all the five students of the Surveyors' class, who were in their final year's course, were successful. All the three scholarship-holders of the Victoria Technical Institute passed in Mensuration and Drawing, and a goodly number of students presented themselves for, and passed in, a variety of subjects included in the notification relating to the Higher examinations in Science, Arts, Industries and Commerce. Twenty students of the Maistry and Artisan class appeared for the Middle School examination in technical subjects, and two passed in Mensuration, six in

School department of the College of Engineering.

Schools for Special or Technical Training

Building Materials and Construction, and four in both. Three Engineer Subordinate students spent the year at the Public Works Workshops and 12 were employed in various circles where important works were under execution. Their progress was reported on favourably. With a view to greater attention being paid to the application of principles, the number of marks allotted for practical work was doubled during the year. Nine passed Engineer Subordinates were posted to the Public Works Department and all the passed Draughtsmen are reported to have succeeded in securing employment. The above brief resumé of the work of the school department shows that it made substantial progress during the year.

(vi) *Schools of Agriculture.*

School department of the College of Agriculture, Saidapet.

115. Including 17 senior students in their first year of study, there were 34 pupils on the rolls of the School department of the College of Agriculture, against 40 on the 31st March 1890. The decrease from 25 to 17 in the number of pupils is probably due to the orders of Government of July 1890 directing the closing of the junior department. Nine out of 11 district scholarships were appropriated, Cuddapah and Nílgiris having nominated no pupil. Of the nine scholarships, three were conferred on Non-Brahmans. Fair progress was made by the students, though the results of the public examinations in certain subjects were not so favourable as those of the year previous.

Farm-schools.

116. Government, in passing orders on the report of the Agricultural Committee, sanctioned the opening in representative districts of five farm-schools to afford instruction in the compulsory subjects of the Upper Secondary examination and in Agriculture and the allied subjects, the institutions to work under the control of the Director of Public Instruction and the Director of Agriculture. The schools were not opened, however, during the year, as the details regarding the curriculum of studies, the establishment, stipends and other matters had not been settled. A committee was appointed in November under paragraph 13 of G.O., dated 4th July 1890, No. 515, Revenue, to report fully on several of these points; but its report had not been submitted when the year closed.

(vii) *Schools of Commerce.*

Chengalvaraya Nayakar's Commercial High School, Madras.

117. In consequence of the small size of the evening classes, and probably also of the unfavourable results of the first Upper Secondary examination, the Chengalvaraya Nayakar's Commercial School sustained a serious decline in strength—from 162 to 91. All the students presented for the Higher examination in Phonography and in Banking with Political Economy were successful.

Bishop Corrie's Commercial Class.

118. A special class for Book-keeping and Commercial Correspondence was opened in Bishop Corrie's Grammar School. It had 26 pupils on the rolls at the close of the year. Eight candidates were sent up for the Higher examinations in Book-keeping, held in October 1890, of whom four passed.

(viii) *Schools of Industry.*

119. To the list of industries taught in Industral schools and classes, there were two additions during the year, namely, cotton embroidery, and tape-making. In the margin will be found the number of pupils receiving instruction in the several industrial subjects in special institutions and classes. One great obstacle is the want of qualified instructors.

List of Industries taught in schools.

Engraving	82	Weaving (carpet)	35
Carpentry	924	Lace-making	63
Blacksmith's work	98	Painting	18
Rattan work	68	Tape-making	5
Tailoring	117	Gardening	140
Book-binding	16	Boot and shoe-making	35
Embroidery	55	Cotton embroidery	15
Braid-making	7	Tin-work	2
Weaving (cloth)	69	Agriculture	167

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

When these are available, there is every hope that industrial instruction will become more widely disseminated and will improve in its character.

Number and strength of Industrial schools.

120. It will be seen from the particulars furnished in appendix G. that there was no change during the year in the number of Industrial schools, but that their attendance rose from 739 to 992. This is mainly due to the establishment of the Technico-Normal school, Madura, which took the place of the Municipal Industrial school in that town. The Municipal Victoria Industrial school, Negapatam, which had never flourished, was handed over to the management of a private committee. The number of students receiving industrial education in special classes attached to various institutions fell from 1,015 to 1,000.

Regular instruction in Drawing was given in four Industrial schools; whereas it was only in the Industrial school, Nazareth, that it was imparted in the previous year. The number of pupils learning Drawing rose from 29 to 266. This is one of the most satisfactory features of the year in connection with industrial education, and I hope that the vital importance of a knowledge of Drawing for industrial progress will be more and more appreciated. Carpentry was taught to 296 pupils or 47 more than in the year previous. Seven schools taught one industry only, three taught two industries, two taught three, three taught four, and the remaining four gave instruction in five industries, exclusive of Drawing.

121. The increase in the number of pupils learning industries was participated in by all sections of the population. Native Christians more than regained the loss in numbers they had sustained in the previous year, and formed more than a third of the total attendance. Next to them rank Muhammadans with nearly a fourth of the pupils. The increase here, as well as that under Brahmans (from six to 73), is mainly due to the opening of the Technico-Normal school, Madura, in which instruction is being imparted in several industries.

Classes of the community represented by industrial pupils.

Classes.	1890	1891.
Europeans and Eurasians ...	84	139
Native Christians	338	375
Muhammadans ..	199	242
Brahmans	6	73
Non-Brahman Hindus ..	112	162
Others	..	1
Total	739	992

122. The year under report witnessed a greater improvement in the qualifications of the teachers than either in the attendance or in the variety of industries taught. This is so far satisfactory. The number of teachers, who had passed no public examination, fell from 53 to 35. As the Department is constantly bringing pressure to bear on Managers of industrial schools to require such teachers to pass at least the Elementary examinations in the special subjects which they teach, I trust that their number will steadily, if but slowly, diminish. Many years must elapse before even the more important schools are placed under teachers who have passed the Higher examinations in Science, Art, Industries and Commerce. European and Eurasian teachers fell from 12 to eight, the number of Muhammadan teachers remained the same, while Native Christian and Hindu teachers rose from 21 and 30 to 25 and 34 respectively.

Qualifications of the Staff

Qualifications of Teachers.	1889-90.	1890-91.
Teachers educated in Europe or America	2	1
Teachers who have passed the Higher examinations in Science, Art and Industries	2	4
Teachers who have passed the Middle School examination in Technical or Industrial subjects ...	23	41
Teachers who have passed no examination	53	35
Total	80	81

Work done by Industrial Schools

123. Twenty-seven students passed the Higher examinations in Industries—22 from the Nazareth school and five from the American Mission school, Arni. At the Middle School examination, 73 pupils passed, of whom 59 belonged to the Nazareth school. From these schools 251 pupils earned grants for the Industrial standards, of whom 117 were from the Nazareth school. With the improvement in the staff noted above, a larger number of pupils should pass the industrial standards in future.

The approximate value of the articles manufactured by Industrial schools is returned as Rs. 41,801 against Rs. 35,622 in the previous year; but the actual sum realized from sales during 1890-91 is reported to have amounted to Rs. 36,033. Managers were requested to give the approximate expenditure, excluding labour, on the school manufactures sold during the year, with a view to enable this Department to ascertain roughly how the schools have worked from a commercial point of view; but complete information has not been furnished, probably because correct details have not been kept of outlay on materials and stock. The returns show the cost of production as Rs. 26,450, implying that a profit, of Rs. 9,583 or 36 per cent. was made during the year. These figures, if they can be relied on, may be regarded as satisfactory, especially when it is borne in mind that the primary aim of these schools ought to be educational, not commercial.

Industrial schools, Northern Circle.

124. The Municipal Industrial school, Masulipatam, had 15 pupils against 39 on the 31st March 1890. All were learning Carpentry under a teacher who has passed the Middle School examination. The Industrial school for Muhammadan women at Guntúr was reduced in strength with a view to curtail expenditure; and the value of work done fell in consequence from Rs. 4,000 to Rs. 1,300. None of the four teachers had passed any examination.

Industrial schools, Central Circle.

125. There was no change in the number of Industrial schools in the Central Circle, but the attendance rose from 323 to 384, the St. Patrick's Orphanage, Adyar, and the Anjuman mainly contributing to this increase.

Only seven girls were receiving instruction in Embroidery and Braid-making in the Hobart Muhammadan Girls' school.

Though showing a slight improvement in numbers, the Municipal Industrial school, Chidambaram, did not progress.

The American Mission Industrial school, or rather class, at Nellore, had only seven pupils learning Carpentry. It did not show any sign of improvement, though it had the advantage of working under a manager educated in America.

The strength of the industrial branch of the Madras Industrial School remained the same, and three industries were taught, as in the previous year. Of the 34 pupils presented for the grant examination, 29 passed, but only two with merit. This does not speak well for the instruction imparted. During the year the Government expressed its willingness to assign to the Department for the location of this school the premises in Egmore known as "Grassmere," and called for detailed proposals for working the institution in connection with the Civil Orphan Asylum; but the managing committee had not matured any scheme before the close of the year. Articles valued at Rs. 10,935 were manufactured, which shows that the workshop was more active than in 1889-90. From the sale of articles costing Rs. 8,514, the school realized Rs. 10,538, a fair profit.

There was an accession of 10 pupils to the attendance of the Anjumani-Mufeed-i-Ali-Islam. Instruction was given in four industries, but the qualifications of the staff were still low. The results of the examination in industries were satisfactory, 45 passing, 20 with merit, out of 49 pupils presented for the standards. Articles sold during the year are reported to have fetched Rs. 5,902, while they cost the Managers Rs. 2,152 only. I am inclined to doubt whether in this case the cost has been correctly calculated.

The Industrial section of the St. Patrick's Orphanage at Adyar was 88 strong against 32 on the 31st March 1890. Drawing was made compulsory in all the classes. The results of the public examination and of inspection were very satisfactory. An improvement took place in the qualifications of the staff. No less than 50 pupils were receiving instruction in instrumental music. Articles valued at Rs. 2,455 were manufactured during 1890-91.

Four industries—Carpentry, Rug-weaving, Tailoring and Printing were regularly taught in the American Mission Industrial school, Arni, and facilities were afforded for instruction in Blacksmith's work. The industrial instructors were ordinary workmen, though the Superintendent is a gentleman possessing a practical knowledge of the industries taught in the school.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

126. There was an appreciable rise in the number of pupils receiving industrial instruction in the Southern Circle. This is chiefly to be attributed to the opening of the Technico-Normal school, Madura.

Industrial Schools, Southern Circle.

Of the 242 pupils in the Madura school, 113 were receiving instruction in Drawing and 90 in Agriculture, a farm being attached to the school. Mr. Havell, of the School of Arts, visited the institution and found it in good working order under a well-qualified staff. Measures for its further improvement were suggested by him. If the Board continues to take the same interest in it, there is reason to hope that this institution, the first of its kind, will prove a success and serve as a model for other technical schools.

As in the previous year 21 pupils were under instruction in the Municipal Industrial school, Tinnevelly. But the progress of the school was anything but satisfactory.

In the Wesleyan Mission Children's Home, Karúr, five industries were being taught, and the Drawing class was attended by 33 out of 46 pupils on the rolls. All the industrial instructors passed the last Middle School examination in their respective trades. The District Board of Coimbatore and the Karúr Municipal Council have very wisely instituted a few stipendiaryships in the school for non-Christian artisan pupils. All the pupils presented for grant examination in industries passed, two-thirds securing merit grants, but the results of the Middle School examination were very poor. Articles which cost Rs. 6,518 were sold for Rs. 8,011, a fair margin for labour, and the value of articles manufactured during the year is approximately estimated at Rs. 9,478.

The Victoria Industrial school, Negapatam, made progress under the new management. Seventeen pupils appeared for the Standard examinations, of whom 10 passed. Three of the teachers have passed the Middle School examination in industries.

Instruction in Carpentry and Blacksmith's work was given to 28 against 16 pupils in the Industrial school at Erukatancheri maintained by the Lutheran Mission. The results of the grant examination, though fair, were not so favourable as those of the year previous.

The S.P.G. Lace school, Trichinopoly, was attended by 11 Native Christian girls, presumably boarders. Two pupils from this school passed the last Middle School examination in Lace-making.

Twenty-eight Native Christians of the poorer classes were on the rolls of the S.P.G. Industrial school, Ramnad—18 in the Printing and 10 in the Book-binding sections. The work of the school, as shown by the examinations, was not very good, only one passing the Middle School examination, and 13 out of 26 the grant examination.

The Art Industrial school, Nazareth, received a further increase to its strength. Native Christians numbered 113 out of 122 pupils. Thirty-two pupils were receiving instruction in Drawing and Engraving, 33 in Carpentry and Blacksmith's work, 29 in Tailoring and 28 in Weaving. Nearly all the pupils presented for the public and grant examinations were successful. This is highly creditable to the Rev. A. Margoschis, under whose able management the school has been rapidly improving in its standard and efficiency, and has become a model for Technical and Industrial schools throughout Southern India. The value of manufactures fell from Rs. 2,797 to Rs. 2,145.

The Lace class under the same management, attended exclusively by Native Christian boarders, was attended by 47 against 36 pupils. Four girls passed the Higher examination and 17 the Middle School examination. The sale of lace yielded Rs. 512.

Carpentry and Tailoring were taught to nine pupils in the S.P.G. Industrial school, Puthur, Trichinopoly. The institution was defective in organization and had a poorly qualified staff.

127. There was no Industrial school in the Western Circle. But, as I said last year, the Industrial branches of the Basel Mission are in reality well equipped Industrial schools.

Industrial Schools, Western Circle.

128. Industrial or technical instruction was imparted in 15 against 14 Government and other institutions. Carpentry was introduced into the Municipal High schools, Chicacole and Anakapalle, Drawing into the London Mission High school, Vizagapatam, and Carpentry and Drawing into the Board Normal school, Rajahmundry. On the other hand, the special classes at work in connection with the Municipal school, Tirupatúr, the Board school, Suramangalam, and the Protestant Orphanage, Bellary, were closed during the year. There was a net decrease of 19 pupils in the number receiving such instruction. An appreciable increase will be noticed in the number of pupils learning Drawing, and, when the Board Normal schools have been taken over by Government, a still greater improvement may be expected. Carpentry continues to be the most popular subject. Electro-metallurgy was taught in only one institution, viz., the Government College, Rajahmundry; but the class was poorly attended, and did not meet with the success that was expected of it. The Telegraph class, attached to the Lawrence Asylum, Ootacamund, was ordered by the Superintendent-General of Telegraphs to be closed for want of sufficient attendance.

Industrial and technical classes attached to Government and other institutions.

(ix) *Ordnance Artificers' School.*

129. The Ordnance Artificers' school, attached to the Gun Carriage Factory, which has been in existence for over 20 years and which has done very useful work for the class of pupils for whom it was designed, was closed in December last.

Ordnance Artificers' school, Madras.

(x) *Reformatory School, Chingleput.*

130. Doctors Nailer, Patch and Sarkies successively held charge of the Reformatory School during the year, but the working of the institution did not suffer by the changes. There were 50 admissions and 19 discharges, so that the number of pupils on the 31st March last was 140 against 109 on the corresponding day in 1890. Of the 19 pupils discharged, seven being over the maximum age, were transferred to jails, nine found employment in various capacities, one is in jail, and nothing is known of the remaining two pupils. The unfavourable season affected to some extent the general health of the pupils, but there was no case of death. All the pupils that appeared for the Primary School examination, and 103 out of 112 examined by the Assistant Inspector under the different standards, secured a pass, which is very creditable to the teaching staff. The results obtained at the industrial examination, held by Mr. Chatterton, of the College of Engineering, were, on the whole, good. Due attention was also paid to the physical education of the pupils, and they successfully competed at the annual sports, which were thrown open to pupils in other schools in the town. The manufacture account resulted in a profit of Rs. 363, which is also encouraging. No punishment whatever is recorded against 76 pupils. This is due to the successful working of the mark-system and the strict discipline and moral training in force in the institution. There were only two attempts at escape, but the defaulters, in both cases, were newly-admitted pupils. The accommodation is both unsuitable and insufficient, but nothing can be done to remove this drawback until Government decides, once for all, where the school is to be permanently situated. The Committee of Visitors met only twice during the year. The cost fell to Rs. 140-9-7 per head.

Reformatory School, Chingleput.

VII.—FEMALE EDUCATION.

(a) *General Condition of Female Education.*

131. The inspecting staff for girls' schools continued to be the same as in 1889-90, but, as the first Range was too extensive for a single Sub-Assistant to manage, the girls' schools in the Ceded Districts were, as a tentative arrangement, inspected by the Sub-Assistants in charge of boys' schools. The increasing number of girls'

General condition of female education.

FEMALE EDUCATION.

schools has, however, rendered the continuance of this make-shift arrangement undesirable in the interest of female education. The total number of schools and of scholars rose from 921 and 43,563 to 1,021 and 48,090, respectively, showing thus a marked increase of 10·8 per cent. in schools, and 10·4 per cent. in scholars, against 3·4 per cent. in each in the preceding year. Excluding 1,706 boys reading in girls' schools, and including 41,331 girls attending boys' schools, it will be found that the number of girls under instruction rose from 78,344 to 87,715, or by 12 per cent. against 12·1 in 1889-90. So far as statistics go, female education has made steady progress during the past five years, as will be seen from the figures in the margin, the proportion of increase during the period approximating to 35 per cent. One fact, among others, which deserves special mention here, is the large addition to the number of Muhammadan girls under instruction. The impression which female education has produced upon the Brahman community is as yet very inappreciable, especially when it is viewed in relation to the educational condition of the opposite sex. Of the girls at school, nearly one-half attended boys' schools. This shows, I think, that mixed schools are not so ill-suited to India as is sometimes supposed. The question of educating boys and girls side by side is one on which difference of opinion exists in Europe and America. Arguments in favour of mixed schools, which are sound when applied to the conditions of life in the West, will many of them fail if applied to the social conditions of India. But, making due allowance for all this, I cannot see any valid objection to little boys and little girls working side by side in the elementary standards, if their parents are satisfied with such an arrangement. It must not be forgotten that the question of allowing grown-up native boys and girls to study together is of little practical moment at the present day, when girls are withdrawn from school at so early an age. In discouraging mixed schools for little boys and girls, it appears to me that we are fostering a sentiment with regard to the seclusion of women, which, in the wider domain of social life, we condemn. If parents express a decided wish to have their girls educated in a separate school, their wish should be respected and, if possible, given effect to. But, if they are quite satisfied with the mixed school arrangement, it does seem to me utterly uncalled for to discourage them from sending their little girls to a mixed school, and thus to create an artificial sentiment in favour of the separation of the sexes even in the elementary school. With the paramount importance of spreading primary instruction ever pressing itself upon our attention, the mixed school for the Primary standards instead of being discouraged should be welcomed whenever and wherever the people are satisfied with it. Many a small village or town is able to support a fairly large school attended by both boys and girls, but would not be able to maintain two schools—one for boys and one for girls.

Year.	Number of girls under instruction on 31st March	Percentage of increase.
1887	65,137	...
1888	65,535	0·6
1889	69,873	6·6
1890	78,344	12·1
1891	87,715	12·0

In Public Schools for girls, the highest standard is the Upper Secondary. There is little or no demand for collegiate education in Arts for women, and, if there were, there would be no small difficulty in carrying it on without teachers of the opposite sex. Only two women have taken the B.A. degree in the Madras University, and the number of those who have graduated in Medicine is very small. The number of pupils in the different stages of instruction in Public Girls' schools for the last two years is compared below:—

Stages.	1890.	1891.	Difference.
Upper Secondary stage	178	233	+ 55
Lower Secondary stage	2,113	2,350	+ 237
Primary stage	40,809	44,774	+ 3,965

The improvement in the two higher stages, though small, is encouraging, and would have been more so if it had extended equally to all classes of the community.

In point of fact, however, it was confined largely to Native Christians and to a less extent to non-Brahman Hindus.

Through the exertions of Miss Carr and her friends, a Home Education class was started during the year in Salem with 20 pupils, so that the number of such classes at the close of the year was six and their attendance 431. The standard of the Home Education class, Cuddalore, was also raised to that of the Secondary grade. The Reading Association, formed at Kumbakónam, though still in existence, does not appear to have done much during the year. The Association of Women Teachers, Madras, contained 77 names on the rolls against 61 in 1890. Several interesting and instructive papers were read at the meetings by members and others. Occasionally the proceedings were varied by a model lesson. It is understood, however, that the meetings were not so regular or so well attended as was desirable.

(b) *Matriculation Examination and Higher Examination for Women.*

The Matriculation Examination.

132. Sixty-three female candidates appeared for, and 37 passed the Matriculation examination, against 36 and 16, respectively, in the previous year. Five passed in the first class and 32 in the second, the corresponding figures for 1889-90 being four and 12. The number of examinees and the results were thus far superior to those of 1889-90, and the percentage passed was nearly two-and-a-half times as good as the average for the Presidency. There was one Bengali candidate, but she failed. Two Parsis appeared and were successful. The proportion of passed to examined among the other sections was as follows:—Native Christians 62·5 per cent., East Indians 50, and Europeans 66·6. On the abolition of the Higher Examination for Women the number of female candidates coming up for the Matriculation examination will considerably increase.

The Higher Examination for Women.

133. Two hundred and seventy-eight candidates registered their names for the Higher Examination for Women against 233 in the year previous, and 160 were successful, the same number as passed the preceding examination. The candidates that brought up only one language seem to have fared better than those that brought up two. Fourteen took up English and Tamil, but only one passed. The results in English and in Tamil were generally satisfactory. The following statement shows the classes of the community to which the candidates belonged during the past two years:—

Classes of the community.	Registered.		Passed.	
	1889-90.	1890-91.	1889-90.	1890-91.
Europeans	49	77	34	54
East Indians	82	98	53	57
Native Christians	94	96	68	49
Other Hindus	7	6	5	...
Muhammadans	...	1	...	...
Brahmans	1	...	...	...
Total ..	233	278	160	160

It is not clear why the success of the Native Christian candidates was not as high as in 1889-90, and it is much to be regretted that the only Muhammadan and the six shown under "Other Hindus" failed to pass.

(c) *Public Upper Secondary or High Schools for Girls.*

Number and strength of Public Upper Secondary Schools for girls.

134. A detailed statement of Public High schools for girls is furnished in Appendix H. There were 29 such schools against 30 in the preceding year. The Mailapur European Convent Girls' school, which was an unaided institution in 1889-90, passed to the aided list.

FEMALE EDUCATION.

The marginally-noted schools raised their standards during the year from the Lower to the Upper Secondary. The High department of the first of these schools, however, contained only one pupil. The same was the case with the Church of England Zenana Mission Home Education classes, Madras. For want of pupils the six schools named in the margin were reduced to the standard of Middle schools, and the Rajahmundry Church of England school disappeared altogether from the list of Secondary schools. In spite of the decrease in the number of Upper Secondary schools, their total strength increased from 2,684 to 2,762. All the departments, except the Lower Secondary, shared in the increase, the rise in the Upper Secondary department, 31 per cent., being remarkable. There was a considerable fall in attendance in the Northern Circle, while the Central Circle remained almost stationary, except in the Upper Secondary departments. The other Circles had a fair increase. The results of the Higher Examination for Women in these schools were, on the whole, satisfactory, but those of the Middle School Examination were comparatively not so. Though the number that appeared for the latter examination was 230 against 157, the number passed was only 120 against 126. The High schools in the Northern Circle presented only 12 pupils and passed three. Those in the Western Circle presented 16 and passed 15. In the Central and Southern Circles, the percentage passed was over 50. Two schools in Madras were not represented in this examination.

Christ Church Girls' School, Nellore.
Davidson Street School, Black Town.
Medical Mission Girls' School, Rayapuram.
European Convent School, Coimbatore.
Stanes' Day Poor European School, Coonoor.
American Mission Practising School, Madura.

Timpany Memorial School, Cocanada.
St. Joseph's School, Cocanada.
Civil Female Orphan Asylum, Egmore.
London Mission School, Vepery
National Indian Association's Home Education classes, Madras.
S.P.G. Boarding School, Puttur.

Distribution of pupils in the Upper Secondary departments according to the classes of the community.

135. The classes of the community to which the pupils in the High School departments belonged are detailed below. Europeans and Eurasians formed 78 per cent. and the rest with nine exceptions were Native Christians :—

Classes.	1889-90.	1890-91.
Europeans and Eurasians	126	182
Native Christians	47	42
Muhammadans	...	...
Brahmans	...	1
Non-Brahman Caste Hindus	5	7
Others	...	1
Total ...	178	233

(d) *Public Lower Secondary or Middle Schools for Girls.*

Results of the Middle School Examination.

136. Including the pupils in High schools who appeared for the Middle School examination, the total number of girls examined, at the two examinations was 495, and the number passed 269, the corresponding figures for the previous year being 378 and 302. The percentage of success was thus unfavourable in comparison with that of the preceding year, 54 against 80. The sections of the community to which the candidates belonged are shown below ;—

Classes of the community,	1890-91.		1889-90.	
	Examined.	Passed.	Examined.	Passed.
European	112	61	84	63
Eurasians	161	81	124	101
Native Christians	207	117	161	132
Brahmans	2	2	1	...
Other Hindus	12	7	8	6
Parsis	1	1	...	...
Total ...	495	269	378	302

It is satisfactory that the one Parsi and the two Brahman girls who appeared passed. Not a single Muhammadan girl appeared for the Middle School examination.

Number and strength of Lower Secondary Schools for girls.

137. Particulars of Public Middle schools for girls are given below :—

Circles.	Government Schools.						Board Schools.						Aided Schools.						Unaided Schools.					
	1889-90.			1890-91.			1889-90.			1890-91.			1889-90.			1890-91.			1889-90.			1890-91.

FEMALE EDUCATION.

There was no change in the total number of Middle English schools, though one Government and one Board school had disappeared as such. But their attendance fell from 4,922 to 4,750. Middle Vernacular schools, however, rose from 125 to 167, and their total attendance from 9,452 to 12,564. The increase in the strength of the Middle departments from 687 to 999 is very satisfactory. Under Middle English schools, especially aided ones, the Central Circle had a large increase, while in the Northern Circle the increase was only slight, and in the Western, there was none. The Southern Circle showed a marked decrease. Under Middle Vernacular schools, there was an appreciable advance in all the Circles, especially the Southern. On the whole, Government and Board schools rose from 34 to 40, and Aided schools from 144 to 182, and the total strength of all the Middle schools from 14,374 to 17,314, giving thus an average of about 76 per school in both the years. The strength of the Middle departments rose from 1,460 to 1,715. The record of the Lower Secondary education of girls, unlike that of boys, was, on the whole, highly satisfactory.

Distribution of pupils in the Lower Secondary departments according to the classes of the community.

138. In the Lower Secondary departments of High and Middle schools the several classes of the community were represented as follows :—

Classes.	1889-90.	1890-91.
Europeans and Eurasians	623	518
Native Christians	1,028	1,209
Muhammadans	23	39
Brahmans	53	79
Non-Brahman Caste Hindus	370	457
Others	16	48
Total ...	2,113	2,350

An improvement took place under all classes—Europeans and Eurasians excepted.

(e) *Public Primary Schools for Girls.*

Results of the Primary School Examination.

139. For the Primary School examination, 509 pupils appeared against 103 in the previous year, and 348 passed, though only 146 secured complete certificates. This increase is satisfactory, as girls reading for the Fourth standard are not required, like boys, to appear for this examination. Madras, Malabar and Vizagapatam presented the largest number of female pupils. The sections of the population to which the girls that appeared for and passed the examination belonged are indicated below :—

Classes.	Examined.	Passed.
Europeans	16	15
Eurasians	56	44
Native Christians	161	102
Muhammadans	38	34
Brahmans	44	30
Non-Brahman Hindus	194	123
Total ...	509	348

The percentage of success among Muhammadan girls was 89, which is very satisfactory. The institution of 64 Government stipendiary scholarships to enable the passed candidates of the Primary School examination to continue their studies for the Lower Secondary course will, I trust, induce a larger number of girls to carry their education to a higher stage.

Number and strength of Public Primary schools for girls.

140. The following figures relate to the number and strength of Public Primary schools for girls :—

Class of schools.		1889-90. Schools.	1889-90. Scholars.	1890-91. Schools.	1890-91. Scholars.
Under public management.					
Government ...	Upper Primary	24	1,191	29	1,626
	Lower Primary	12	453	17	782
Board	Upper Primary	24	1,234	23	1,191
	Lower Primary	37	1,479	43	1,772
Under private management.					
Aided	Upper Primary	178	9,515	203	9,825
	Lower Primary	267	7,885	277	8,209
Unaided	Upper Primary	19	786	11	658
	Lower Primary	122	3,499	125	3,218
Total ..	Upper Primary	245	12,726	266	13,300
	Lower Primary	438	13,316	462	13,981
Grand Total ...		683	26,042	728	27,281

Upper Primary schools advanced by 21 with 574 pupils, and Lower Primary by 24 with 665. To the list of Government schools there was an addition of 10 schools with 764 pupils. This was due to the establishment of new schools during the year. Board schools had an accession of only five schools. Female education being primarily a charge on Provincial funds, it has been the policy of the Department not to recommend to Boards the opening of girls' schools, but to advise them to devote the funds at their disposal to the development of elementary education among boys. Public schools under private management rose from 586 to 616, and their attendance from 21,685 to 21,910. A large number of unaided schools passed to the aided list during the year, and of the unaided schools not a few are returned as such, owing to their not having drawn a grant within the year. The average strength of Upper Primary schools was 50 against 52 in 1889-90, but that of Lower Primary schools remained unaltered at 30.

Distribution of girls in Primary schools and classes according to districts.

141. Informations regarding girls reading in Primary schools and classes is shown in the annexed statement:—

Districts.	Girls of school-going age (approximate).	Number of girls on the 31st March in Primary schools.	Number of girls on the 31st March in Primary classes of Secondary schools.	Total.	Percentage of column 3 to column 2.	Percentage of column 5 to column 2.	Total attendance for 1889-90.	Percentage of column 8 to column 2.

FEMALE EDUCATION.

There was a highly satisfactory increase of 10,243 in the total number of girls receiving primary instruction, though, in consequence of the adoption in the present report of the approximate census figures of 1891, it would appear that the percentage of girls under instruction to the female population of school-going age remained the same as in 1889-90. The percentage of girls in the primary stage to those of school-going age advanced in all the districts, notably in Madras and Malabar. Another pleasing feature is that in Madras and Nílgiris, the number of girls in primary classes of Secondary schools was nearly twice as many as that found in Primary schools proper, which augurs well for the development of Secondary education among girls in these districts. More than five per cent. were under instruction in the primary stage in four districts against three in the previous year. In spite of the advance noticed above, the last ten districts in the list were still very backward in this respect, less than two per cent. of the girls of school-going age in them being under instruction. The position occupied by Madura is not creditable to that district.

Primary schools for girls managed by the Department.

142. Upper Primary schools managed by the Department increased from 24 to 29, and their attendance from 1,191 to 1,626. Similarly Lower Primary schools rose from 12 to 17, and pupils therein from 453 to 782. Vizagapatam, Ganjam, and Coimbatore had four, three and two additional Primary schools respectively. In the Kurnool district, a Lower Primary Girls' school was opened for the first time. In Bellary, Cuddapah and North Arcot, there were no Government Primary schools for girls. As the funds at the disposal of the Department are limited and will not allow of girls' schools being opened everywhere, it is to missionary and other private efforts that Government chiefly looks for the spread of female education, the Department aiding such efforts to the maximum limits admissible under the Grant-in-aid Code. The following is a comparative statement for two years of the Government Primary schools for girls :—

Districts.	1889-90.			1890-91.		
	Schools.	Scholars.		Schools.	Scholars.	
		Upper Primary.	Lower Primary.		Upper Primary.	Lower Primary.

143. Upper Primary Girls' schools under Local Fund Boards had an increase of one school but of 130 pupils, which shows that the existing schools were considerably strengthened during the year. Lower Primary schools were credited with an advance of eight schools and 435 pupils. Godávari and Kistna continued to maintain the greater number of such schools. It is very disappointing, however, to find that only 54 girls in all the Upper Primary schools were reading in the Upper Primary classes. Details of Board Primary schools are furnished below :—

Primary Schools for girls managed by Local Fund Boards.

Districts.	1889-90.			1890-91.

144. Only seven against 12 Municipalities, viz., those of Vizagapatam, Cocanada, Conjeeveram, Gudiyátam, Máyavaram, Srírangam and Calicut maintained Primary schools for girls. The total number of these on the 31st March 1891 was ten, attended by 458 pupils, as will be seen from the following statement:—

Primary Schools for girls managed by Municipalities.

Municipalities.	1889-90.			1890-91.

The decrease is due mainly to the transfer of several of the schools to the Department.

FEMALE EDUCATION.

Aided and unaided Primary Schools for girls.

145. Aided and unaided schools in each circle are given in the following summary :—

Circles.		1889-90.						1890-91.					
		Aided.			Unaided.			Aided.			Unaided.		
		Schools.	Scholars.		Schools.	Scholars.		Schools.	Scholars.		Schools.	Scholars.	
			Upper Primary.	Lower Primary.		Upper Primary.	Lower Primary.		Upper Primary.	Lower Primary.		Upper Primary.	Lower Primary.

Total ...		445	795	16,605	141	81	4,204	480	824	17,210	136	38	3,838

The number of Upper and Lower Primary Aided schools rose by 25 and 10, respectively, but the increase in attendance in Upper Primary schools did not correspond with that in schools, so that the average strength declined. This is due to the small attendance in new schools. It is to be regretted that the number of pupils in the Upper Primary stage fell from 876 to 862. Tinnevelly, which contained the greatest number of aided schools had 183, Kistna 51, Chingleput 44, Tanjore 41, Madras 39 and Trichinopoly 31 schools. Little provision exists in the other districts for the education of girls through private effort.

(f) *Standard Examinations.*

Results of the Fifth, Sixth and Seventh Standard examinations.

Standards.		Number presented.	Number passed.
Fifth ...	1890-91	555	428
	1889-90	477	344
Sixth ...	1890-91	231	166
	1889-90	134	110
Seventh ...	1890-91	59	40
	1889-90	45	30

146. The results of the examination of the Fifth, Sixth and Seventh standards are contrasted in the margin. The number presented and the number passed were larger than in the previous year, and the percentage passed was also favourable, except in the Sixth standard in which it was 71·8 against 82·1. I am inclined to attribute this decrease rather to the raising of the standard than to deterioration in the quality of instruction.

147. The number of schools that presented and passed pupils for grant under the Primary standards is given in the margin. The percentage of schools that passed pupils to those that presented them for the Infant, First, Second, Third and Fourth standards was 98·3, 96·3, 91·9, 93·3 and 89·3, respectively. These figures are an improvement on those of the previous year. Only 11 per cent. of the schools that entered pupils for the Fourth standard failed to pass them, against 29 and 16 per cent., respectively, in 1889-90 and 1888-89. This may be taken to indicate a steady improvement in the teaching of the compulsory subjects in Girls' Primary schools.

Results of the Fourth and Lower Standard examinations.

Standards.	Schools that presented girls.	Schools that passed girls.
Infant	705	693
First	682	657
Second	583	536
Third	465	434
Fourth	270	241

FEMALE EDUCATION.

The following is a statement of the number of girls presented and the number passed for the Primary standards :—

Districts.	Number of girls presented.					Number of girls passed.

Trichinopoly	387	364	211	127	75	348	295	167	100	57
Madura	338	283	208	152	97	286	221	155	118	76
Tinnevelly	1,479	977	648	440	208	1,241	723	429	284	141
Malabar	2,062	1,824	1,017	525	448	1,628	1,227	715	396	243
South Canara	344	389	294	128	68	323	308	224	97	35
Total ..	11,380	9,382	5,689	3,273	1,699	9,220	6,634	4,017	2,401	1,076
Total 1889-90 ...	9,471	9,316	4,988	3,052	1,372	7,441	5,778	3,579	2,159	890

The total number presented and the number passed were, respectively, 11·4 and 17·6 per cent. in excess of the corresponding figures for 1889-90. The increase was shared in by all the districts, except Nellore and North and South Arcot. The advance shown by Cuddapah, Nílgiris, Malabar and South Canara was remarkable. The number presented and the number passed under the Fourth standard in Malabar rose from 121 and 84 to 448 and 243, respectively, and the greater part of the increase appertained to girls in boys' schools. In Bellary the decrease in the number presented under the First standard is marked and is probably due to some mistake in the returns submitted for 1889-90. The percentage passed is compared in the margin for the past two years. Under the Second and Fourth standards, there was a slight fall which need not be taken to indicate retrogression. Unlike what took place amongst boys, there was an appreciable advance in the proportion passed under the First standard. Out of 1,699 pupils examined, and 1,076 passed for Fourth Standard grants, only 199 were tested by the Primary School examination, and 131 of them passed.

Standards.	1889-90.	1890-91.
Infant	78·6	81·0
First	62·6	70·7
Second	71·8	70·6
Third	70·7	73·4
Fourth	64·9	68·3
Total ...	70·4	74·3

EDUCATION OF EUROPEANS.

VIII.—EDUCATION OF EUROPEANS.

148. The following summary exhibits the number and strength of institutions wholly or chiefly intended for the education of Europeans, including under this term Eurasians also. There was a net increase of two schools, but the attendance fell from 7,148 to 7,007 :—

Number and strength of schools wholly or chiefly intended for Europeans.

Grand total for all schools ...	92	94	7,148	3,855	3,152	7,007

Three of the Railway schools returned as girls' schools in the last list were classed in the year under report as boys' schools, and there was a net addition of one Middle school to the list. This explains the diminished number and strength of Secondary Girls' schools. It will be observed that only four out of 94 schools received no aid during the year. One of these, the Military Female Orphan Asylum, was supported from the Asylum funds. The two Government schools are the male and female branches of the Lawrence Asylum, Ootacamund. The Brooks Memorial school ranks as a Board school, being at present under Municipal management.

The total number of European and Eurasian boys and girls under instruction in all schools, European and other, furnishing returns to this office, was 7,011 against 7,007 on the 31st March 1889 and 7,060 on the corresponding date in 1890. The decrease below the figure of 1890 is chiefly due to the closing of the Ordnance Artificers' school, which contained 94 pupils. A large increase in the number of European and Eurasian pupils is not to be looked for, as, reckoned in the usual way, almost all the children of school-going age are already attending school.

Education of Europeans.

Of the 7,011 pupils, 3,430 or 49 per cent. belonged to the city of Madras, 809 to Malabar, 651 to Nílgiris and 455 to Chingleput, the other districts containing fewer pupils.

149. In the margin will be found the distribution of male and female pupils according to stages of instruction. The five in Arts Colleges were students of the Doveton College, and the eight in Professional Colleges were reading in the Medical College. A larger number of boys and girls were in the Upper Secondary classes than in the previous year, but the Lower Secondary classes were, on the whole, weaker. Twenty-one women were qualifying for Schoolmistresses' certificates, and 108 were attending special or technical schools in the Presidency town.

Distribution of European students according to stages of instruction.

Stage.	Boys.	Girls.
Arts Colleges	38	5
Professional Colleges	49	8
Upper Secondary	189	177
Lower Secondary	887	545
Primary	2,471	2,315
Special or technical	198	129
Total ..	3,832	3,179

Collegiate education.

150. There was no First-grade College specially intended for Europeans. Four candidates, however, appeared for the Language branch and three for the Optional branches of the B.A. Degree Examination from other institutions, of whom three and two, respectively, passed. The Doveton and St. Mary's colleges had together 40 European and other students preparing for the F.A. Examination against 32 in the previous year. Out of 19 students, who went up from those two colleges for the F.A. Examination, 10 passed. Forty-two European candidates in all appeared for the last F.A. Examination, of whom 16 passed. The proportion of successful candidates did not improve.

151. High school classes were opened in the St. Patrick's Orphanage, Adyar, which raised the number of Upper Secondary schools from seven to eight, and the attendance of European pupils therein from 877 to 1,006. From the figures in the margin, it will be observed that five out of seven schools in the last list declined in attendance. For the Matriculation Examination, 57 students appeared from the High schools against 56 in the previous year, but only 25 passed against 26. Including girls, the total number of European pupils examined and passed at the above examination, rose, however, from 186 and 75 to 208 and 91 respectively. Bishop Corrie's, St. Mary's and the Doveton schools presented 16, 13 and 16 candidates, of whom 10, 8 and 6, respectively, passed. Only one pupil passed from the Breeks Memorial School, Ootacamund. In the St. Aloysius' School, Vizagapatam, the results were a total failure, not one of the eight students it sent up having met with success. Both the High schools in Cochin declined in strength.

Lower Secondary or Middle schools for Europeans rose from 17 to 18, but the number of European pupils fell from 1,485 to 1,436. Madras contained six such schools, Salem and Nílgiris two each, and the districts noted in the margin one each. From these schools, 277 candidates appeared for the Middle School Examinations held in May and December, and 153 passed. The corresponding figures for the previous year were 197 and 70 respectively. The two examinations held in the year account for the larger number examined and passed. The Lawrence Asylum was 309 strong against 270 on the 31st March 1890, but only two candidates were presented for the Middle School Examination, of whom one passed. The Breeks Memorial School sent up 30 pupils, of whom 18 passed against none out of nine in 1889.

EDUCATION OF MUHAMMADANS.

Primary education.

152. To the list of Primary schools for boys there were three additions—one in Madras, one in Chingleput, and the third in Godávari; but the number of pupils under instruction fell from 395 to 389, in spite of the increase in the number of schools.

Female education.

153. The Railway schools at Pódanúr, Salem and Rénigunta were transferred to the list of boys' schools, and a school for European girls was opened in Negapatam. The number of Secondary Girls' schools for Europeans fell in consequence from 48 to 46, and the attendance from 3,186 to 3,028. Collegiate classes have not yet been opened in any of the High schools. Two Europeans joined the Presidency College after passing the F.A. examination from the Doveton College, and graduated in Arts during the year. When a few more women have taken the Arts diploma, it will be found possible to improve the staff of High and Middle schools for girls. The only candidate that appeared for the F.A. examination of December 1890 failed, but at the Matriculation Examination 30 passed out of 52 that appeared. The Doveton Girls' school presented five girls, of whom three passed. Of the 228 girls in the Upper Secondary stage, 177 or 78 per cent. were Europeans. The Medical and Educational departments continue to hold out fairly attractive prospects to educated young women, and this should induce a still larger number of them to seek higher general and professional instruction.

Special education.

154. In consequence of the abolition of the Ordnance Artificers' school, the number of special schools for Europeans fell from four to three. The Industrial department of the St. Patrick's Orphanage, Adyar, made progress. The working of the Industrial School, Black Town, has already been noticed in Chapter VI. There was a slight fall in the strength of the Music class attached to the Doveton Girls' school. The institution passed one pupil at the Higher Examination in Music. The inauguration of the School of Music is expected to give a powerful impetus to the development of musical instruction, vocal and instrumental.

Sausmond and Whitefield schools.

155. The Sausmond and Whitefield schools in the Mysore State, aided by the Department, were found to be in a fairly good condition when the Inspector visited them in September 1890. The attendance remained almost stationary. From the former school one girl passed the Special Primary examination. Instruction in singing was being imparted in these schools. Salary and special grants, amounting to Rs. 865, were paid to them during 1890-91.

156. Eight Railway schools were at work at the close of the year at the stations noted in the margin, and they were attended by 372 pupils (all Europeans and Eurasians), 165 boys and 207 girls, of whom 270 were children of Railway officials, and the rest of artisans. For the several results standards, 249 pupils were presented in all, of whom 219 or 88 per cent. passed. The expenditure on the upkeep of these schools amounted to Rs. 11,870, of which fees covered Rs. 2,541, and Government grants Rs. 2,490. Fifteen out of 29 teachers hold Normal or Ordinary certificates, while 14 have passed some general education test. The generally satisfactory condition of these schools is highly creditable to the Madras Railway authorities, who have always shown the utmost readiness to carry out the suggestions of the officers of this Department. These schools are all under the direct supervision of Mr. Marsden, the Inspector of Schools, Western Circle.

IX.—EDUCATION OF MUHAMMADANS.

Number and strength of schools wholly or chiefly intended for Muhammadans.

157. The year was one of great progress as regards the education of Muhammadans. The number of public schools, wholly or mainly intended for them, rose from 748 to 936 or by 25 per cent. and their attendance from 30,616 to 39,089, or by 28 per

EDUCATION OF MUHAMMADANS.

cent. The large decrease under private schools has already been explained to be due to returns not having been procured from a large number of mosque schools in Malabar. The following table furnishes particulars regarding Muhammadan schools :—

EDUCATION OF MUHAMMADANS.

Secondary schools show, on the whole, an advance of nine schools with 654 pupils, and two-thirds of the increase in schools and nearly 60 per cent. of that in scholars appertained to girls' schools. Public Primary schools numbered 908 with a total strength of 37,461 pupils, against 731 with 29,578 pupils in the previous year. Here too the advance made by girls was proportionately larger than that made by boys, being 29 against 26·4 per cent.

Public.	31st March 1890.	31st March 1891.

Primary schools	46,478	54,606
Training schools	107	155
Other special schools .	248	302
Total ..	49,990	58,613

The number of Muhammadan pupils under instruction in each grade of public schools has advanced considerably, as will be seen from the figures recorded in the margin. The advance of 17·2 per cent. in the number of Muhammadan pupils in public schools is not in proportion to the total increase in the number of Muhammadan schools. Including private schools, the net increase was about 2 per cent. only.

Distribution of Muhammadan students by districts

158. The percentages of Muhammadans under instruction to those of school-going age are shown below for each district, districts being arranged in the order of the proportion of boys at school to the male population of school-going age. The census figures of 1891 for each class of the community not being available, the totals of the previous census increased 15·48 per cent. have been adopted in this table on the assumption that in point of numbers the Muhammadan population has made the average advance during the past decade:—

Districts.	Muhammadans					
	Number of pupils of school-going age		Number of pupils under instruction.		Percentage of pupils to school-going age population.	
	Males	Females.	Males.	Females	Males.	Females.
Salem	4,363	4,488	2,951	449	67·6	10 0

Total ...	163,543	168,612	64,679	11,999	39 5	7 1

The proportion of boys under instruction to those of school-going age, as calculated above, was 39·5 per cent., and that of girls, 7·1 per cent., against 21·1 and 3·2 per cent., respectively, the general averages for the Presidency under all the sections of the population. These figures show that Muhammadan education has been receiving the attention of the State as much as the education of other classes, though the number of students from this class continuing their studies beyond the Primary and Lower Secondary stages is still disproportionately small. Several causes have been at work to bring about this state of things, the chief among which are the comparatively advanced age at which Muham-

madan boys begin their secular studies, the somewhat apathetic habits of the general body of pupils, the poverty of many of them and the social restrictions the community has been labouring under. A slow but steady improvement is, however, taking place in every direction. The largest number of Muhammadan pupils at school was found in Malabar on account of the Mappila population, but the largest proportion with regard to males, 67·6 per cent., was in the Salem District, and with regard to females, 20·1 per cent., in Godávari. The map attached shows the spread of education among boys in each district. The high position reached by Nilgiris, Ganjam and Vizagapatam is due mainly to the comparative smallness of the Muhammadan population in those districts. A decrease in the number of Muhammadan pupils under instruction took place in the three marginally-noted districts, but the increase, particularly under girls, was remarkable in the following:—

	1889-90.		1890-91.	
	Boys.	Girls.	Boys.	Girls.
Nellore	1,544	218	1,480	184
South Arcot ...	2,428	76	1,585	115
Malabar	25,029	6,345	20,903	6,202

	1889-90. Girls.	1890-91. Girls.		1889-90. Girls.	1890-91. Girls.
Ganjam	42	83	Salem	41	449
Kurnool	36	109	Tanjore	382	641
Bellary	47	170	Madura	4	98
Anantapur	34	96	Tinnevelly	151	227

As far as the education of Muhammadan girls was concerned, the Ceded Districts, South Arcot and Tinnevelly were bad, showing less than 3 per cent. of the female population of school-going age under instruction, and Madura was exceedingly bad, the proportion being ·7 per cent. only. Only seven districts, including Madras, had 10, or more than 10, per cent., of girls of school-going age at school.

Collegiate education.

159. There were no colleges for Muhammadans, nor is there any need for them at present. Only 46 Muhammadan students were attending Arts colleges and these were found in the colleges in Madras, Rajahmundry, Cuddalore and Coimbatore. The proportion to total attendance, viz., 1·4 per cent., is insignificant. Five Muhammadan candidates passed the Language and two the Optional branches of the last B.A. degree examination and seven the last F.A. examination.

Secondary education.

160. As in previous years, there were only two Upper Secondary schools for Muhammadans, viz., the Government Madrasa-i-Azam, and the aided Harris High School, Madras. Their general condition was, however, far from satisfactory. Though classes to prepare pupils for the Upper Secondary examination were opened in both these institutions, the attendance was even less than on the 31st March 1890. From the Madrasa 11 pupils appeared for the Matriculation Examination, but only one passed. From the Harris school 17 and 35 pupils appeared, respectively, for the Matriculation and the Middle School Examinations and four and 17 passed.

Of Lower Secondary schools for Muhammadan boys, there were four against one in the preceding year, and their total strength was 344 against 20. The Municipal Middle school, Vellore, continued to be in an unprogressive condition. On the whole, 240 Muhammadan pupils were reading in Upper Secondary and 991 in Lower Secondary classes against 204 and 1,135, respectively, in 1889-90. At the last Matriculation Examination, 33 Muhammadan pupils passed out of 178 entrants. The proportion should have been greater.

Primary education.

161. The number of Public Primary schools for Muhammadan boys rose from 653 to 790 and the attendance from 26,887 to 33,993. Twelve of the schools were managed by the Department and 244 by Local and Municipal Boards. The average strength of each school was 43 against 41 in 1889-90. There were also 17,067 Muhammadan pupils in non-Muhammadan Primary schools against 16,831 in the year preceding.

Female education.

162. The following summary shows the number of Muhammadan girls reading in all grades and classes of schools:—

EDUCATION OF MUHAMMADANS.

Schools.	Girls in girls' schools.	Girls in boys' schools.
Lower Secondary	87	...
Primary	4,084	4,915
Special	13	20
Private schools	292	2,638
Total ...	4,426	7,573

The marginally-noted six new schools, with an attendance of 338 pupils, were added to the list of Secondary schools for Muhammadan girls. Primary schools for Muhammadan girls also advanced from 78 to 118, and their attendance from 2,691 to 3,468. Sixteen of these schools were maintained by Government and 10 by Local and Municipal Boards, and they were attended by 952 girls.

Schools.	Attendance.
East Street Girls' School, Ellore	29
Girls' School, Inuguduru, Masuilp atam ...	27
Do. Gudiváda	27
C.E.Z.M. Moor Street, Black Town	91
Do. Mira Labbai Street, Black Town ...	76
Do. Rayapet	88
Total ...	338

Special education.

163. The number of Muhammadans in special schools mainly intended for them shows a decline of 64 pupils. Of the 15 students in Professional colleges, six against four were attending the Law College, seven against three the Medical College, two against one the College of Agriculture.

In the place of the Mappila Normal School, Tellicherry, three Preparatory or Sessional schools to prepare teachers for the Primary School Examination were established at Tellicherry, Malapuram and Tirur. One hundred and forty-two masters and 13 mistresses were under training for the profession of teaching in the institutions given in the margin against 107 and 12, respectively, on the 31st March last. The increase, though small, affords a ground of hope for the future.

Training Schools.	1889-90.	1890-91.

Hobart Normal class	12	13
Attendance at other Normal schools ...	30	21
Total ...	119	155

The attendance of Muhammadans in Industrial schools increased considerably. The Technical School, Madura, had 50 Muhammadans on the rolls. Details of attendance are noted in the margin. The Anjuman Industrial school continued to do good work, though, in certain respects, it was susceptible of much improvement. Miss Dryden's school at Guntúr declined, owing probably to her absence from India through ill health. The growing desire for Industrial education among Muhammadans is evidenced by their large attendance (63 against 18 in the year previous) in non-Muhammadan Industrial schools.

Industrial Schools.	1889-90.	1890-91.
Anjumani-Mufadi-ali-Islam	149	159

Hobart Industrial class	8	7
Attendance in other Industrial schools.	18	63
Total ...	199	242

Education of Mappilas.

164. According to Mr. Marsden's report, the number of public schools for Mappilas advanced from 361 to 387, and their attendance from 15,886 to 18,107, showing an increase of seven per cent. in schools and 13 per cent. in pupils. Ninety-seven of these schools were maintained by Boards, 172 were Combined system, 34 Results, and 84 Unaided schools. Out of 566 teachers in them, 112 held normal certificates. One out of every 34 of the Mappila population was reading in public schools, against one out of 39 in 1889-90. The fee-income was almost *nil*, but the total expenditure amounted to Rs. 41,762. Of the pupils presented for grant examination, 71·5 per cent. passed, earning a grant of Rs. 12,989 against Rs. 11,634 in the year preceding.

Muhammadan Inspectors.

165. Out of 76,678 Muhammadan pupils at school, 19,107 were reading Hindustani, 36,090 Arabic, 1,029 Persian, and the rest the local vernaculars of the districts concerned. The appointment of a Muhammadan Sub-Assistant Inspector for each circle has produced no small amount of good. From the table appended to para. 158, it will be seen that fourteen districts, including Madras, have a large Muhammadan population. The number of Muhammadans under instruction in the Ceded Districts, Kistna, Nellore and Kurnool is disproportionately low. Excluding Madras, four districts—Malabar, Cuddapah, Kurnool and Kistna—have each been provided with Muhammadan inspecting schoolmasters. The appointment of a similar officer in each of the other Districts (Godávari, Bellary, Anantapur, Nellore, North Arcot, South Arcot, Tanjore, Tinnevelly, Madura and South Canara) would give a great impetus to the spread of primary education among this class.

X.—EDUCATION OF ABORIGINAL AND BACKWARD CLASSES.

Education of aboriginal and backward classes.

166. The education of the aboriginal classes is a question which has been engaging the attention of the Department for some time past. Of Paraiyas and kindred classes, there were 18,915 boys and 3,135 girls under instruction. Owing to the imperfect classification adopted in the returns of previous years, I am unable to discuss the exact progress made by this section of the community during 1890-91. The schools for the benefit of these classes receive as liberal support as the provisions of the Grant-in-aid Code permit. The Chingleput Board has, I understand, been taking special steps to improve the social as well as the educational condition of the Paraiyas.

For the Khonds, Savaras and Uriyas of the Agency tracts of the Northern Circars, Government schools have been organised in large numbers. Their total number and attendance were as shown in the margin. Two training schools under Departmental management were also at work at Russellkonda and Gunupur for the special benefit of the Hill teachers.

Agencies.	1889-90.		1890-91.	
	Schools.	Pupils.	Schools.	Pupils.
Ganjam	29	1,228	35	1,338
Vizagapatam ...	34	979	43	1,141
Godávari	27	616	24	533
Total ...	90	2,823	102	3,012

In the Ganjam Agency the total number of schools of all grades for these backward classes rose from 41 to 69, and their attendance from 1,534 to 2,249. Over 11·1 per cent. of the boys * of school-going age belonging to these classes were at school. Twenty-two Lower Secondary and 13 Primary schools, with 901 and 437 pupils, respectively, were under Government management. They have all been placed on the salary-results system, and this, the Agent reports, has produced a beneficial effect. "The result," he observes, "of putting all the schools on the combined-system (the salary-results system is meant) is now apparent. No less than seven schools have beaten last year's record, and, including these, 18 show marked improvement." One school, the Linipádu Middle school, had as many as 100 pupils on its rolls and earned Rs. 287 in the shape of results-stipends. Two others had an attendance of 467 and 69 pupils respectively; eight were attended by between 40 and 60 pupils each. On the whole, 15 schools earned in the shape of results grants more than Rs. 100 each. These figures go to prove that the schools were in a generally satisfactory condition. As observed by Government, the recent transfer of 14 schools to Departmental control and the appointment of an additional Superintendent of schools are calculated to produce even a more marked improvement. The Principal Assistant Agent has recommended the appointment of a special Inspecting Schoolmaster for these schools. This proposal will receive early attention. The Assistant Inspector's remarks on some of the schools for Khonds and Savaras outside the Agency are quoted below:—

Male population of school-going age.	Male pupils under instruction.
19,506	2,173

"There were three Board salary-results schools in the Gumsur taluk, as in the previous year, intended for Hill tribes. The schools at Darpangia and Talapanka contained, respectively, 30 and 18 pupils; the highest standard of the former

INDIGENOUS EDUCATION.

was the third, and that of the latter, the first. The former did well at the grant examination and the latter was a total failure. The school at Baiballi contained 22 Khond and Gumma pupils and produced fair results. At Singipuram, in the Tekkali taluk, there was a Savara school attended by 13 pupils."

In the Vizagapatam Agency there were 124 schools with 2,579 pupils against 119 with 2,326 pupils, showing thus an increase of nearly 11 per cent. in pupils. Only one of these, the Government Middle School, Kotapad, with 59 pupils had attained the Secondary grade. The Senior Assistant Agent's Division had the largest number of schools, 81 with 1,507 pupils, and next to it the Special Assistant Agent's had 34 schools and 832 pupils. The Code of Rules sanctioned for the guidance of the Superintendents has been worked with success. Arrangements have been made to induce a larger number of Uriya children to attend schools, by means of special scholarships and prizes.

Schools.		Pupils.	
1889-90.	1890-91.	1889-90.	1890-91.
43	43	950	960

The number of schools in the Godávari Agency and their attendance remained almost the same as in the previous year.

One of these schools, the Government Middle School, Bhadráchalam, is reported to have done very well, and two others of the same grade, under the management of the Church Missionary Society at Dummugudem, one for boys and the other for girls, were well attended, the former containing 87 and the latter 46 pupils.

The other schools were on the whole not in a progressive condition. Arrangements were under contemplation at the close of the year to appoint a second Superintendent and to open additioual schools.

No information has been furnished regarding the Enadis of the Nellore district, for whom a special school was at work for some years at Sríharikóta. The favourable rates of results grants allowed by the Code should induce managers to attempt to get Enadi youths to attend school.

A few schools on the results system seem to have been opened with success for Lambadis in the Bellary district.

In Ganjam, Godávari, Tanjore and some of the other districts, schools have been started on the salary-results system for fishermen's children. The success of these schools can only be a work of time.

The Badagas of the Nílgiri district seem to be making fair progress, as there was an increase of about 200 pupils on the whole. The Board Normal School, Edapalli, having been closed, special and liberal grants have been offered to the B.G.M. Normal School, Kaity, for training Badaga teachers. But it does not appear to have yet proved particularly successful in this direction.

The Assistant Inspector has proposed a system of scholarships to Kota and Toda children reading in schools. This matter will receive due consideration.

With respect to Billavars, Mogers and Bants in South Canara, Mr. Marsden writes:—

"The number of pupils of the Billavar class has risen from 927 to 1,108, *i.e.*, "by 20 per cent. The number of Bants has risen from 1,949 to 2,125, *i.e.*, 9 per "cent. But the number of Mogers declined slightly from 207 to 193." There were no schools chiefly or wholly intended for these classes. The pupils were found scattered among the ordinary schools.

No special schools have been opened for Pattunulkars as they are scattered all over the presidency. A few pupils are attending school. Last year a stipendiary scholarship was conferred on a Matriculate of this class to enable him to study for the F.A. Examination.

XI.—INDIGENOUS EDUCATION.

Number and strength of indigenous private schools.

167. Private and indigenous schools fell from 4,286 to 3,189 in their number and from 83,496 to 61,027 in their attendance. This decrease of about 26 per cent. in schools, as well as in scholars, is in strong contrast with an increase of 21 and 40 per cent., respectively, in the preceding year. It is, however, chiefly due, as I have already explained, to a more accurate classification of such schools. It must also be

INDIGENOUS EDUCATION.

remembered that the statistics furnished in the returns do not form a full record of all indigenous schools in the presidency. Many schools of this description do not send in any returns, the managers or masters having no wish to abandon the time-honoured curriculum and methods of teaching they have hitherto pursued in favour of the course of study laid down in the Grant-in-aid Code and the, to their minds, new-fangled and doubtful methods of imparting instruction which the inspecting officers recommend. In small out-lying villages and hamlets such schools have the field entirely to themselves, and give way only when the masters cease to receive support from the parents of the pupils, or when a results school is established close by and draws away the bulk of the children of school-going age in the locality. From the subsidiary tables appended, it will be observed that Godávari, Kistna, Cuddapah, North and South Arcot, Salem, Tanjore, Trichinopoly, and Malabar sustained a loss in the number of such schools, Trichinopoly and Malabar, showing the largest decrease. Anent the loss in Malabar, Mr. Marsden writes that, owing to the prevalence of epidemics about the close of the year, many indigenous schools were closed temporarily and failed to furnish returns. I am not, however, sure about this explanation. The increase noticeable in Madura and Tinnevelly points to the conclusion that returns from such schools have been collected with greater care than in previous years.

It is satisfactory that in addition to the Sanskrit High school, Venkatagiri, the four Sanskirt schools named in the margin adopted the prescribed curriculum during the year and received also salary grants from Provincial funds and the last school in the list received also a building grant of Rs. 400. None of them were of an advanced character, but they were reported to be doing fairly good work. With Government recognition and support, they have a fair chance of developing into efficient *Patasalas*.

Schools.	Rate of grant per mensem. Rs.	A.	P.
Kollúr, Kistna District	6	10	8
Koneirajapuram, Tanjore	6	0	0
Anatandavapuram, Tanjore	5	0	0
Govindappaiyan Chatram, Alvar Tirunagari, Tinnevelly	5	0	0

168. Information regarding Private secondary schools is given below for the past two years. The classification of High and Middle schools given by the managers has been followed, though there is not a clear line of demarcation between these classes as in the case of public schools:—

Number and strength of private and indigenous secondary schools.

Schools.	1889-90.			1890-91.		
	English.	Sanskrit.	Muhammadan.	English.	Sanskrit.	Muhammadan.
High schools	...	5	3	...	9	2
Middle schools	1	98	43	1	90	29
Total ...	1	103	46	1	99	31

Sanskrit High schools rose from five to nine and their attendance on the 31st March was as given in the margin. The school at Harpanhalli had disappeared. The Tiruvádi school, maintained from the Chatram funds under the Tanjore Taluk Board, improved in attendance and in efficiency, and the curriculum suggested by the Department has been adopted by it. An addition was made to the staff, a master having been appointed to teach Logic. The school was inspected by a Hindu Pandit and 63 passed out of 78 examined. Its general condition was satisfactory and the total cost was Rs. 1,741.

The three Arabic High schools in Malabar were temporarily closed. The attempts made to bring one of them under Government inspection and aid have failed. Two Arabic High schools in Vellore—Hazarath Makhan High school and

Books. Madrasa Bhakiat Lalabeth Labbai Street school—with a total attendance of 433 pupils submitted returns for the first time.

The English school at Anakapalle disappeared as a Middle school; another, however, of the same kind at Berhampore, with 14 pupils on the roll, has entered the list.

The number of Sanskrit Middle schools fell from 98 to 90, but their attendance remained almost the same as in the previous year. South Canara contained the largest number—31 per cent.—of these schools as in 1889-90. Only two districts had more than 10 schools each and eight had no schools at all. Only 29 against 43 Muhammadan Middle schools submitted returns, but the attendance in them was 1,750 against 1,546 on the 31st March 1890. The 29 schools mentioned above were distributed among the following districts :— Malabar seven, Coimbatore six, Nílgiris and North Arcot four each, Kistna three, Trichinopoly two, Kurnool, Chingleput and South Arcot one each. The appointment of a Muhammadan Sub-Assistant Inspector for each circle has probably helped in the transfer of the several indigenous schools to the list of unaided schools.

Districts.	Number of schools.	Strength in the Middle departments.

South Canara	31	478
Total .	90	1,536

169. Private primary schools declined from 4,136 with 79,180 pupils to 3,058 with 56,953. Of these, 197 were Muhammadan schools, with an attendance of 4,464, teaching only the Quran. Eighteen other Muhammadan schools with 380 pupils were teaching general subjects, but not conforming to Departmental standards. The only private school returned as Upper Primary in 1889-90 disappeared in the year under report. All the districts, excepting Nílgiris, had Private primary schools, but for reasons stated in para. 167, there was a considerable decrease in 12 districts, particularly South Arcot, Malabar and Trichinopoly. The number of schools for girls rose from two to 16, and their attendance from 12 to 334. The increase was largest in North Arcot.

XII.—BOOKS.

170. The publication of Government school books having been left to private enterprize, the chief duty of this Department during the year has been to see that the publications issued by private agencies are suitable in size, type and paper for use in schools, and that they are correct

Book department.

Books.

reproductions of the originals. This duty has thrown much additional work on the Book Branch of this office, the amount of such work depending on the number of firms which undertake to print the same book.

The marginally-noted societies and presses were engaged in printing or publishing Government school books during the year. The books, new editions of which were brought out, are given below. Several reprints were in the press at the close of the official year. The only new books published are the Canarese Second Reader and the Elements of Telugu Grammar, Part I :—

The Madras School Book and V. L. Society.
The S.P.C.K. Press.
The Lawrence Asylum Press.
The Foster Press.
The Empress of India Press.
The National Press, Tanjore.

Tamil Poetical Anthology, No. I.	Tamil Second Reader.
Telugu Poetical Anthology.	Tamil Third Reader.
Elements of Telugu Grammar, Part I.	Telugu Second Reader.
Forrest's Gymnastics (Tamil).	Telugu Third Reader.
Tamil First Reader, Part I.	Anglo-Hindustani Second Reader.
Tamil First Reader, Part II.	Anglo-Telugu Fourth Reader.

The annexed abstract of stock account shows the value of the Government books dealt with during the year by the S.P.C.K. Depository and the Basel Mission Book and Tract Depository, Mangalore. The value of the books, &c., disposed of during the year amounted to Rs. 12,371-11-0, and that brought to account, to Rs. 30-9-6, and Rs. 35,525-4-3 worth of books were left on hand on the 1st April 1891. A considerable portion of this stock, however, consists of unsaleable books which, if put up to auction, would fetch only a very insignificant sum. The value of the books at the Gunupur Depôt, on the 1st April 1890, was Rs. 134-6-0, of which Rs. 27-11-3 worth was sold during the year, leaving on hand books of the value of Rs. 106-10-9 on the 1st April 1891. Thus the total value of Government books remaining on hand at the close of the year was Rs. 35,631-15-0 :—

The books printed and published on behalf of Government by the Basel Mission Press are given in the following statement. Eleven books, with 97,000 copies, and worth Rs. 9,208-5-4 were printed, against fourteen books, with 69,500 copies, and worth Rs. 12,796-14-0 in the preceding year. These books were purchased by the Basel Mission on the arrangement approved of by Government in paragraph 5 of its order No. 169, dated 27th March 1889 :—

Name of book.	Language.	Size of edition.	Actual cost of edition.	Profit.	Sale value of edition.	Selling price per copy.	Approximate cost per copy.

Sale of books.

171. The number and value of Government books sold during the year by the S.P.C.K. and the Basel Mission, the vending agencies of Government books, and by the private firms which have been permitted to print, publish and sell Government copyright books are given in the following statement. The number of books sold amounted to 535,980 and the value to Rs. 68,028-4-11. The statement given in the last report did not include the figures relating to private firms which partly accounts for the large difference. It must also be remembered that the above figures include sales to wholesale purchasers and local depôts, which cannot be taken to represent actual sales to pupils. The rapid spread of Primary education during the past few years, and the increasing number of pupils using printed books, has no doubt contributed to the increased demand :—

Languages.	1889-90.		1890-91.	
	Number of copies.	Value.	Number of copies.	Value.

Miscellaneous	340	6	4
Total ...	5,782	3	9

Registration of books.

174. The number of publications registered during the year was 947 against 1,370 in the preceding year. The decrease was chiefly due to the operation of Act X of 1890, entitled an Act to amend Act XXV of 1867, which dispenses with the registration in the case of a second or subsequent edition of a book in which no additions or alterations have been made. Annexed is a summary of the publications of the year under the heads of books and periodicals compared with the figures for 1889-90 :—

	1890-91.	1889-90.
Books	772	1,161
Periodicals	175	209
Total ...	947	1,370

The periodical publications show again a considerable fall in number, the cause of which is not apparent. The publications of the year are classified in the following statement so as to show the number of original works, republications and translations brought out in English, in the Vernacular languages of Southern India, and in the Indian classical languages :—

Description of works.	Books published in English and other European languages.	Books published in the Vernacular languages spoken in the Province.	Books published in the Indian classical languages.	Books published in more than one language.	Total.	
					1890-91.	1889-90.
Original works ..	184	306	18	80	588	744
Republications ...	2	30	...	12	44	552
Translations ...	63	210	25	17	315	74
Total ...	249	546	43	109	947	1,370

There was a decrease under each head in the case of both original works and republications, and the cause of the fall in the case of republications has already been explained. The number of original works is more than half the total number of publications registered. This cannot, however, be taken as an indication of literary activity, since, as stated in last report, reissues of any works, of which the copyright is still in the hands of the author or his assignee, are classed as original works, according to the classification laid down in the Resolution of the Government of India, dated 12th September 1882, No. 1—455.

The following statement shows the places at which the registered publications were issued and the number of books published at each place in English and in the Vernacular languages. The list, as usual, is headed by Madras, which contributed nearly 70 per cent. of the publications registered during the year; Mangalore ranks next, and Calicut comes as third, both of them maintaining without difficulty their established position :—

Books.

No.	Stations.	For 1889-90.			For 1890-91.		
		English.	Vernacular.	Total.	English.	Vernacular.	Total.

	Total ...	314	1,056	1,370	267	680	947

The number of publications, distributed according to languages, is compared below with that of the previous year. The largest number was, as usual, in Tamil, next comes English, followed by Telugu, Malayalam, Canarese and Hindustani in order. The number of works, of which the copyright was registered during the year, was 238, the corresponding figure for the previous year being 320 :—

	Languages.	Number of works,			Languages.	Number of works	
		1889-90.	1890-91.			1889-90	1890-91.

					Total ...	1,370	947

175. Effective steps were taken during the year to prevent the sale of pirated editions of Government copyright books. The unauthorized publication and sale of the Tamil *First Book of Lessons* and the Telugu *First Book of Lessons* were traced to four booksellers, three of whom have been successfully prosecuted in the High Court. The case against the remaining bookseller is still pending, but no doubt is entertained as to the result, as he has already admitted publication and sale.

Infringement of Government copyright.

176. The working of the Oriental Manuscripts Library during the year was on the whole satisfactory. The number of visits rose from 803 to 920, of which 505 were made for consultation and 277 for copying. The increase in the number of visits shows that, notwithstanding the library being situated in what the Curator considers to be an inconvenient place, those who wish to profit by the valuable works it contains visit it readily. This is further made evident by the fact that the number of visits for copying, which is one of the most reliable tests of the utility of the library, increased from 180 in 1888-89 to 256 in 1889-90 and 277 in 1890-91. The grant of Rs. 600 annually made for the purchase and transcription of valuable manuscripts was chiefly expended during the year in transcribing, repairing and binding the old manuscripts in the library. In the manuscripts thus transcribed were included eight Sanskrit works which the library did not previously possess. An alphabetical list of the Sanskrit manuscripts was prepared and published during the year, and a descriptive catalogue of them was under preparation. Steps were also taken towards the close of the year for the systematic cataloguing of all the Vernacular manuscripts in the library.

The Government Oriental Manuscripts Library.

XIII.—SCHOLARSHIPS.

177. In last report I referred to the institution of five scholarships, four of which were actually taken up, to enable promising graduates to continue their studies for the M.A. Degree examination. Opportunity was taken, when revising the scholarship notification in June 1890, to raise the number to eight, of the value of Rs. 30 each. On the 31st March last 11 graduates, seven of whom were in the Presidency College, were reading for the M.A. Degree examination. This is an encouraging feature in the annals of higher education in the Presidency; for, besides holding out the prospect that young men will thus fit themselves for superior work in schools and colleges, it is certain that the possession of higher scientific knowledge will be a gain to the country in many ways.

Scholarships in Arts colleges.

Of the 16 scholarships of Rs. 15 each set apart for under-graduates of the F.A. standard, who are continuing their studies for the B.A. degree, 15 were appropriated, two by Muhammadans and 13 by Hindus. No women applied for a scholarship during the year.

Thirty-two scholarships of Rs. 10 each were made available for Matriculates to proceed to the F.A. Examination, but only 24 were awarded, two to women, 14 to Muhammadans, five to Mappilas, two to Uriyas and one to a student belonging to one of the backward classes.

Scholarship grants of varying amounts were also given under Chapter VII of the Grant-in-aid Code on behalf of students reading for the F.A. or B.A. Examination. These scholarships are awarded on the results of a competitive examination held by the college authorities. Six colleges availed themselves of grants aggregating Rs. 3,225, the Madras Christian College alone drawing Rs. 1,875.

The total expenditure on scholarships in Arts colleges amounted to Rs. 24,269, Rs. 10,446 being met from Provincial funds and the balance from subscriptions and private funds.

178. In the Colleges of Engineering and Agriculture, Rs. 4,966 were expended from general revenues on scholarships awarded under the rules. From the Morehead Endowment Fund, Rs. 239 were paid by way of scholarship in the Law class, while the Victoria Technical Institute paid Rs. 1,980 in the Teachers' College to enable students to receive instruction in special and technical subjects.

Scholarships in Professional colleges.

SCHOLARSHIPS

Scholarships in schools for general education

179. Government has been giving scholarships of Rs. 6 per mensem to promising Uriya pupils of the Russellkonda, Tekkali and Gunupur schools to help them to continue their studies for the Matriculation Examination. A sum of Rs. 234 was paid during the year on this account.

The scholarship notification provided 32 scholarships of from Rs. 5 to Rs. 7 each for female students of the classes specified in the margin, who, on passing the Middle School Examination, continued their studies for the Matriculation or the Upper Secondary Examination. Only one of these was applied for and that by a Native Christian pupil. Sixty-four scholarships ranging from Rs. 2 to Rs. 4 were also notified for female students of the classes noted above on their passing the Primary School Examination and continuing their studies for the Lower Secondary Examination. As the results of the Primary School Examination were published late, no scholarships were sanctioned before 31st March last.

Hindus ...	... 8
Muhammadans	... 8
Native Christians	8
Backward classes	... 8

In Government girls' schools, scholarships of the value of eight annas and upwards are awarded on the results of the annual examinations, to encourage young girls to proceed with their studies to higher standards. A sum of Rs. 2,161 was expended in this way during 1890-91. Dewan Bahadur Raghunatha Ráu was good enough to give Rs. 60 as scholarships in the Government Girls' School, Kumbakónam, to encourage Mahratta girls to attend school.

Scholarships amounting to Rs. 173 were paid from Local Funds in the Board Girls' Schools, Námkal and Nidamangalam.

Under Chapter VII of the Grant-in-aid Code, scholarship grants to the extent of Rs. 890 were given from Provincial funds in Aided schools.

The total expenditure on scholarships in schools for general education was, as per returns furnished to the Department, Rs. 5,962, of which Government contributed Rs. 3,285. The value of free scholarships has not been taken into account.

Scholarships in schools for special education

180. A sum of Rs. 11,345—Rs. 11,210 from Provincial funds and Rs. 135 from the Walker scholarship endowment—was given as stipends or scholarships in the school departments of the Medical College and of the Colleges of Engineering and Agriculture and in the School of Arts. These awards were regulated by the rules of the respective institutions.

Rs. 3,922 were spent by way of special scholarships in Board schools. Of the above sum, Rs. 2,699 represent stipends to students in the Nellore and Tanjore Medical schools.

Grants of the value of Rs. 6,354 were paid from Provincial funds under Chapter V of the Grant-in-aid Code for scholarships in schools for special education. Particulars will be found in an appendix to this report. The Art and Industrial School, Nazareth, received Rs. 4,486, and a sum of Rs. 1,258 was disbursed as scholarship grants to students of the Victoria Technical Institute.

Gymnastic scholarships

181. The amount of Gymnastic scholarships paid under Chapter VI of the Grant-in-aid Code in the training class attached to the Gymnasium of the People's Park, which has continued to produce excellent results, rose from Rs. 823 to Rs. 1,810. The increase was due to Board and Aided schools having availed themselves to a larger extent than in previous years of the liberal provisions of the code and sent up a greater number of students to be trained. The increasing attention, which is being paid in public schools to gymnastics and drill, especially under the operation of the Madras Educational Rules, will render the class even more popular and useful than heretofore. It was under contemplation at the close of the year to work the training class in connection with the Teachers' College.

Scholarship Endowment

182. In its order No. 167, Educational, dated 27th February 1891, Government accepted an endowment of the value of Rs. 400 instituted in the Medical College to perpetuate the memory of the late Surgeon-Major MacNally, and sanctioned a grant of Rs. 200, but the grant was not drawn before the close of the year.

XIV.—GENERAL REMARKS.

General summary of progress.

183. The healthy and progressive condition of education in the Presidency during the year under report is fully demonstrated by the statistics of schools and scholars furnished in Chapter I and in the General Tables; by the results obtained at the various public examinations conducted by the University, the Commissioner for the U.C.S. examinations and the Department, and noticed in Chapters III to VII; also by the extended operations of Local and Municipal Boards in matters educational, adverted to in Chapters I and V; as well as by the amount of work accomplished by the Inspecting officers, detailed in Chapter II. Compared with 1889-90 the total number of schools and scholars advanced by 7·4 and 7·3 per cent., respectively, while Government, Board and Aided schools rose by 7·7 per cent. in number and 10·1 per cent. in strength, thus showing that the improvement effected was not the result of the admission into the aided list of Unaided and Indigenous schools merely. Again, a comparison of the number of students in the several stages of instruction in public institutions indicates that the year was one of progress in the standard of instruction also. The decrease occurring under the Lower Secondary stage was special and due mainly, as elsewhere observed, to the abolition of the Middle School Examination as a service test. It will also be observed from General Table (V) that the proportion of pupils in the Lower Primary stage reading printed books rose from 76 to 84 per cent. Of the institutions, 2,558, with 140,422 scholars, were situated in Municipal towns. Omitting them, 19,470 schools, with 503,742 scholars, were located in non-Municipal towns and villages, which, according to the census of 1881, numbered 52,592. Most of the small towns and large villages contain more than one school each, but in many villages the population is too small to maintain a separate school. In view of these facts, only one village in three can be said to be provided with a school. The non-Municipal area is about 138,000 square miles. Roughly estimating the number of villages containing schools of their own at 15,000, only one school is provided for every nine square miles. The number of pupils of school-going age is generally taken at 15 per cent. of the population. Detailed statistics of the population, according to ages, are not available, but I am inclined to think, with Sir Alfred Croft (*vide* para. 94 of the Review of Education in India in 1886) that 20 per cent., or one-fifth, is nearer the mark than 15 per cent. The population of school-going age per square mile in the non-Municipal area is approximately 48 ($\frac{33,000,000*}{5 \times 138,000}$), while the number of pupils under instruction is four per square mile. These figures give some idea of the work to be done before every child of school-going age in rural parts can be said to be benefited by any proper system of education.

Agencies and means for extending Primary education.

184. The magnitude of the work before the Department in improving the condition of Primary education leads naturally to the consideration of the agencies and means we possess for the task. I have already referred to the increasing inspection and supervision work devolving on Sub-Assistant Inspectors. The question of increasing the number of these officers cannot long be deferred. Hurried examinations are strongly to be deprecated. Expenditure from public funds should be made with care, so as to secure the greatest possible benefit to the people. The large amount now spent from public funds can be justified only on the supposition that the examinations and inspections are carried out with due deliberation. There is a limit to the amount of work which a man can accomplish thoroughly and well in the course

GENERAL REMARKS

of a year, and that limit has been reached by most of the subordinate inspecting officers and overstepped by not a few. This being so, it follows that as, year by year, additional schools are brought on the list for grant examination, there ought to be a corresponding increase in the number of Inspecting officers, if the character of their work is to be what it should be. It is at present out of the question to expect Sub-Assistants to command time to organize village schools and to bestow on these schools that constant and individual attention which is indispensable if they are ever to become permanent institutions. For this preliminary and difficult task I look upon the agency of Inspecting schoolmasters as being, in the present state of things, admirably suited when properly supervised. Whether his work lies in extending instruction to the outlying regions of the district or in penetrating to lower depths of the social strata in the large cities, the Inspecting schoolmaster is the pioneer who prepares the way on which education is to advance. In the scholastic hierarchy, his position may appear a humble one, but it is the very lowliness of his position that puts him in sympathy with the villagers, enabling him to realize their ideas and feelings, to understand their difficulties, and to make due allowances for their natural prejudices. The Sub-Assistant Inspector moves in a higher sphere than the village ryot, but the Inspecting schoolmaster goes in and out among them and is thus able to meet them on their own level. It is of paramount and pressing importance, therefore, that this agency should be rendered thoroughly strong and efficient. Proposals were submitted to Government by Mr. Grigg towards the close of the official year to transfer these officers to Provincial service and to introduce a graded scheme of salaries. Whatever may be the decision of Government as to the transfer of this agency to the direct control of this Department, it will be necessary that the staff of Inspecting schoolmasters should be strengthened in districts in which it has been found inadequate, that a graduated scale of salaries should be introduced so as to provide an incentive to good and honest work, that prospects should be held out of promotion to the office of Sub-Assistants to such of them as pass the prescribed tests and give complete satisfaction in the discharge of their duties, that future appointments should, as far as practicable, be conferred on trained graduates or under-graduates who have had some experience as teachers, and that the incompetent men among them should be made to retire or be transferred to Board schools. If these suggestions are acted upon, and if the superior Inspecting officers and Local Boards continue to exercise due supervision over the Inspecting schoolmasters, Primary instruction in local circles cannot fail to experience real and lasting benefit.

In all Municipalities, except Madras, the charges on account of the Primary education of boys, Upper as well as Lower, are payable from Municipal funds, and many Municipal Councils have shown a true sense of their responsibility and evinced an increasing interest in the development of Primary education. With the pressure which Government is bringing to bear on them with a view to improving the qualifications of the teaching staff and utilizing to the full the grants sanctioned in the annual budgets, it is to be hoped that ere long the condition of elementary education in Municipalities will be such as to entitle it to be regarded as satisfactory. The multiplication of inefficient results schools should, however, be avoided, and salary-results schools should replace results schools where the latter are inefficiently managed, or where the former appear to be more economical while at least equally efficient. In pursuing this policy, every care must be taken not to repress but to encourage private effort. Out of about three lakhs of rupees, the educational assets, and 15 per cent. of the revenue from taxation and rents, about two lakhs and sixty thousand rupees were expended last year. There is a fair margin for additional expenditure in most of the Municipalities in which the condition of education needs improvement.

The operations of Local Boards have already been commented upon. Charges on account of the Lower Primary education of boys, except in Municipalities and in the Agency tracts and for Europeans and Mappilas, are payable from Local funds. The net expenditure from Local funds on education during 1890-91 amounted to about Rs. 6,44,000, which is about 12 per cent. of the revenue from land-cess. As the Local Boards are well able to spare 15 per cent. of the land-cess revenue for educational purposes, there are ample funds for expenditure on primary education. Moreover, the transfer of training institutions to the management of

the Department will set free a net addition of half a lakh of rupees available for the improvement and spread of elementary education. The establishment of additional salary-results and sessional schools, and the improvement of the Inspecting schoolmasters should engage the unremitting attention of Local Boards.

Teaching staff in primary schools.

185. One of the obstacles, in fact the greatest obstacle, to the development of primary education, is the absence of qualified teachers. Out of 20,430 teachers in Public Primary schools for boys, as many as 13,603, or 66·6 per cent., had passed no public examination against 68·6 per cent. in the previous year. The improvement, though small, is satisfactory, especially when account is taken of the fact that there was an addition of nearly 3,000 teachers. The number of trained teachers rose by 410 and that of men who had passed a general education examination by 925, while there was an increase of three only in the number of teachers possessing ordinary certificates. Many unpassed teachers are probably too old to benefit much by a course of training. In such cases the educational officers should endeavour to induce them to send their sons or relatives to training schools and to take them as their assistants on completion of their training. If the number of unpassed teachers is to be reduced to any appreciable extent, it is indispensable that they should be given such help and facilities as will enable them to pass at least the Primary School examination. Sub-Assistants should embrace every opportunity of organizing elementary teachers' associations, and thus to create and develop that corporate feeling among teachers, which experience elsewhere has shown to be highly conducive to their advancement.

Progress of Sessional schools.

186. Sessional schools, which are opened by Local Boards for a period of two or three months in the year, are designed to impart instruction in general subjects to elementary teachers of a specified neighbourhood, so as to enable them to pass the Primary School examination with a view to their eventual admission into a training school. The methods of teaching and the mode of keeping registers are also occasionally taught, but not on any systematic plan. Each teacher is paid a stipend of Rs. 4 or 5 a month, and the Inspecting schoolmaster has generally the charge of the school. The sessional school is thus preliminary to the training school, but is not intended to supersede it. There were 11 such schools at the end of the year against six in 1889-90. The average strength of each school was about 11. The Adóni sessional school had the largest number, viz., 16. These 11 schools were not all the schools at work during the year. A short account is given below of all schools of the kind, including those which were opened and closed in the course of the year:—

Bellary.—Two schools, with 27 students, worked for two months and are reported on favourably. The total cost was Rs. 223.

Cuddapah.—There were 19 teachers on the rolls of the two schools in the district. Twelve passed the final examination. The total expenditure on these schools within the year was Rs. 118.

Coimbatore.—Five schools were held against four in the preceding year. Thirty-eight teachers attended them. Thirty-seven appeared for the Primary school examination and 32 passed. All the students of the Sessional School, Karúr, passed. The total cost amounted to Rs. 686. The schools were held for three months.

Madura.—Four schools were opened during the year, and 47 village teachers received instruction in general subjects, and in drill and gymnastics. Twenty-eight underwent the test for the Primary School examination and 17 succeeded. The total cost of these schools was Rs. 592.

Tinnevelly.—Nine schools were opened, one in each taluk. Of these, only seven were at work at the end of the year, and the number on the rolls was 98. Ten candidates appeared from one of the schools for the Primary School examination and passed. The rest will undergo the examination of 1891. The total cost was Rs. 934.

Malabar.—There were five schools at work against 10 in the previous year. The number on the rolls was 54; five appeared for the Special Primary examina-

General Remarks.

tion and 46 for the Primary School examination. Four and 23 passed respectively. The total cost was Rs. 660. The schools were held for two months only.

South Canara.—Five schools were conducted for two months in the rainy season. The number on the rolls was 50, and the number that appeared and passed at the Primary School examination, 40 and 22 respectively. The total cost was Rs. 436. The experiment of holding Sessional schools was first tried in this district.

Thirty-two Sessional schools were thus at work during the year, and the majority of them proved successful. Government has signified its approval of this agency, and several of the District Boards, especially those of Tinnevelly and Coimbatore, evinced a warm interest in giving the scheme a fair trial. I would strongly advocate the opening of such schools in every district. The training schools, even under Departmental management, will not be able to overtake the existing arrears and, at the same time, keep pace with the current demand for teachers to fill the vacancies occurring in the ranks of trained teachers through death and other causes. Inspecting officers have had impressed upon them the importance of working these sessional schools to the best possible advantage of village teachers.

Working of night schools.

187. In an agricultural country like India, youths are often employed at a very early age helping their parents in the fields. They have, therefore, little opportunity of keeping up any knowledge they may have been fortunate enough to acquire in infancy, and, if they have never been to school at all, they have no means of learning even the very alphabet of their mother-tongue as a written language. Hence the importance of night schools in keeping alive the tender growth of knowledge implanted in infancy, and in sowing the first seeds of it, should that have unfortunately been impossible in earlier years.

It is very gratifying to note that the number of night schools advanced during the year from 449 to 609 and their attendance from 8,933 to 11,706. Only 11 of these, with an attendance of 345, were managed by Local Boards. Four schools, with 61 students, were private institutions beyond the pale of Government inspection. Two hundred and forty schools were aided during the year on the results-system, and 354 were in a state of transition from the unaided to the aided list. A detailed statement of the schools by districts is given below :—

Districts.	Schools.					Scholars.

Over 43 per cent. of the schools and 47 per cent. of the scholars were in the Northern Circle. In the Southern Circle, the number of schools and scholars had both doubled. In the Northern Circle, there was an increase of 39 per cent. in

schools and of nearly 35 per cent. in scholars, while the Western Circle lost 30 per cent. of schools, and 35 per cent. of scholars. The popularity of the movement in the Northern Circle, especially in the Districts of Ganjam, Vizagapatam and Kistna, which contained in all 226 schools and 4,683 scholars, is due, in no small measure, to the encouragement held out by Mr. Monro, while Inspector of Schools, and to the readiness with which the respective Local Boards permitted the teachers of their day schools to have charge of night schools also. Night schools obtained a firm footing in those districts before the introduction of the revised Grant-in-aid Code in 1886.

The night schools in existence are all of the primary grade. There is no prospect of their standards being raised for the present, nor is there need for it, considering the aim of these schools, viz., the elementary education of youths and adults engaged as labourers during the day. The students being mostly poor, fees can seldom be levied from them, and, where they are levied, it is only in kind. The cost of lighting seems, however, to be defrayed by the students in many schools. The hours of study are from 7 to 9 P.M. generally, and, in very rare cases, they extend to 10 P.M. The attendance is generally irregular; for, after the day's hard labour, the students are often more inclined to seek repose than to gratify their desire to acquire familiarity with the three Rs.

The discipline and organization are in general far from satisfactory, and cannot be expected to be what they are in well-conducted day schools. The Inspectors do not, therefore, recommend the opening of Board night schools on any large scale, and I concur with them.

The Grant-in-aid Code now in force allows certain concessions in favour of these schools in articles 21, 28 and 29, Chapter III; and I would consider it a sufficient additional encouragement if teachers of Board schools were allowed to open night schools in connection with their day schools. They might be allowed the maximum results-grants *plus* an allowance of Rs. 2 a month for lighting charges for each school.

Bifurcation of studies in the Secondary stage.

188. The Education Commission recommended that "in the upper classes of high schools there be two divisions, one leading to the entrance examination of the Universities, the other, of a more practical character, intended to fit youths for commercial or other non-literary pursuits." Incidentally the question arose whether the bifurcation ought not to be postponed until after the completion of the High School course, seeing that the Matriculation standard was not too advanced a test of general education and intelligence, even for students destined for a non-literary career. The Government of India, however, was not in favour of this. The local Governments generally expressed their concurrence in the aims of the Commission, but the result produced in provinces outside Madras has not been great. In Bombay, classes in agriculture and drawing were attached to many Secondary schools, but both Bombay and Bengal thought that the initial step should be taken by the Universities. In the North-Western Provinces and Oudh, and in the Punjab, managers of aided schools were exhorted to pay increased attention to letter-writing, book-keeping, surveying, the elements of political economy, &c.; but, on the ground of expense, little attention was given to this exhortation. The other provinces considered it almost impracticable to introduce the scheme. In Madras, however, it was deemed desirable to begin the bifurcation of studies at a stage not only below the Matriculation, but below the Middle School examination. The scheme of this latter test was accordingly altered, so as to include a variety of optional subjects—scientific, commercial, technical and industrial. The scheme of technical instruction began from this point. A further course of examinations in science, art and industries was organised, consisting of two standards, viz., the preliminary, corresponding to the stage in general education marked by the Matriculation examination, and the advanced, corresponding to that of the First Examination in Arts. The scheme was based upon the system of scientific and technical instruction elaborated by the Science and Art Department at South Kensington. The subjects of examination were numerous. A system of liberal grants-in-aid was sanctioned and other inducements held out. It was believed that the subjects

GENERAL REMARKS.

could well be taken up and taught in various degrees by the institutions already in existence for special and professional instruction. But as in Bengal and Bombay the main help was expected from the University, and it was thought that, if this body could be induced to establish a "modern side" to the Matriculation Examination, the views of the Commission would to some degree be carried out. But the University did not see its way to institute an examination which did not lead to a degree, and consequently an examination called the "Upper Secondary examination" was instituted by G.O., dated 29th June 1889, No. 351, the literary portion of which is conducted by a Board. The technical side consists of a number of the subjects of the Higher examinations in science, art, industries and commerce referred to above.

As remarked already, on the abolition of the Middle School examination, the science, art and industrial branches of that examination were incorporated in the Technical Examination scheme as Lower or Elementary examinations.

From a special return obtained from heads of High schools, it has been ascertained that, on the 31st March last, 18 institutions were preparing 279 pupils for the Upper Secondary examination, and 19 other schools were preparing 231 pupils jointly for the Upper Secondary and Matriculation examinations. The total number, which seems to represent the attendance in the three classes constituting the Upper Secondary department, is extremely small. Unless there comes, and comes soon, a very large increase in the number preparing for this examination, Government will have to reconsider the position of the examination as one of the avenues to the public service.

As far as concerns the compulsory branches of this examination, it has to be borne in mind that the Matriculation examination is not now what it was when the Upper Secondary examination was instituted. The course has been extended to three years, like the Upper Secondary, and the standard has been raised. As regards the technical side of the examination, it is to be observed that it is the Technical examination scheme which furnishes the tests required to be passed by candidates for the Upper Secondary examination in optional branches. The success, therefore, of the measures taken in the Presidency for the development of technical education depends on the success of the general scheme of technical instruction instituted in 1886.

Teaching staff in Secondary schools.

189. The usual particulars regarding the teaching staff in Secondary schools will be found in the annexed summary :—

GENERAL REMARKS.

Classes of institutions.	Number of institutions	Professors and teachers

GENERAL REMARKS.

European teachers rose in number from 152 to 186, while the other classes fell considerably, particularly Hindus. In the case of girls' schools, however, the increase in schools was 41, but in teachers attached to them it was 175, the largest proportion appertaining to native Christians, the number of whom rose from 487 to 594. This community being next to Europeans, the most advanced as regards female education, has supplied over 50 per cent. of the teachers in girls' schools. Of Muhammadan teachers there were only 68 in boys' and 33 in girls' schools, against 72 and 22, respectively, in the preceding year. The proportion of certificated to uncertificated teachers is compared below:—

	1889-90.		1890-91.	
	Boys' schools.	Girls' schools	Boys' schools.	Girls' schools.
Teachers educated in Europe or America	30	38	28	38
Do. holding normal or ordinary certificates	1,132	502	1,270	617
Do. who have passed a public examination only	1,423	230	1,284	240
Do. who have passed no examination whatever	452	237	435	287
Total	3,037	1,007	3,017	1,182

The Secondary schools referred to have Primary departments, the lower classes of which, particularly in girls' schools, are officered by teachers who have passed no public examination. In the higher classes, the Vernacular is generally taught by Pandits or Munshis, who have passed no examination whatever. These go to swell the number of professionally-unqualified teachers. The number of certificated teachers increased by 15·5 per cent. during the year. Under the operation of the Madras Educational Rules, it is hoped that improvement will be more rapid in the future than it has been in the past.

The percentage of teachers, who had passed only a general educational examination, fell from 40·9 to 36·3, owing to the circumstance that many qualified for teachers' certificates by undergoing training, or by passing the Departmental test in teaching.

Classified by the grade of educational qualifications, the staff in Secondary schools was as follows:—

Schools.	Collegiate.			Secondary higher.			Secondary lower.			Primary higher			Primary lower.		
	Normal.	Ordinary.	General educational.	Normal.	Ordinary.	General educational.	Normal.	Ordinary	General educational	Normal.	Ordinary.	General educational	Normal	Ordinary.	General educational.

Of the teachers, 308 had passed the B.A. Degree Examination, 373 the F.A. Examination, and 1,311 the Matriculation Examination or the Higher Examination for Women.

190. The main difficulties with respect to Industrial schools are, as pointed out in the last report, (1) their relatively high cost and the consequent tendency on the part of managers to reduce them to the position of mere workshops by looking more to profits than to instruction, (2) the want of qualified teachers, and (3) the lack of competent examiners. Industrial schools are, as a rule, beyond the means of Local Boards and Municipal Councils, and they have generally been discouraged from embarking in such enterprises. The operations of the Government technical institutions were carried on and extended, and liberal aid was given to private schools. The results of the public examinations were also fairly satisfactory. The growing interest taken by the community in industrial education is evidenced by the fact that the attendance of Brahmans in Industrial schools rose from six to 73, and that of Muhammadans from 199 to 242. The proportion of qualified teachers rose during the year. Forty-six teachers out of 81 were qualified, having been educated in Europe or having passed one or other of the technical tests, against 27 out of 80 in the preceding year. The difficulty of finding suitable examiners still remains, though it is lessening, year by year, partly through the increase in the number of specialists from other countries taking service in this country, and partly by men educated in the few technical schools of the Presidency. I have much pleasure in acknowledging the valuable help which Messrs. Havell and Chatterton have been rendering, not only in the inspection of technical and industrial schools, but in formulating proposals for the more efficient working of these schools, for the systematizing of the standards of instruction, and for the conduct of the examinations.

Progress of Technical and Industrial education.

191. Heads of colleges furnishing returns to this office were requested by me to note the strength of the Junior B.A. and the Junior F.A. classes on the 31st March last, and the number of under-graduates of the F.A. and the Matriculation standards of 1890 admitted into the respective classes. Four colleges have not supplied the information, and in the remaining colleges, 422 F.A. under-graduates and 805 Matriculates of 1890 found admission early in 1891. Omitting private students and students from institutions in Native States, who would not, at least in large numbers, have found admission into the colleges connected with the Madras Educational Department, the number of successful candidates at the last F.A. and Matriculation Examinations, were 477 and 1,160 respectively. Allowing for the attendance in the four colleges that furnished no information and for the admission of a few students from Native States, it may safely be assumed that about 90 per cent. of the F.A. under-graduates have continued their studies for the B.A. degree and 75 per cent. of the Matriculates have continued to read for the First Examination in Arts. I consider this proportion a very fair one; and, unless there is a very large accession to the list of successful candidates at the Matriculation Examination, which I am inclined to think there will not be for some time to come, the demand for collegiate education will remain for years about the same as it is.

Relative proportion of under-graduates proceeding to higher education.

192. I have expressed my opinion, at some length, in the last report on the system of Zenana education. There were, on the 31st March 1891, six Zenana classes, with 134 pupils. The high standard reached by the Church of England Zenana Mission Home Education Class, Madras, deserves commendation. The National Indian Association classes in Madras were the best attended, but nearly all their pupils were in the Lower Primary department. In the Wesleyan Mission Classes, Karúr, 22 were in the Secondary department. The several missionary societies deserve credit for their self-denying efforts in this direction. Though, taken as a whole, progress has been made during the year, yet the influence of Zenana classes can at best be but small when compared with the work that has to be accomplished before the education of women can be regarded as satisfactory.

Home Education classes and Zenana education.

193. The standing orders of the Educational Department, issued in 1880 by Colonel Macdonald, had been amended and amplified from time to time by Mr. Grigg. In the course of eight or nine years, many changes had taken place in the condition of public instruction, and it was accordingly considered expedient to bring out a new

The Madras Educational Rules.

GENERAL REMARKS

code to suit the altered circumstances. A committee was appointed in November 1889 for the revision of the standing orders. Following the lines sketched by Government, the committee drew up a set of rules which it recommended for adoption under the designation of the "Madras Educational Rules." The most important rules were divided into two sections—those which should be enforced in every recognized school, and those additional rules which should be enforced in every aided institution. A section was added containing hints and suggestions on teaching and on the management of schools, the adoption of which should be left to the discretion of managers. With slight modifications, these were submitted for the sanction of Government and received its approval in February last. Mr. Grigg added a new section applicable to Departmental, Local and Municipal schools. Under the first set of rules, all institutions presenting candidates for public examinations require to be recognized by the Department, and, to secure such recognition, they have to satisfy certain conditions as to the sufficiency and efficiency of the staff, the nature and amount of the accommodation, the sanitation, the supply of furniture and apparatus, and the maintenance of certain prescribed registers. The observance of certain inter-school rules, framed to check the growing evil of migration of pupils from school to school, was also laid down as a condition of recognition. With the co-operation of the University, it is hoped that a salutary change will thus be effected in the condition of Secondary education. The enforcing of these rules has laid on the Department the duty of affording to managers liberal financial aid to enable them to effect the required improvements. Few managers are in a position to improve the staff and the accommodation without the help of Government.

The Grant-in-aid Code.

194. The following changes in the Grant-in-aid Code were sanctioned or proposed during the year :—

Kannadiyars, weavers by profession and living chiefly in Kurichimalai in the Kumbakónam taluk, were included in the list of backward races mentioned in article 52 of Chapter II.

The rules of recognition and aid forming part of the Madras Educational Rules, which were finally approved by Government in February last, will necessitate certain changes in several of the provisions of Chapter II. When the final orders of Government are passed on the revised draft of Chapter III, all the alterations necessary in the several chapters of the Code will be dealt with together.

A thorough revision of Chapter III was under consideration, but the finally amended draft was not submitted to Government until after the close of the year.

The removal of this Chapter IV altogether was under consideration.

With a view to extend the period of training, article 5 of Chapter VI was amended as follows :—

"The ordinary term of a scholarship shall be 18 months, but the period may, with the special sanction of the Director, be extended to two years. If a teacher passes, during or subsequent to his training, a higher general education test than that for which he is being or has been trained, he may, after he has qualified for a Normal certificate of the grade for which he has been trained, be admitted for a further period of training for a term of 12 months, which may, with the sanction of the Director, be extended to 18 months."

Experience has also shown that the scale of scholarship grants provided for in article 4 of Chapter VI stood in need of revision with reference to the demand for teachers of different grades. The marginally-noted rates were accordingly sanctioned in lieu of those previously allowed. Scholarships for European and Eurasian Masters and Mistresses are allowed at 25 per cent. in excess of those fixed for Mistresses.

	Schoolmasters.	Schoolmistresses.
	Rs.	Rs.
Collegiate ...	15	20
Secondary higher ..	12	15
Do. lower ..	8	10
Primary higher ..	6	8
Do. lower ...	3	4

To the list of trades mentioned in article 1 of Chapter IX, machine-knitting, hand-knitting, white embroidery and tape-making were added during the year.

Tests in the first two subjects were introduced at the request of managers of Industrial Girls' schools on the Western Coast, while the tests in the last two

subjects were intended to methodize instruction already imparted in some of the industrial schools.

Working of the Results-grants system.

195. No changes were made during the year in the provisions of Chapter III of the Grant-in-aid Code. For the grant examination, 65 per cent. of the male and 47 per cent. of the female pupils registered were presented against 60 and 46 per cent., respectively, in 1889-90. The improvement is encouraging, though the low percentages indicate incorrect registration based on over-estimates. Every opportunity is taken by this office to impress on Inspecting officers the importance of a more careful scrutiny of the E forms. The chance of error is inherent in the system itself, though it may be reduced by exercising greater discretion and judgment. From the details given below of the number of pupils registered and presented under each standard, it will be noted that, except under the Seventh standard in the case of boys, and the First, Fifth and Seventh standards in the case of girls, there was more or less improvement in the proportion of examinees :—

Standards.	Number of pupils registered.		Number of pupils presented.		Percentage of presented to registered.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
Infant	71,547	24,736	46,449	11,380	65	46
First	100,961	21,223	68,870	9,382	68	44
Second	81,581	11,726	53,014	5,689	65	49
Third	52,694	6,639	34,348	3,273	65	49
Fourth	21,446	2,972	11,221	1,699	52	57
Fifth	2,793	1,005	1,577	555	56	55
Sixth	1,790	360	1,147	231	64	64
Seventh	1,648	107	887	59	54	55
Total ...	334,460	68,768	217,513	32,268	65	47

The amounts of results payments from Provincial, Local and Municipal funds rose from Rs. 1,68,984, Rs. 1,79,928 and Rs. 65,646 to Rs. 2,16,408, Rs. 2,06,491 and Rs. 76,230, respectively, showing a substantial increase under each head. The comparatively large outlay from Provincial funds is due partly to the payment of arrears of the previous year, and partly to the additional earnings of Board schools over and above the budget estimate. The larger amount earned by Board schools from Provincial funds is explained by the increase in their number and the raising of their standard. Of the grants paid from Provincial funds, particulars have been furnished for Rs. 2,12,452 only, complete returns not having been received from some of the Inspecting officers. From the marginal figures it will be observed that the grants paid to boys and girls were in the proportion of 46 to 54 as in the previous year. The grants paid for the Fourth standard are a great advance on the actuals of 1889-90. This must be attributed to the impetus to Upper Primary education given by the Primary School examination. Grants amounting to Rs. 16,247 were paid for boys of the Lower Primary standard. Schools in the Agency tracts, Practising departments, and European and Mappila boys alone receive aid for the Lower Primary standards from Provincial funds.

Standards.	For Boys.	For Girls.
	Rs.	Rs.
Infant	1,281	8,944
First	5,206	26,637
Second	5,349	25,211
Third	4,411	23,074
Fourth	56,706	16,863
Fifth	11,924	8,545
Sixth	8,939	4,771
Seventh	3,359	1,232
Total ...	97,175	1,15,277

The amount of results grants paid from Local funds aggregated Rs. 2,06,471, of which particulars by standards have not been furnished for Rs. 120. From the marginal entries it will be noticed that, as in the previous year, the total of grants paid for the Third standard was less than that passed under the First or Second standard.

	Rs.
Infant standard	11,111
First do.	65,636
Second do.	67,710
Third do.	62,014

GENERAL REMARKS.

Of the grants paid from Municipal funds, details are not available for Rs. 3,362. The remaining sum was paid in the several standards as per margin. It will be seen that the grants paid to boys under the Lower Secondary standards amounted to Rs. 5,961 against Rs. 5,428 in the previous year. The entries under girls represent the results grant to girls in poor schools in the Madras Municipality. Unlike what was the case with grants from Local funds, a larger sum was disbursed for the Third than for the First or Second standard.

Standards.	Boys.	Girls.
	Rs.	Rs.
Infant	1,417	215
First	11,872	142
Second	14,147	675
Third	20,560	998
Fourth	16,881	...
Fifth	2,356	...
Sixth	2,281	...
Seventh	1,324	...
Total ...	70,838	2,030

Combining the grants from Provincial, Local and Municipal funds, and viewing them in relation to the number passed, it will be noticed that the average earning of each passed male pupil rose, except under the Infant, Third and Seventh standards, while the average earning of each girl was greater, except under the First and Seventh standards. These facts point to an improvement in the teaching of optional subjects.

Standards.	Boys.		Girls.		Average grant paid	
	Grants paid.	Number passed.	Grants paid.	Number passed.	Per male pupil.	Per female pupil.

The following summary relates to the amount of grants earned from public funds for merit and ordinary passes, so far as details have been furnished :—

Standards.		Provincial.		Local.		Municipal.	
		Merit.	Ordinary.	Merit.	Ordinary.	Merit.	Ordinary.
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Infant	Boys	932	349	8,884	2,227	1,171	246
	Girls	6,592	2,352	...	...	162	53
First	Boys	2,403	2,803	33,450	3,2186	6,448	5,424
	Girls	14,085	12,552	...	...	60	82
Second	Boys	2,322	3,027	31,560	36,150	7,334	6,813
	Girls	12,446	12,765	...	...	270	405
Third	Boys	1,900	2,511	27,386	34,628	10,386	10,174
	Girls	11,122	11,952	...	...	457	541

GENERAL REMARKS.

Standards.		Provincial.		Local.		Municipal.	
		Merit.	Ordinary.	Merit.	Ordinary.	Merit.	Ordinary.
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Fourth	Boys	28,073	27,733	...	...	8,869	8,012
	Girls	8,596	8,267	...	...	...	...
Fifth	Boys	4,321	7,603	...	...	908	1,448
	Girls	3,439	5,106	...	...	...	...
Sixth	Boys	3,317	5,622	...	...	961	1,320
	Girls	1,800	2,971	...	...	...	...
Seventh	Boys	535	2,824	...	...	322	1,002
	Girls	522	710	...	...	...	...
Total ...		1,03,305	1,09,147	1,01,280	1,05,191	37,348	35,520

As in 1889-90, the total of merit grants from Provincial and Local funds was less than that of ordinary grants, but the expenditure from Municipal funds on merit grants exceeded that of ordinary grants. Schools in Municipalities are, however, more efficiently conducted than those elsewhere, and the difference does not therefore seem to have been the result of any variation in the standard of the test applied.

Recommendations of the Education Commission.

196. In the administration of the Department, the important recommendations of the Education Commission have been kept steadily in view, and every opportunity has been taken to adopt them as far as practicable.

Proposals were under consideration to arrange for instruction being imparted in the Presidency College in botany, geology and physiology—the three optional subjects of Branch III of the B.A. course, which the college has not hitherto been in a position to teach. Greater attention was paid to practical instruction in the College of Engineering. On college classes being opened in the Municipal Brennen School, Tellicherry, the formation of the Junior F.A. class in the Calicut College was deferred, and it is under consideration to reduce the standard of the institution.

In the Government Madrasa-i-Azam, the Teachers' College, and the Government College, Mangalore, classes to prepare pupils for certain optional branches of the Upper Secondary examination, viz., the Higher examinations under the Technical examination scheme have been formed and are in fair working order. In Chengalvaraya Nayakar's Commercial High school, and Bishop Corrie's Grammar school, commercial correspondence, commercial arithmetic and phonography were taught to pupils and outsiders with some success. A few other institutions under private management have begun the teaching of such subjects. Improvement will also be noticed in the number of pupils presented for and passed in the non-literary branches of the Middle School examination. But a sudden advance cannot be expected and for some time the growth of technical and industrial education must of necessity be slow.

The encouraging results of the Primary School examination have already been noticed, and orders have been issued laying down the optional branches in which candidates for minor appointments connected with village administration, should qualify. This examination bids fair to become more popular, though the number of pupils in the Upper Primary stage of instruction is still not so large as is desirable.

I have referred in Chapter XI to the Sanskrit schools, which were recognized and brought on the aided list during the year. The requirement that managers of

GENERAL REMARKS.

such institutions should pay a minimum contribution from local sources under the rules of the Grant-in-aid Code operates as a bar to many schools of this description seeking Departmental recognition and aid.

Hindu and Muhammadan girls in the secondary stage of instruction improved in numbers. But until a radical change comes about in the social customs of these classes, the advance will continue to be slow.

The steps, which have been taken to carry out the recommendations of the Education Commission with respect to scholarships, are stated in the preceding chapter.

Relative expenditure from public funds on Secondary and Primary education.

197. General Table (IV) gives the expenditure from all sources on Secondary and Primary schools as Rs. 33,22,822, distributed as follows :—

Schools.	From Provincial funds.	From Local funds.	From Municipal funds.	From all sources.
	Rs.	Rs.	Rs.	Rs.
Secondary schools for boys	1,48,272	17,881	32,682	9,70,524
Do. do. for girls	50,981	751	450	1,38,946
Primary do. for boys	1,73,326	4,83,572	1,08,448	18,22,833
Do. do. for girls	1,47,557	9,765	7,395	3,90,519
Total ...	5,20,136	5,11,969	1,48,975	33,22,822

Compared with the figures in the last report it will be noticed that, while the expenditure on Secondary schools and classes for boys and girls rose by Rs. 7,644, that on Primary schools and classes advanced by Rs. 2,44,047. The tendency to increase the expenditure on Secondary education is checked as much as possible, and Boards are generally advised to reduce unpromising and expensive Middle schools to the Upper Primary standard. On Secondary schools for boys, excluding Primary departments, Provincial, Local and Municipal funds, respectively, spent Rs. 27,271, Rs. 4,797 and Rs. 5,337 more than in the previous year, while on Primary schools the expenditure from the above sources rose by Rs. 29,963, Rs. 72,246 and Rs. 14,881 respectively. The comparatively larger outlay on Primary than on Secondary education from Local and Municipal funds shows that Local Boards look upon Primary education as their chief concern. Secondary schools for girls cost almost the same as in 1889-90, though the amount contributed from public funds increased by Rs. 7,680. The expenditure on Primary girls' schools rose by Rs. 11,522, but here also the cost borne from public funds was Rs. 24,036 more than in the year previous.

Gradation of upper and lower subordinates of the Department.

198. Sanction was accorded by the Secretary of State towards the close of the year for bringing certain appointments into a graded service under the designation of "the Upper Subordinate Educational service—Scholastic branch," and proposals for grading the lower subordinates are now before Government. Owing, however, to the Government of India having declined to treat each grade as a distinct class, the advantages contemplated by the gradation have been lost; and, though the scheme may probably benefit a few officers, the officers concerned have, as a class, lost much by being deprived of acting promotions from class to class. If the Lower Subordinate scheme be sanctioned and worked on the same lines, the inconvenience to the Department and the loss to individual officers in the several grades will be very great, because, when an acting vacancy occurs in the highest class on Rs. 175—5—200, a new officer can be appointed in the lowest class only on Rs. 10—1—15, no acting promotion being allowed to any officer in the intermediate grades. I propose, however, to address the Government on the whole subject in a separate communication.

Progress of education in Madras as compared with the advance in the whole of British India.

199. In its Resolution No. $\frac{\text{Edl 1.}}{87/48}$, dated 11th February 1891, the Government of India compared the progress of education in the several Presidencies and Provinces constituting British India taking the statistics for 1889-90. To what extent approximately Madras

GENERAL REMARKS.

was responsible for the increases and decreases noted in the Resolution may be gathered from the following resumé. Of the total increase in schools and scholars, Madras contributed 52·7 and 58·1 per cent., respectively, though it embraces but 13·2 per cent. of the whole area and 14·7 per cent. of the whole population. If public schools alone be taken into account, the increase in schools and scholars will be found to be 65·3 and 55·4 per cent. Boys as well as girls' schools shared in the increase. Of the 1,416 additional public schools for boys, not less than 812, or 57·3 per cent., were contributed by Madras. As regards girls' schools, it will be observed that, while the total number of public schools fell by 118, Madras was credited with an addition of 30 such schools. Over 51 and 81 per cent. of the additional male and female pupils belonged to Madras. This Presidency exhibits a decrease in the number and strength of Secondary schools, owing chiefly to the reduction of Vernacular schools to the Primary standard, and Arts colleges in Madras also experienced more than its proportionate share of the total decrease in numbers. Other classes of institutions show in comparison a decided improvement.

Conclusion.

200. I have condensed the report as far as practicable and omitted references to individual institutions except where I considered them necessary on account of their special character. To reduce the size of the report further will, I apprehend, be apt to limit its usefulness, especially for future reference. Every effort has been made to finish it within the time allowed; but, besides the large amount of current work, which could not be allowed to fall into arrears, there has been special work in connection with the budget and with other important matters, which require to be disposed of before the close of the calendar year.

I have the honor to be,

Sir,

Your most obedient servant,

D. DUNCAN,

Acting Director of Public Instruction.

OFFICE OF THE
DIRECTOR OF PUBLIC INSTRUCTION,
Madras, 1*st October* 1891.

GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—letter from the Director of Public Instruction, dated 7th November 1891, No. 12819, forwarding copies of the Public Instruction Report for 1890–91.

ORDER—dated 12th January 1892, No. 32, Educational.

The Report upon Public Instruction for 1890–91 was due with Government on the 1st November, and was received on the 8th November.

The report now under consideration is free from the objection as to inordinate length taken to its predecessor in the review of last year, but though curtailment has, generally speaking, been judiciously carried out, the report might with advantage have been fuller on certain points which will be referred to later. It would be as well to adhere as closely as possible to the same forms of statements in the body of the report, as want of uniformity renders the comparison of one year's figures with those of another unnecessarily troublesome.

2. *General.*—As Dr. Duncan remarks, the year was one of substantial advance in almost every direction; in certain respects, the results obtained were not so satisfactory as might have been desired, but, on the whole, the statistics testify to the marked energy and success of the department. Taking all classes of schools together, the figures for 1890–91 show that in four years the number of institutions has advanced by 31·8 per cent. and the number of pupils by 31·7 per cent., the advance amounting to 31·3 per cent. in the case of boys and to 34·7 per cent. in the case of girls. The nature of the advance is rendered clear by the following table:—

Year.	Number of institutions of all classes.	Rate of advance upon preceding year in number of institutions.	Number of pupils on the 31st March.			Rate of advance upon the preceding year in the number of pupils.		
			Boys.	Girls.	Total.	Boys	Girls.	Total
		PER CENT.				PER CENT	PER CENT.	PER CENT.
1886–87	16,717	4·4	423,805	65,137	488,942	6 7	10·6	7·3
1887–88	17,355	3·8	440,123	65,535	505,658	3·9	0 6	3·4
1888–89	18,931	9·1	482,279	69,873	552,152	9·6	6·6	9·2
1889–90	20,512	8·4	522,207	78,344	600,551	8·3	12·1	8·8
1890–91	22,028	7·4	556,449	87,715	644,164	6·6	12·0	7·3

These figures, however, relate to private as well as public institutions and in so far are deceptive, for a portion of the apparent advance is due merely to improved registration. Accordingly, in the table given below, attention is confined to public institutions:—

Year	Number of public institutions.	Number of pupils in public institutions on the 31st March.				
		In Colleges.	In Secondary schools	In Primary schools.	In Special schools.	Total.
1886–87	14,849	3,323	30,762	420,982	3,022	458,089
1887–88	14,813	3,445	32,327	425,963	2,919	464,654
1888–89	*15,379	3,483	33,742	452,298	2,991	492,514
1889–90	16,226	3,526	33,302	476,819	3,408	517,055
1890–91	*18,339	3,723	32,507	543,288	3,619	583,137

These figures represent the following percentages :—

Year	Rate of increase or decrease upon preceding year in the number of institutions	Rate of increase or decrease in the number of pupils as compared with preceding year.				
		In Colleges	In Secondary schools.	In Primary schools	In Special schools.	Total.
	PER CENT	PER CENT.	PER CENT	PER CENT.	PER CENT.	PER CENT.
1886-87	..	..	..	..	..	..
1887-88	— 0·2	3·7	5·1	1·2	— 3·5	1·4
1888 89	3·8	1·1	4 4	6·2	2·5	6·0
1889-90	5 5	1·2	— 1·3	5·4	13·9	5·0
1890-91	16 1	5·6	— 2·4	13·9	6·2	12·8

From the above two tables the following facts are apparent :—

(1) Public institutions have advanced in number in the last four years by 26·9 per cent., while the pupils reading in them have increased by 27·3 per cent. in the same period. This progress is highly encouraging, but it would have been even more satisfactory had the figures denoted greater tendency towards concentration. The bringing in of a large number of small Primary schools is a probable explanation.

(2) There has been a marked decrease in the attendance in Secondary schools during the last two years. The decline occurred altogether in Lower Secondary schools, and may in part be due to the substitution of strong Primary schools for weak schools of a higher grade ; if so, it is not to be regretted, for the establishment of Lower Secondary classes at the expense of Primary School departments is rightly to be discouraged. The Director suggests that the falling off in attendance is probably due to the institution of the Primary School examination ; this, no doubt, has been the most potent factor in producing the decline, for the Lower Secondary examination has now no more value than the Primary School examination, so far as appointments in Government service are concerned. Other causes for the falling off are set out in paragraph 56 of the report, but these do not include the fee notification, which, in the opinion of Government, has specially affected Secondary schools.

(3) Compared with 1889–90, there has been a decrease of 1,097 in the number of private institutions. This Dr. Duncan ascribes, in paragraph 2 of his letter, to the adoption of a more rational system of classification. But from what appears in the report it would seem that the schools which have been transferred from "Private" to "Public" under the new system are not working in strict conformity with the departmental standards. If so, the Director has departed from the explicit orders of the Government of India communicated to him with G.O., dated 29th January 1890, No. 83, Educational. The matter should be further reported upon.

In the paragraph quoted above the Director observes that 19 schools not conforming to departmental standards furnished returns, and that this number will tend to increase since schools not recognized under the Madras Educational Rules will in future appear under this head ; the remark is not clearly understood and should be explained.

3. Assuming the population of school-going age to constitute 15 per cent. of the total population, and adopting the figures of the census of 1891 for purposes of the calculation, it appears that 12·1 per cent. of the total number of children of school-going age were under instruction in 1890–91, the proportion amounting to 21·1 per cent. in the case of boys and 3·2 per cent. in that of girls ; in 1880–81, the proportion, taking boys and girls together, was only 7·1 per cent. The districts differ much in respect of the proportion of the population under instruction as shown below : —

District.	Percentage on population of school-going age of children under instruction				District.	Percentage on population of school-going age of children under instruction.			
	1880-81 (Boys and Girls)	1890-91.				1880-81 (Boys and Girls).	1890-91.		
		Boys.	Girls	Total.			Boys.	Girls.	Total.
Ganjam	4·9	20·2	1·1	13 3	North Arcot	6·1	20·7	2·5	11·6
Vizagapatam . ..	4·0	10·1	1·3	5·8	South Arcot	5·6	18 3	1·6	9·9
Godávari	8·1	16·8	4·0	10·3	Coimbatore	5·0	16·3	1·9	8·9
Kistna	7·1	21·4	4·9	13·2	Nilgiris . ..	11·2	27·9	9·1	19·6
Kurnool	5 1	14·9	1·7	8 4	Salem	3·9	14·3	1·7	7 9
Nellore	5·5	16·8	3 0	9·9	Tanjore	9·1	26·2	3·3	14·3
Madras	38·8	75 6	28 2	51·8	Trichinopoly	5·9	21·9	2·7	11·1
Chingleput	9·7	24·9	3·9	14·5	Madura	6·4	21·1	1·3	10·8
Bellary	6·0	25·8	1·8	13·9	Tinnevelly .. .	13·7	31·4	6·1	18·5
Anantapur .. .		13·3	1·5	7·5	Malabar	8·9	28·4	7·2	17·7
Cuddapah	3·9	13·5	1·3	7·5	South Canara	4·3	21·1	3·1	11·8

These figures refer to private as well as public institutions, and have therefore been largely influenced by the improvement in the registration of the former class of schools, but they show sufficiently clearly the rapidity with which education has progressed in the decade, and were the comparison restricted to boys the evidence would be still stronger. The advance in some districts has been remarkable, even if girls be included in the comparison; for example, the proportion under instruction has risen since 1880–81 in Ganjam from 4·9 to 13·3 per cent., in Kistna from 7·1 to 13·2, in Madras from 38·8 to 51·8, in the Nilgiris from 11·2 to 19·6, in Malabar from 8·9 to 17·7, and in South Canara from 4·3 to 11·8. Every district participated in the advance, but the amount that remains to be done to put elementary education on a thoroughly satisfactory footing is still immense.

78,482 boys and 7,395 girls were learning English during the year under review. The figures for five years are compared below, and they show an advance in four years of 9 *per cent.* in the case of boys and 13·8 *per cent.* in that of girls. As the number of pupils in the Collegiate, Secondary and Upper Primary stages is 67,330, it appears that at least 18,547 pupils in the Lower Primary stage are reading English.

	Number learning English.				
	1886 87.	1887–88	1888 89	1889 90.	1890–91
Boys	72,016	72,628	77,681	77,448	78,482
Girls	6,498	6,059	6,420	7,113	7,395

The extent to which different classes of the community have been affected by the progress of education will be referred to later on.

4. *University Education.*—Arts Colleges shared in the general advance, the number of students reading in them rising from 3,043 in 1889–90 to 3,205, and the persons who appeared for the various University examinations other than the Matriculation numbered 3,361, against 3,177 in the preceding year. Details of the results of the University examinations appear below :—

Examination.	Number examined.			Percentage passed.		
	1880 81.	1889–90	1890-91.	1880-81.	1889–90.	1890–91.
M.A.	9	10	10	56	33	60
B.A.	195	930	1,046	58	52	59
F.A.	478	2,013	2,052	35	18	33
M.L.	2	..	2	100	..	50
B.L.	41	120	128	16	29	30
M.B. and C.M.	..	4	6	..	50	33
Preliminary Scientific	5	4	4	100	25	50
L.M.S.	14	74	84	79	24	21
B.C.E	2	13	10	50	31	10
L.T.	..	9	19	..	56	37
Total ..	746	3,177	3,361	..	..	..

These figures form evidence of a large extension of higher education, but the very slow advance during the last few years in the strength of the F.A. classes leads to the belief that the demand for collegiate education of this grade has almost been satisfied; the number of students reading in the B.A. classes, which had been stationary or declining for the last 3 years, advanced suddenly, however, from 713 to 841. The Director expressed in the report for 1889–90 his surprise that the raising of the standard of admission to the public service had not had a marked effect upon the strength of the F.A. classes; it is still more remarkable that the year under review should also have shown no signs of such an effect. The last Middle School examination was, however, held in December 1890, and there can be little doubt that the F.A. classes will be considerably stronger in 1891–92 than when a Lower Secondary education was considered sufficient qualification for public service. The information given in section 191 of the report that about 75 per cent. of matriculates prosecute their studies towards the F.A. examination and 90 per cent. of F.A. students go on for the B.A. degree is novel and interesting. It has not hitherto been supposed that so large a proportion of matriculates continued to study. The Government will be glad if the inquiry can be prosecuted further and the proportions of students passing on to the senior F.A. and B.A. classes ascertained.

The results of the Medical and Engineering examinations were generally unsatisfactory; the subject has been dealt with in the separate reviews upon the Medical College and the College of Engineering. The percentage of success among candidates from the Teachers' College was also below what it should have been. As usual, the proportion that passed the optional language branch in the B.A. and F.A. examinations was very large, amounting to 84·6 and 82 per cent., respectively; the percentage was still higher in the case of the B.A. examination in 1889–90, and the decline is not to be regretted, although it is natural that candidates for examination in their own mother-tongues should secure a high average of success. In his letter, dated 17th April 1891, No. 116, read in G.O., dated 5th May 1891, No. 324, Educational, the Registrar of the University observed that the Syndicate had considered the question of improving the efficiency of the examinations in Vernacular languages, but the Government is not aware what steps have actually been taken in the matter. In the F.A. examination, the lowest proportion of success was obtained in the two important subjects of English and Mathematics; in the B.A. examination also, the number of candidates in Mathematics was, as usual, small, and of these comparatively few were successful. The proportions in which the main classes of the community have contributed during the last five years to the list of successful candidates for the B.A. and F.A. examinations is shown in the following table :—

Class	Percentage on the total number of successful candidates of candidates of each class.								
	1886-87.			1887–88.			1888–89.		
	B.A. Language.	B.A. Optional.	F.A.	B.A. Language.	B.A. Optional.	F.A.	B.A. Language.	B.A. Optional.	F A.
1	2	3	4	5	6	7	8	9	10
Brahmans	72·2	90·5	70·2	67·8	69·7	70 2	70·4	67·8	71·6
Other Hindus ..	17·4		19·3	19·1	19·4	19·4	20·4	23·9	16·9
Muhammadans ..	1·0	0·6	1·8	2·1	2·0	1·6	1·0	0·8	1·2
Native Christians ..	6·3	5·1	7·0	8·9	7·5	7·9	6·6	5·9	9·0

Class	Percentage on the total number of successful candidates of candidates of each class—*cont.*					
	1889–90.			1890–91.		
	B.A. Language.	B.A. Optional.	F.A.	B.A. Language.	B.A. Optional.	F.A.
	11	12	13	14	15	16
Brahmans	72·0	71·4	69·6	69·1	71·2	71·9
Other Hindus	16·7	19·2	17·8	16·2	19·1	16·8
Muhammadans	0·7	1·1	1·4	1·4	0·8	1·0
Native Christians	10·3	7·7	8·9	12·5	7·8	7·9

Taking Brahmans to constitute about 3·6 *per cent.* of the total population, other Hindus about 87·8, Muhammadans about 6·2, and Native Christians about 2·2, it will be observed from the above figures that the results obtained in the University examinations were as creditable to the Native Christian community and the various societies specially interested in it as they were discreditable to the Muhammadans. Moreover, the proportion of Muhammadans has shown no tendency to advance; on the contrary, in the B.A. and F.A. examinations alike, the place held by candidates of this community was inferior to that occupied in 1887–88, while among Native Christians the reverse was the case.

There were seven first-grade Arts Colleges having an average daily attendance of more than 100 pupils, and of these, two were under departmental management; among these, Pachaiyappa's passed the highest proportion (88·0 per cent.) of candidates for the B.A. Language branch; the S.P.G. College, Tanjore, the highest (83·3 per cent.) for the B.A. Optional branch; and the Kumbakónam College the highest (56·1 per cent.) for the F.A. examination, the results obtained in this last case showing a great improvement upon 1889–90. The ill-success of the Presidency College in Mathematics is again made the subject of remark by the Director. There were 25 second-grade Colleges, and of these only six had an average daily attendance of more than 50; in the case of every one of these six institutions, more than half the candidates for the F.A. examination failed.

5. *Secondary Education.*—Most of the public examinations which form the tests of Secondary and Primary education have already been discussed by Government when reviewing the report of the Commissioner for the Uncovenanted Civil Service Examinations for 1890–91, and therefore but few remarks are called for under this head. The Upper Secondary examination was a complete failure, but further experience is required before any definite conclusion can be arrived at with regard to it. For the Matriculation examination 7,002 candidates appeared, of whom 23·5 *per cent.* passed; these figures compare as under with those of the four preceding years and 1880–81:—

—	1880–81.	1886 87.	1887–88.	1888–89.	1889–90.	1890 91.
Number of examinees	3,519	6,378	6,582	7,327	7,104	7,002
Percentage of success	39·0	34·0	29·8	25·3	22·7	23·5

The almost continuous decline in the proportion of success is probably due merely to greater strictness on the part of the examiners, but the falling off in the number of examinees since 1888–89 is noticeable. Of the successful candidates for the Matriculation examination, 7·6 per cent. passed in the first class against 10·3 per cent. in 1889–90—a not very satisfactory result. The proportion of first-class passes was particularly low in the case of Government and Unaided schools and Private students. Only one candidate passed from the Madrasa-i-Azam out of 11 sent up for examination; the ill-success of this school is to be regretted. The Middle School examination was held for the last time in December 1890; having already been dealt with in the review referred to above, it calls for but few observations. The best results at the Middle School examination were obtained by Private students. This fact is due, according to the Director, to a rush of specially well-prepared candidates in consequence of the approaching abolition of this examination; it might rather have been supposed that the rush would have been of the specially ill-prepared. The superiority of Private students has been conspicuous for several years, as the following table shows, and is a somewhat remarkable fact:—

Institutions.	Percentage on total number of successful candidates of those who secured first-class passes		
	1888–89.	1889–90.	1890–91.
Madras Government and Board Schools	11·4	10 2	7·6
Other Government Schools	7 6	12·2	10·3
Private and Aided Schools	10·0	12·4	9·0
Private Students	25·6	20·5	23 7

There was a great improvement, as compared with 1889–90, in the proportion of passes in Mathematics. The number of boys presented for the three Secondary standards was unusually large, and the proportion of success was better than in any of the three preceding years. There has, however, been no general tendency towards advance either in the number presented or the number passed for these standards owing possibly to restrictions in the grant of aid on the result system. Particulars appear below :—

Year	Number of boys presented for the Secondary Standards.				Percentage passed.			
	Fifth.	Sixth.	Seventh.	Total.	Fifth.	Sixth.	Seventh.	Total.
1886–87	1,790	1,010	705	3,505	72·2	62·1	48·4	64·6
1887–88	1,692	1,023	860	3,575	71·6	56·1	35·1	58·4
1888–89	1,596	1,060	969	3,625	69·2	63·0	33·4	57 8
1889–90	1,551	1,060	901	3,512	68·5	64·9	31 7	58·0
1890–91	1,667	1,147	887	3,701	72·0	70·4	43 2	64·6

Result earnings and the examination of girls for the higher standards will be dealt with subsequently.

6. *Primary Education.*—The Primary School examination has already been dealt with in connection with the report of the Commissioner for the Uncovenanted Civil Service Examinations ; it has already shown a marked effect in an increase of 20 *per cent.* which took place during the year in the strength of Upper Primary schools. The success of the measures for improving the Elementary education of Muhammadans in Madras is noted with pleasure. Pupils were presented for the five Primary standards from 12,384 schools, being 785 in excess of the corresponding figure for the preceding year. As in 1889–90 and 1888–89, the proportion of schools on the pure results system which passed pupils was superior to that obtaining in the case of salary-results schools ; the reason for this may be that suggested in paragraph 85 of the report, viz., that only the smaller and less efficient schools have been put on the salary-results system and that result schools have as a rule the benefit of more direct, constant and intelligent supervision, but it is also possible that the pure results system offers a greater stimulus to work. Particulars of the five Primary standards, so far as regards boys, appear below ; girls will be dealt with separately hereafter :—

Years.	Number of boys presented for the various standards.					Percentage passed.				
	Infant.	I.	II.	III.	IV.	Infant.	I.	II.	III.	IV.
1886–87 ..	22,030	54,265	44,759	30,815	10,893	78·3	68·4	71·4	67·3	63·0
1887–88 ..	30,173	56,210	41,560	29,544	10,361	76·8	67·6	56·6	65·1	64·8
1888–89 ..	37,314	59,546	43,950	28,800	10,451	79·6	68·4	70·0	66·3	64 5
1889–90 ..	41,989	64,024	47,331	30,704	10,532	79·2	72·4	70 1	67·3	63·6
1890–91 ..	46,449	68,870	53,014	34,348	11,221	82·4	70 7	71·1	68·9	65 6

These figures show no general tendency to improvement in the proportion of passes, but they testify to a great and almost continuous advance in the number of boys presented in each standard. Since 1886–87, this advance has amounted in the Infant standard to 110 *per cent.*, in the First standard to 27 *per cent.*, in the Second to 18 *per cent.*, in the Third to 11 *per cent.* and in the Fourth to 3 *per cent.*

Altogether 181,822 boys and girls passed the eight standards, and this represents an advance of nearly 36 *per cent.*, upon the figure for 1886–87.

7. *Special Education.*—Special institutions for professional training may be divided into Colleges (or departments of colleges) and Schools (or departments of schools). The former class is dealt with individually by Government in separate reviews and calls for no remarks, but particulars for schools and departments of schools are given in the subjoined statement :—

Classes of Institutions.	Number.					Strength.				
	1886–87.	1887–88.	1888–89.	1889–90.	1890–91.	1886–87.	1887–88.	1888–89.	1889–90.	1890–91.
Training Schools for Masters	45	41	46	52	57	1,104	967	1,039	1,215	1,174
Training Schools for Mistresses	12	13	13	13	13	324	311	331	289	253
Schools of Art	1	1	1	1	1	265	299	212	364	424
,, Medicine ..	4	3	3	3	3	204	197	225	209	261
,, Engineering ..	1	1	1	1	1	164	75	76	113	156
,, Agriculture ..	1	1	1	1	1	83	32	28	40	34
,, Commerce ..	1	2	1	1	2	112	314	169	162	117
,, Industry ..	16	18	20	19	19	692	640	739	739	992
Ordnance Artificers' School	1	1	1	1	..	74	84	87	94	..
Reformatory School ..	..	..	1	1	1	..	..	85	109	140
Schools of Music	..	..	..	1	1	..	..	..	74	68
	82	81	88	94	99	3,022	2,919	2,901	3,408	3,619
Special Classes	1	5	8	14	15	24	296	689	1,019	1,000
Total ..	83	86	96	108	114	3,046	3,215	3,680	4,427	4,619

These figures cannot be called altogether encouraging; the attendance at special classes has indeed increased very largely, but the Government is not disposed to attach much importance to scattered classes for technical instruction. If technical training is to have any practical benefit, it must be conducted in large institutions possessing the best apparatus and a skilled staff of teachers. For this reason, the absence of signs of concentration is a matter for regret. There has, however, been a steady, though small, increase in the number of students at special schools during the last three years, and if the Ordnance Artificers' school be left out of account when comparing the year under review with 1889–90, the advance made in 1890–91 was not inconsiderable. But by far the most unsatisfactory feature of the above table is the statistics relating to Training Schools. The number of masters under training in these institutions amounted only to 1,174—a figure below that reached in 1889–90 and not much higher than that for 1886–87; the number of mistresses under training was less than in any of the preceding four years. This unexpected result is attributed by the Director in the case of schools for masters to the closure of certain institutions and to the admission of students after the end of the year in certain other institutions (paragraph 92), and in the case of schools for mistresses to the stricter enforcement of the provisions of the Grant-in-aid Code (paragraph 100). These explanations seem hardly sufficient, and certainly do not account for the continuous decline in strength in the case of girls' schools. The matter is one for very serious consideration, and unless measures are taken to improve the attendance at this class of institutions, the strict enforcement of the Educational rules relating to the qualifications of teachers will be impossible. The Government desires that the Director will make full inquiries into the cause of the apparent unpopularity of these institutions, and report his views on the subject. The figures for attendance certainly do not go to support Mr. Grigg's proposal to increase the length of the course of training, a proposal which has now been negatived by Government.

The qualifications of the teachers employed in Training Schools for Masters showed an improvement as compared with 1889–90, but 29 teachers out of 123

employed still remained untrained. In Training Schools for Mistresses, 8 out of 35 teachers had never been trained.

The statistics relating to Schools of Industry are, on the whole, satisfactory, the number of pupils having risen largely and the qualifications of the teaching staff having greatly improved as compared with the preceding year, but 35 out of 81 masters employed had passed no examinations whatever even in 1890–91. The various classes of the community were represented in Schools of Industry as shown in the margin. These figures show considerable variations between 1889–90 and 1890–91, but Native Christians still maintain their marked superiority; Europeans and Eurasians and Muhammadans also contributed far more than their proportionate share to industrial education. The Committee of the Madras Industrial School will be requested to expedite the scheme and estimates for the transfer of the Industrial school to "Grassmere" called for in G.O., dated 19th August 1890, No. 589, Educational. The Director will also report whether any steps have been taken to give effect to G.O., dated 9th June 1891, No. 438, Educational, wherein the refund was ordered of a debt due by the Madras Industrial School to Government. The remarks upon the Art Industrial School, Nazareth, are noted with satisfaction.

Class.	Percentage to total strength of Schools of Industry.	
	1890.	1891.
Europeans and Eurasians	11·4	14·0
Native Christians	45·7	37 8
Muhammadans	26·9	24·4
Brahmans	0·8	7·4
Non-Brahman Hindus	15·2	16·3
Others	..	0·1

8. *Female Education.*—The progress of female education during the last few years has been rapid and continuous; in 1886–87, the number of girls in all classes of institutions was only 65,137; in 1890–91, this had risen to 87,715—an increase of 22,578 or 34·7 per cent. The distribution of these pupils among the various stages of instruction is shown in the following table:—

Year.	Number of girls in all classes of institutions.	Proportion of girls in each stage of instruction in public institutions for boys and girls.			
		Upper Secondary.	Lower Secondary.	Upper Primary.	Lower Primary.
1886–87	65,137	0·2	3·1	5·2	91·5
1887–88	65,535	0·2	2·9	5·0	91·9
1888–89	69,873	0·2	3·0	4·7	92·1
1889–90	78,344	0·2	3·0	4·5	92·3
1890–91	87,715	0·3	2·9	4·2	92·6

The increase thus appears to have taken place in Lower Primary classes at the expense of higher stages of instruction, but this is merely due to the downward extension of education, for each of the higher stages shows a fair amount of growth, though perhaps less than might have been hoped for.

Practically, the Christian communities alone supplied girls for the Upper Secondary stage, and in the Lower Secondary stage also girls of this faith predominated. There was a gratifying increase in the number of female candidates for the Matriculation examination, but at the Middle School examination the successful candidates were fewer than in 1889–90. Almost all the successful candidates at this last examination and all those who passed the Higher Examination for Women were Christians.

The proportion to the female population of school-going age of girls at schools varies greatly in the different districts. In the year under review, the range was from 24·7 *per cent.* in Madras, 7·9 *per cent.* in Nilgiris, 5·7 *per cent.* in Tinnevelly and 5·6 *per cent.* in Malabar to 1·2 *per cent.* in Madura and 1· *per cent.* in Ganjam. The position of Madura was remarkably low.

Particulars of the Standard examinations are compared below for five years :—

Year	Number of girls who passed each standard.							
	Infant.	I.	II.	III.	IV.	V.	VI	VII.
1886-87	5,839	5,083	3,389	2,115	802	375	133	28
1887 88	6,553	5,410	3,483	2,130	868	272	129	17
1888-89	6,349	4,936	3,156	1,866	811	265	132	10
1889 90	7,441	5,778	3,579	2,159	890	344	110	30
1890-91	9,220	6,634	4,017	2,401	1,076	428	166	40
Rate of advance in four years .. .	Per cent. 58	Per cent. 31	Per cent. 18	Per cent. 13	Per cent. 34	Per cent 14	Per cent. 25	Per cent. 43

The advance made is decidedly satisfactory.

In paragraph 131 of his report, Dr. Duncan gives his views upon the subject of mixed schools for girls and boys. The Government fully concurs with the Director that the opening of girls' schools should be discouraged in villages wherein there already exist mixed schools, which meet all the wishes of the inhabitants. The Director's remarks upon this subject will be brought to the notice of all Presidents of District Boards and Chairmen of Municipalities in the Local and Municipal Department. It is observed, with regret, that only one scholarship was applied for out of 32 available for female students who pass the Middle School examination and continue their studies beyond.

9. *Education of various Classes.*—The next subject calling for notice is the extension of education among the more backward classes of the community. Details of the population under each head, according to the census of 1891, are not as yet available, but the method of calculation adopted by the Director in paragraph 8 of the report is probably sufficiently accurate, and in the following table the Director's figures are adopted :—

Classes of the community.	Proportion of pupils to population.	
	1880-81.	1890-91.
Hindus	1 in 90	1 in 64
Native Christians	1 in 17	1 in 16
Muhammadans	1 in 84	1 in 21
Europeans and Eurasians	1 in 7	1 in 5

The advance is noticeable under each class, but particularly so in the case of Muhammadans where it is very remarkable. The above figures, however, take into account private institutions also, and, no doubt, a great portion of the apparent increase in the case of Muhammadans is due to the inclusion of statistics relating to Qurán schools, which escaped registration in 1880–81.

Compared with the preceding year, the number of Muhammadans in all classes of public institutions advanced by no less than 17·2 *per cent.*, the figures being 58,613 against 49,990. This is a remarkable rate, and, though largely due to an increase in the number of public institutions, represents, no doubt, to some extent a real extension of education amongst this class of the population. There was a considerable decrease in the number of private schools specially designed for Muhammadans in consequence of the failure to obtain returns from a number of Mosque schools, but public institutions for Muhammadans advanced from 748 to 936. In the following table the pupils studying in each class of public institutions are distributed according to race :—

Institutions.	Percentage of strength belonging to each class of the community.						
	Europeans and Eurasians.	Native Christians.	Muhammadans.	Brahmans.	Non-Brahmans.	Pariahs and kindred classes.	Others
Arts Colleges	1·3	7·6	1·4	68·8	20·6	..	0·3
Professional Colleges ..	11·0	8·3	2·9	52·7	24·3	..	0·8
Upper Secondary Schools.	4·4	10·2	2·9	53·9	28·4	..	0·2
Lower do. do. ..	5·9	15·6	4·2	38·9	34·2	1·0	0·2
Primary Schools	0·9	7·5	10·5	12·0	65·2	3·8	0·1

The position of Brahmans and Native Christians was, as usual, far superior, considering their numbers, to that of any other of the larger classes, while, on the other

hand, Muhammadans participated to but a small extent in higher education, and Pariahs and such like classes not at all.

In the absence of details of the population, it is not possible to say what proportion of low caste Hindus, such as Pariahs, is under instruction, but it must be a very small fraction, and the marginal statement suggests that their position in this respect is not improving. The figures show the rate at which the contribution of each class to the pupils reading in all public institutions has increased or decreased since 1885–86. There have been changes recently in the method of classifying "Pariahs" and "Others," and the apparently startling result is very possibly in reality due only to this cause; the matter should now be reported upon. There are only 22,050 children of the Pariah class under instruction—a proportion so small that this large section of the community may be said to be practically unrepresented. Progress must inevitably be extremely slow in the case of a class in the position of the Pariah, but every effort should be made to ameliorate their educational condition. With this object it may be necessary to open a large number of special schools for low-caste Hindus alone. The Government desires the opinion of the Director of Public Instruction on the subject. The matter is important, and has received very inadequate notice in the present report.

	Rate of increase or decrease.
Europeans and Eurasians ..	2·6 per cent.
Native Christians	26·2 „
Muhammadans	86·3 „
Brahmans	24·3 „
Non-Brahman Hindus ..	38·8 „
Pariahs and similar classes.	—18·9 „
Others	—56·0 „

The progress of the Khonds, Sávaras and such-like hill tribes is of less moment. Their condition educationally is by no means satisfactory, but they have been very liberally treated in the matter of schools, and their reluctance to educate their children will doubtless gradually disappear with the opening up of the country. Their progress, moreover, comes under the special consideration of Government yearly in connection with the Agency administration reports.

Information should be obtained as to the progress made in educating the Yánadies at Sríharikóta. The Director in paragraph 166 speaks of a school in the Ganjam Agency with a strength of 467 pupils; this is, of course, an error.

In the table in paragraph 9, "Others" have been wrongly classified under the head of "Hindus."

10. The Government concurs with the Director's views, expressed in paragraph 184, as to the importance of the Inspecting Schoolmaster agency, but the question of the reorganization of this must lie over until the Provincial contract has been settled. The remarks upon the subject of Sessional schools in paragraph 186, and the Director's recommendation in paragraph 187, to the effect that teachers of Board schools should be allowed to open night-schools in connection with their day-schools, will be commended in the Local and Municipal Department to the attention of all Presidents of District Boards and Chairmen of Municipalities.

	Number of night schools.	Attendance at night schools.
1885–86	312	6,972
1886–87	366	7,828
1887–88	345	7,408
1888–89	409	8,282
1889–90	449	8,933
1890–91	609	11,706

The attendance at night-schools advanced by 31 *per cent.* as compared with 1889-90; their strength has been rising for some years, as the marginal figures show. It is observed, however, that the Director is not disposed to attach much importance to the work done by these schools.

It is a matter of great satisfaction to observe the advance in the proportion of pupils registered for grant examination that actually proceeded to examination; the percentage for 3 years is shown below:—

Percentage of pupils examined to total number registered.					
1888–89.		1889–90.		1890–91.	
Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
52	40	60	46	65	47

The figures are decidedly encouraging, and seem to justify Mr. Grigg's prognostication that the approximation of the estimate to the actuals for the purposes of E form is a mere matter of time. The proportion of pupils examined is still, however, far below what it should be, and the difficulty of securing accuracy in the estimate of the number of pupils proceeding to examination continues to form one of the chief drawbacks to the maintenance of the present system. The proportion borne by the number presented for grant examination to the number anticipated is set out in more detail below :—

Standard.	1888-89		1889-90.		1890-91.	
	Boys.	Girls	Boys.	Girls.	Boys.	Girls.
Infant	55	40	58	42	65	46
First	58	40	64	46	68	44
Second	49	44	59	49	65	49
Third	46	38	59	49	65	49
Fourth	50	42	50	48	52	57
Fifth	48	43	53	61	56	55
Sixth	63	51	58	45	64	64
Seventh	74	11	62	61	54	55

The decline in the case of boys in the Seventh Standard is as noticeable as the advance in the Third ; the cause of the decrease is not obvious.

The further communication upon the subject of the grading of the Educational Department promised in paragraph 198 is awaited. Dr. Duncan's remarks in paragraph 190 upon the services rendered to technical education by Messrs. Havell and Chatterton are noted with pleasure.

The Director observes in paragraph 170 that the Government books left on hand amount in value to Rs. 35,525 and a considerable portion of this stock consists of unsaleable books which if put up to auction would fetch only an inconsiderable sum. There is, however, no reason for keeping this large stock in hand and the Government considers that the unsaleable books should be got rid of at any price.

11. *Finance.*—The last subject calling for notice is Finance.

The total expenditure from all sources upon public instruction amounted in the year under review to Rs. 53,85,774, of which Rs. 9,49,121 represents outlay upon objects of indirect expenditure. The remainder—Rs. 44,36,653—was distributed as shown below :—

Year	Percentage of total direct expenditure which was devoted to			
	University education.	Secondary education.	Primary education.	Special education.
1888-89	15·0	40·8	34·7	9·5
1889-90	15·2	40·6	35·2	9·6
1890-91	15·4	37 4	37·4	9·7

. The proportionate expenditure is thus increasing under all heads except Secondary education, where the decline is, no doubt, connected with the fall in the strength of Secondary classes which has already been referred to.

In 1885–86, Provincial Funds contributed Rs. 12,74,946 towards public institutions, Local Funds Rs. 6,12,741, Municipal Funds Rs. 1,75,561, Fees Rs. 13,92,091, and all other sources Rs. 9,78,655; in 1890–91, these figures had risen to Rs. 15,93,390, Rs. 7,08,669, Rs. 1,83,582, Rs. 17,52,806 and Rs. 12,73,033, representing advances of 25·0 *per cent.*, 15·7 *per cent.*, 4·6 *per cent.*, 25·9 *per cent.* and 30·0 *per cent.* The increase in the fee revenue is particularly satisfactory.

The manner in which the total cost of each object of direct expenditure was distributed among the various sources of income in the year under review appears in the following table :—

Objects of Expenditure.	Percentage of total expenditure upon the objects specified in Column 1 which was met from				
	Provincial Funds	Local Funds	Municipal Funds.	Fees.	Other sources.
University Education	51 6		0·2	31·2	17 0
Secondary ,, ...	21·2	2·1	2·9	43 6	30·2
Primary ,, ...	10·1	28·7	6 1	34 7	20·4
Special ,, ...	55 3	15·8	2 4	5·3	21·2

During the last two years there has been a continuous increase in the proportion of outlay met from Provincial funds in the case of all classes of institutions. In the same period, the proportion of the expenditure on Primary education which was met from Local Funds has steadily advanced, while, on the other hand, Local and Municipal Funds alike have been expending proportionately less on special institutions. It is satisfactory to observe that a greater proportion of the cost of special education was covered by the fee-revenue than in either 1888–89 or 1889–90, but the reverse is the case as regards University and Secondary education.

The following statement shows the proportionate distribution of the outlay from public funds on all educational objects :—

Objects of expenditure	Percentage from			
	Provincial.	Local.	Municipal	Total public funds.
University Education	22·2	..	1·0	14·3
Secondary ,, ...	22·1	5·0	26·3	17·5
Primary ,, ...	10·6	67·2	55·1	30·0
Special ,, ...	11·9	9·6	5·6	12 7
Buildings, furniture and apparatus	7·6	4 9	4 8	6·7
Direction, Inspection, Scholarships and miscellaneous..	22·6	13·3	7·2	18·8
Total ..	100·0	100·0	100·0	100·0

From this it will be seen that 30 per cent. of public outlay is devoted directly to primary instruction. Of this expenditure, 77 per cent. comes from Local and Municipal funds.

The existing school-fee notification came into force on the 1st January 1887, and since the year 1887–88 pupils and fees have advanced at the rates shown below :—

	Rate of advance per cent.	
	Attendance.	Fees.
Institutions managed by Government	35·3	3·3
,, ,, by Local and Municipal Boards ..	93·9	11·2
,, under private management	18·8	9·6
Total ..	27·4	9·3

So long as the levy of fees is optional in Vernacular Primary and certain other schools, it cannot be expected that the fee-revenue will increase at the same pace as the attendance, but so marked a difference as the above figures disclose was perhaps hardly to be anticipated. The slowness with which fees advance in Government institutions is to be attributed to the fact that new schools managed by the department are generally established in backward localities or for the benefit of backward classes, and the rigorous exaction of fees in them is impossible.

The average fee *per* pupil in 1890–91 was Rs. 2·59; five years previously it was Rs. 2·85; the decline is the natural result of the downward extension of education.

One of the most important parts of the Report on Public Instruction is that which treats of the subject of Grants-in-aid, and it is precisely this portion which has been most inadequately dealt with by the Director.

From paragraph 24 it appears that the total expenditure from all sources on grants-in-aid amounted to Rs. 9,58,051—a figure far in excess of the outlay in any of the preceding years and made up of Rs. 6,40,341 from Provincial Funds, Rs. 2,18,520 from Local Funds, and Rs. 99,190 from Municipal Funds. But the Accountant-General's final accounts for March 1891 show an expenditure of only Rs. 6,32,350 from Provincial funds upon grants-in-aid, and the Local and Municipal accounts show, not Rs. 2,18,520 and Rs. 99,190, but Rs. 2,15,693 and Rs. 87,481. These are differences which must be explained by the Director in communication with the Accountant-General.

A similar discrepancy occurs between the figures representing the expenditure upon Results Grants supplied by the Accountant-General and the Director of Public Instruction, respectively; according to the former, the outlay under this head from Provincial Funds amounted to Rs. 1,67,398 in the case of aided schools not under the management of Municipalities or Local Boards, but the Director gives Rs. 1,65,235 as the figure. According to paragraph 195 of the report, the total expenditure upon result grants alone from all classes of funds amounted to Rs. 4,99,129, being Rs. 2,16,408 Provincial, Rs. 2,06,491 Local, and* Rs. 76,230 Municipal, but the figure for Local Funds seems to include Salary grants, and that for Municipal Funds does not agree with that appearing in the Municipal accounts. The actual payments on account of Result grants seem to have been as shown below:—

	Rs.
From Provincial Funds	2,16,408
„ Local „	2,04,182
„ Municipal „	65,020
Total ..	4,85,610

* These figures exclude the results portion of grants to Combined Schools, which appears to be included in the Director's figure, Rs 2,16,408

The total allotments for result grants in Municipal budgets amounted in the aggregate to Rs. 71,610, and the Provincial and Local allotments on this account were, respectively, Rs. 2,17,000 and Rs. 2,07,078, and it thus appears that the grant was almost completely utilized in the case of both Provincial and Local Funds, and did not fall far short in the case of Municipal Funds.

This is satisfactory, but of the above expenditure a portion must represent outlay on account of arrears from 1889–90, and there are no statistics given from which the lapses during the year under review can be ascertained.

Future reports should contain clear and full information regarding grants-in-aid, and this would be more convenient if appearing in the form of a statement in the body of the report. Particulars should be given under each head (Provincial, Local and Municipal) of the allotment, expenditure and unspent balance under each class of grants (Result, Salary, Combined, Building, Rent, &c.), and explanation should be given of any unusual shortfall and of any discrepancy occurring between the Director's figures and those adopted by the Accountant-General.

(True Extract.)

J. F. PRICE,
Chief Secretary.
